## **Model Trains The Collectors Guide:**

Model Trains Chris Ellis,1994      **A Collector's Guide to American Flyer "Tru-Model" Trains, 3/16" Scale "O"**

**Gauge, 1939-1941** Richard A Hosmer,2020-09-14 Following responses from numerous discussions arguments with mostly older train guys as to whether American Flyer trains had two or three rail track it seemed some clarification was in order It also appeared that while the post war S gauge two rail period is quite well covered there is very little information still in print on their immediate ancestors The purpose of this little guide is to present to the people who are unaware of their existence the three rail Tru Model toy trains of the A C Gilbert Company of New Haven CT which were introduced at the 1939 New York World s Fair and which were produced until the war imposed shutdown of non essential manufacturing in July 1942 Dimensions and color schemes are provided throughout the work Wheel arrangements follow the Whyte system of course Lengths given exclude couplers Locomotive lengths given include the proper tender At LEAST one large color photo is included for EACH distinct item and EVERY set is illustrated in catalog format in color Captions are self explanatory All 220 photographs were taken by the author of specimens from his personal collection unless specifically credited otherwise While an attempt was made to show better grade collectible specimens the cars are representative of vintage TOYS and are not intended to represent the pristine mint in the box items available to only a very wealthy few It should be noted that when Gilbert brought American Flyer in 1938 there was a substantial amount of salable but non scale Chicago inventory on hand Prior to that time most toy trains in general were quite unrealistic in appearance particularly car length If you wanted more realism you had but one choice build from scratch This guide does NOT cover ANY of that pre 1940 Chicago Flyer material The 1939 American Flyer catalog first introduced the die cast 3 16 scale equipment but only in the four most expensive sets with would become the two top of the line locomotives By 1940 the conversion to 3 16 scale including the first pressed steel cars was well under way but it was not until the 1941 catalog that ALL offerings were of Gilbert s new 3 16 scale design The first post war catalog for1946 does not list the very limited remaining stock of O gauge trains which was sold off as soon as possible so as to concentrate on the brand new and more exciting two rail lineup There is some intentional redundancy in the descriptions since it is felt that many users are going to simply look in the index for their car s and I wanted them to be able to find everything in one place without their having to crawl page by page It should be noted that legitimate factory produced items are known with some feature s differing slightly from the standard versions of the items presented here Money was saved wherever possible and shortcuts were taken particularly as to colors and markings Nothing was wasted some cabooses were even made on tender frames The most common off beat example being that some cars will have two American Flyer Lines decals instead of the normal one plus the car number Paint shades may vary It must be remembered that their intent was to produce operable toys hopefully at a profit for the enjoyment of mostly children and they were not following any rigid rules to satisfy nit picking collectors in the then far distant future Within certain parameters almost anything is at least

possible and after 80 years some repairs repaints etc have themselves acquired the patina of genuine ness and antiquity The author takes full responsibility for the accuracy of any opinions regarding such specimens which may be stated in this work The author welcomes input from fellow collectors having any corrections or further information regarding these trains which may be incorporated into future editions of this work *Collector's Guide to American Toy Trains* Susan D. Bagdade, Allen D. Bagdade, 1990 Identifies and lists prices for the most widely collected toy trains describes the companies manufacturing trains and gives advice on collecting them *Beginner's Guide to Starting Your Own Model Train Collection (Scenery, Track Plans, and Layouts)* Debbie J., 2012-02-29 ABOUT THE BOOK Model railroading is an activity that captivates people of all ages and genders There is something endlessly fascinating about trains and miniature trains are the most fascinating of all It s a great pastime that provides a creative outlet a lot of enjoyment and the camaraderie of fellow enthusiasts Model railroading is a very adult pastime that makes you feel like a kid again Best of all it s a hobby that you can enjoy as a family parents and children together It really is the world s greatest hobby Many are attracted to model railroading but don t know where to begin You may have seen the impressive layouts created by model railroad enthusiasts and worry that you don t have sufficient space or resources to create something similar Having sufficient know how to assemble track build scenes or keep electronic components in good working order may also seem like a deterrent Cost can also be a factor However you don t have to be an expert to build your first model railway Model railroading has a very large support community It s easy to find an answer to virtually any question you may have about building and maintaining a model train collection both in person and on the Internet EXCERPT FROM THE BOOK Scale refers to the relationship between model trains and the real thing O scale used to be called 1 48 with HO scale at 1 87 but measurements have changed somewhat For the novice it s best to not get too mired in scale details Suffice it to say that O scale is the largest model train and is not very common as it requires more space than most people can allot HO scale is the most prevalent and the standard for most model railroaders having the most product selection availability N is smaller than HO and although there is a good selection many hobbyists prefer HO since N requires a higher degree of detail and ability to work with miniature parts Much depends on individual preference If you just want miles and miles of track and lots of trains going around N is great If you want to re create an elaborate scene with buildings people and geographical features HO is better If you get into model railroad building in a big way you may eventually want to explore other scales but most model train hobbyists are happiest with HO or N Buy a copy to keep reading
