*The Master Shipwright's Secrets* Richard Endsor,2020-03-05 AWARDED THE ANDERSON MEDAL 2020 This splendid book will appeal to maritime historians archaeologists model makers and nautical enthusiasts across the board Colin Martin The Nautical Archaeology Society A remarkable piece of work J D Davies Historian and Author Inspired by the recent discovery of mathematically calculated digital plans for a fourth rate ship by the Deptford master shipwright John Shish The Master Shipwright s Secrets is an illustrated history of Restoration shipbuilding focused on the Tyger one of the smaller but powerful two deck warships of the period It examines the proceedings of King Charles II in deciding the types of ship he wanted and his relationship with his master shipwrights This fascinating book reveals the many secrets of Charles II s shipwrights through an analysis of John Shish s plans for the Tyger revealing innovative practical calculations which differ significantly from the few contemporary treatises on the subject and the complicated process of constructing the moulds necessary to make the ship s frame All the other duties performed by the master shipwrights such as repairing ships controlling their men and keeping up with the latest inventions are also discussed in detail The Master Shipwright s Secrets is replete with beautiful and detailed illustrations of the construction of the Tyger and explores both its complicated history and its complex rebuilding complete with deck plans internal sections and large scale external shaded drawings The title also explores associated ships including another fourth rate ship the Mordaunt which was purchased into the Navy at the time and underwent a dimensional survey by John Shish A rare contemporary section drawing of another fourth rate English ship and constructional drawings of Shish s later fourth rate ship St Albans are also included      *Nicolaes Witsen and Shipbuilding in the Dutch Golden Age* A. J. Hoving,Diederick Wildeman,2012-03-29 In 1671 Dutch diplomat and scientist Nicolaes Witsen published a book that served among other things as an encyclopedia for the shell first method of ship

construction In the centuries since Witsen's rather convoluted text has also become a valuable source for insights into historical shipbuilding methods and philosophies during the Golden Age of Dutch maritime trade However as Andr Wegener Sleeswyk's foreword notes Witsen's work is difficult to access not only for its seventeenth century Dutch language but also for the vagaries of its author's presentation Fortunately for scholars and students of nautical archaeology and shipbuilding this important but chaotic work has now been reorganized and elucidated by A J Hoving and translated into English by Alan Lemmers In Nicolaes Witsen and Shipbuilding in the Dutch Golden Age Hoving master model builder for the Rijksmuseum in Amsterdam sorts out the steps in Witsen's method for building a seventeenth century pinas by following them and building a model of the vessel Experimenting with techniques and materials conducting research in other publications of the time and rewriting as needed to clarify and correct some vital omissions in the sequence Hoving makes Witsen's work easier to use and understand Nicolaes Witsen and Shipbuilding in the Dutch Golden Age is an indispensable guide to Witsen's work and the world of his topic the almost forgotten basics of a craftsmanship that has been credited with the flourishing of the Dutch Republic in the seventeenth century To view a sample of Ab Hoving's ship model drawings please visit <http://nautarch.tamu.edu/shiplab/AbHoving.htm>

**The Sloop of War, 1650-1763** Ian McLaughlan, 2020-01-31 A delight fulfills a long felt need to do justice to the smaller ships of war that did such sterling service for the sailing Royal Navy Ships in Scale This is the first study in depth of the Royal Navy's vital but largely ignored small craft In the age of sail they were built in huge numbers and in far greater variety than the more regulated major warships so they present a particular challenge to any historian attempting a coherent design history However for the first time this book charts the development of the ancillary types variously described in the 17th century as sloops ketches brigantines advice boats and even yachts as they coalesce into the single 18th century category of Sloop of War In this era they were generally two masted although they set a bewildering variety of sail plans from them The author traces their origins to open boats like those carried by Basque whalers shows how developments in Europe influenced English craft and homes in on the relationship between rigs hull form and the duties they were designed to undertake Visual documentation is scanty but this book draws together a unique collection of rare and

unseen images coupled with the author's own reconstructions in line drawings and watercolor sketches to provide the most convincing depictions of the appearance of these vessels. By tackling some of the most obscure questions about the early history of small boat rigs, the book adds a dimension that will be of interest to historians of coastal sail and practical yachtsmen as well as warship enthusiasts. Fascinating! It combines a truly scholarly delivery with a lovely presentation.  of Congress. Copyright Office, 1978      HMS Gannet William Mowll, 2018-04-30 HMS Gannet beautifully restored today at  
 Chatham Historic Dockyard is a fine example of the small colonial schooners that were built and deployed in the second half  
 of the nineteenth century to police Britain's great empire and enforce the peace of Pax Britannica. Launched at Sheerness in  
 1878 with her white Mediterranean livery and elegant clipper bow, she was the epitome of the colonial gunboat. In this new  
 book by the well known ship modeller Will Mowll, the design and history of Gannet is outlined before the author takes the  
 reader on a detailed photographic step by step exposition of the building of his 1:48 scale model of the ship. A particular  
 feature of the model is the inclusion of a static representation of the 2 cylinder compound steam engine with its three  
 cylindrical boilers. Exquisitely detailed with even the bunkered coal beautifully modelled, all the machinery is made visible by  
 means of the removable deck. The author has therefore reconstructed a major feature of the ship which is no longer extant on  
 the prototype at Chatham. All the information that a ship modeller might need is included here: hull construction and the  
 coppering of the ship's bottom, the making of the ship's steam propulsion systems, the decks and decking, armament, steering  
 gear, mast and yards and rigging and even the furniture in the wardroom. No part of the ship is left hidden. Inspiring with the  
 sheer quality of his workmanship, the author has brought beautifully to life another of Britain's great museum ships.
