Women, Art, and Architecture in Northern Italy, 1520-1580 Katherine A. McIver, 2017-09-29

Expanding interdisciplinary investigations into gender and material culture Katherine A. McIver here adds a new dimension to Renaissance patronage studies by considering domestic art the decoration of the domestic interior as opposed to patronage of the fine arts painting sculpture and architecture Taking a multidimensional approach McIver looks at women as collectors of precious material goods as organizers of the early modern home and as decorators of its interior By analyzing the inventories of women's possessions McIver considers the wide range of domestic objects that women owned such as painted and inlaid chests painted wall panels tapestries fine fabrics for wall and bed hangings and elaborate jewelry pendant earrings brooches garlands for the hair necklaces and rings as well as personal devotional objects Considering all forms of patronage opportunities open to women she evaluates their role in commissioning and utilizing works of art and architecture as a means of negotiating power in the court setting in the process offering fresh insights into their lives limitations and the possibilities open to them as patrons Using her subjects' financial records to track their sources of income and the circumstances under which it was spent McIver thereby also provides insights into issues of Renaissance women's economic rights and responsibilities The primary focus on the lives and patronage patterns of three relatively unknown women Laura Pallavicina Sanvitale Giacomina Pallavicina and Camilla Pallavicina provides a new model for understanding what women bought displayed collected and commissioned By moving beyond the traditional artistic centers of Florence Venice and Rome analyzing instead women's artistic patronage in the feudal courts around Parma and Piacenza during the sixteenth century McIver nuances our understanding of women's position and power both in and out of the home Carefully integrating extensive archival

The Art of Parmigianino David Franklin, Parmigianino, 2003-01-01 The beauty and range of the work of the sixteenth

century artist Parmigianino as painter draughtsman and printmaker make him one of the most remarkable figures of the Italian Renaissance He was an artist who seemed to discover his style without any effort and his art was universally recognized as being graceful or full of grace In his day grace was understood to be a spiritual endowment conferring qualities that could not be taught It was one of the preconditions of natural genius so highly valued among Renaissance artists But nothing as effortlessly elegant as Parmigianino's drawings and paintings could have been achieved without effort It is through a close study of the drawings in particular that one is able to discern the sources of Parmigianino's style and the creative struggles he endured This illustrated study offers a comprehensive reassessment of his work as a draughtsman More than eighty works on paper selected from collections around the world are discussed in detail Among Renaissance artists Parmigianino was perhaps more conscious than any of the potential of the graphic arts to convey and indeed broadcast complex ideas He explored this potential himself not only by means of his numerous drawings but also through the etchings he produced on his own effectively introducing this print medium into Italian art and through the engravings and chiaroscuro woodcuts that were made after his designs In these media his influence travelled farther and wider than it could have through his paintings alone This book coinciding with the quincentenary of the artist's birth in Parma in 1503 accompanies an exhibition presented at the National Gallery of Canada Ottawa from October 3 2003 to January 4 2004 and at The Frick Collection New York from January 27 to April 18 2004 Nietzsche and Dostoevsky Jeff Love, Jeffrey Metzger, 2016-11-15 After more than a century the urgency with which the writing of Fyodor Dostoevsky and Friedrich Nietzsche speaks to us is undiminished Nietzsche explicitly acknowledged Dostoevsky's relevance to his work noting its affinities as well as its points of opposition Both of them are credited with laying much of the foundation for what came to be called existentialist thought The essays in this volume bring a fresh perspective to a relationship that illuminates a great deal of twentieth century intellectual history Among the questions taken up by contributors are the possibility of morality in a godless world the function of philosophy if reason is not the highest expression of our humanity the nature of tragedy when performed for a bourgeois audience and the justification of suffering if it is not divinely sanctioned Above all these essays remind us of the supreme value of the questioning itself that pervades the work of Dostoevsky and Nietzsche *History of Painting in Italy Illustrated by Its Monuments* Giovanni Rosini, 1851 **15th and 16th Century Italian Drawings in the Metropolitan Museum of Art** Metropolitan Museum of Art (New York, N.Y.), Jacob Bean, Lawrence Turčić, 1982
