An Alternative Macroeconomic Theory: The Kaleckian Model and Post-Keynesian Economics John E. King, 2012-12-06

IE King Michael Kalecki 1899-1970 was one of the most important and also one of the most underrated economists of the twentieth century In the 1930s he made a series of fundamental contributions to macroeconomic theory which anticipated complemented and in some ways surpassed

those of Keynes Almost entirely self educated in economics and influenced much by Marxism as by mainstream theory Kalecki very largely escaped the fatal embrace of pre Keynesian orthodoxy which blunted the thrust of the General Theory Many Post Keynesians in particular have found in his work the elements of a convincing alternative to what Joan Robinson Kalecki's greatest advocate in the English speaking world was scathingly to describe as bastard Keynesianism But Kalecki was never interested in theory for its own sake He approached economics from a practical perspective wrote extensively on applied and policy questions and in the final decades of his life turned his attention increasingly to problems of economic development and the management of state socialist economies

Remaking the Economic Institutions of Socialism Victor Nee, David Stark, 1989 To what extent can contemporary socialist economies be reformed by the introduction of markets The question is usually debated in either a Chinese or an East European context this collection of eleven essays is unique in taking the first steps toward a comparative analysis Twenty years of experience with reforms in Hungary and a decade of experimentation with reforms in China provide a critical mass of evidence for analyzing the problems endemic to centrally planned economies and the dilemmas faced in efforts to reform them In reflecting on the Chinese and East European experiences these essays trace the shift from a conception of reform as a mix of planning and markets within the state sector to a socialist mixed economy with implications for the emergence of new social groups and autonomous social organizations The essays exemplify a new perspective in the study of state socialism that changes the focus from ideologies to economic institutions examining how the activities of subordinate groups place limits on the power of state elites The authors include scholars who have shaped debates in Eastern Europe and whose work is now stimulating much discussion in China as well as representatives of a younger generation of economists sociologists and political scientists writing on the basis of field research recently conducted in factories cities and villages in
