reading for anyone interested in Victorian architecture and nineteenth century society this book will also be of interest to all those who know and love Oxford or Cambridge The Rise of Experimental Biology Peter L. Lutz,2002-04-19 Peter Lutz PhD brilliantly traverses the major milestones along the evolutionary path of biomedicine from earliest recorded times to the dawn of the 20th century With an engaging narrative that will have you turning just one more page well into the night this book revealingly demonstrates just how the modern scientific method has been shaped by the past Along the way the reader is treated to some delightfully obscure anecdotes and a treasure trove of rich illustrations that chronicle the tortuous history of biomedical developments ranging from the bizarre and amusing to the downright macabre The reader will also be introduced to the major ideas shaping contemporary physiology and the social context of its development and also gain an understanding of how advances in biological science have occasionally been improperly used to satisfy momentary social or political needs Bugs and the Victorians John F. French, 2019-03-12 Late nineteenth century England witnessed the emergence of a vociferous and well organized movement against the use of living animals in scientific research a protest that threatened the existence of experimental medicine Richard D French views the Victorian antivivisection movement as a revealing case study in the attitude of modern society toward science The author draws on popular pamphlets and newspaper accounts to recreate the structure tactics ideology and personalities of the early antivivisection movement He argues that at the heart of the antivivisection movement was public concern over the emergence of science and medicine as leading institutions of Victorian society a concern he suggests that has its own contemporary counterparts In addition to providing a social and cultural history of the Victorian antivivisection movement the book sheds light on many related areas including Victorian political and administrative history the political sociology of scientific communities social reform and voluntary associations the psychoanalysis of human attitudes toward animals and Victorian feminism Richard D French is a Science Advisor with the Science Council of Canada Originally published in 1975 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Idea of the University Jaroslav Pelikan, 1992-01-01 The crisis in university education has been the subject of vigorous debate in recent years In this eloquent and deeply personal book a distinguished scholar reflects on the character and aims of the university assessing its guiding principles its practical functions and its role

in society Jaroslav Pelikan provides a unique perspective on the university today by reexamining it in light of John Henry Cardinal Newman's 150 year old classic *The Idea of a University* and showing how Cardinal Newman's ideas both illuminate and differ from current problems facing higher education Pelikan begins by affirming the validity of Newman's first principle that knowledge must be an end in itself He goes on to make the case for the inseparability of research and teaching on both intellectual and practical grounds stressing the virtues free inquiry scholarly honesty civility in discourse toleration of diverse beliefs and values and trust in rationality and public verifiability that must be practiced and taught by the university He discusses the business of the university the advancement of knowledge through research the extension and interpretation of knowledge through undergraduate and graduate teaching the preservation of knowledge in libraries museums and galleries and the diffusion of knowledge through scholarly publishing And he argues that by performing these tasks by developing closer ties with other schools at all levels and by involving the community in lifelong education the university will make its greatest contribution to society
