Ozouf, 2015-11-24 This third volume in a much-praised series on The French Revolution and the Creation of Modern Political Culture examines the way in which the Revolution has been portrayed in European thought and its impact upon the development of political philosophy in the nineteenth century. Opening with the influence of Burke and other contemporaries of the Revolution and the ensuing debate over the question 'Why the Terror?', this volume explores such diverse themes as the legacy of the Revolution on the political and social evolution of Germany, England, Italy and Russia; the crisis it brought about in the Catholic Church; and the difficulties encountered in determining the end of the Revolution. By showing that the upheaval in European politics and philosophy caused by the French Revolution continued to shape nations, peoples and thought, the texts brought together in this volume permit a better understanding of the event's extraordinary complexity. *Mutual Hierarchy* Jeffrey A. Dukeman, 2019-02-22 Social Trinitarians have not been shy about positing community as the chief ontological category for Trinitarian discourse. As beneficial as this is, social Trinitarians have

typically been less helpful in advocating the sort of human community for the Trinitarian analogy that most people would probably find desirable To use the example of a marriage one has often been forced to choose between a fully egalitarian view where the spouses supposedly have no differences from each other and a hierarchical view where a husband exercises a unilateral and oppressive power over his wife This book advocates a third alternative for the sort of community present in the Trinity Just as genuine teamwork is generally desirable in various human communities the divine persons have a mutual hierarchy relationship with each other Here each divine person has a unique hierarchy over the others and yet each uses this hierarchy to serve the others in a dignified way Recognizing this mutual hierarchy of the divine persons fosters a view of the Trinity that is maximally social in keeping with the name social Trinitarianism In proceeding thus the book attempts to in a unique way show the harmony between systematic theology exegesis and practice *Critique immanente* Christian Berner,Emmanuel Renault,2024-01-16 How to criticize what is from what is **Fatherland Or Mother Earth?** Michael Löwy,Michael Lowy,1998 Examining how writings on national issues by Marx Engels could form the basis of an international dialectic this text shows that by doing justice to national identities linking new forms of social movement new internationalism can be created **From Is to Ought: The Place of Normative Models in the Study of Human**

Thought Shira Elqayam,David E. Over,2016-08-12 In the study of human thinking two main research questions can be asked Descriptive Q What is human thinking like Normative Q What ought human thinking be like For decades these two questions have dominated the field and the relationship between them generated many a controversy Empirical normativist approaches regard the answers to these questions as positively correlated in essence human thinking is what it ought to be although what counts as the ought standard is moot In contemporary theories of reasoning and decision making this is often associated with a Panglossian framework an adaptationist approach which regards human thinking as a priori rational In contrast prescriptive normativism sees the answers to these two questions as negatively correlated Normative models are still relevant to human thought but human behaviour deviates from them quite markedly with the invited conclusion that humans are often irrational Prescriptive normativism often results in a Meliorist agenda which sees rationality as amenable to education Both empirical and prescriptive normativism can be contrasted with a descriptivist framework for psychology of human thinking Following Hume s strict divide between the is and the ought descriptivism regards the descriptive and normative research questions as uncorrelated or dissociated with only the former question suitable for psychological study of human behaviour This basic division carries over to the relation between normative ought rationality based on conforming to normative standards and instrumental is rationality based on achieving one s goals Descriptivist approaches regard the two as dissociated whereas normativist approaches tend to see them as closely linked with normative arguments defining and justifying instrumental rationality This research topic brings together diverse contributions to the continuing debate Featuring contributions from leading researchers in the field the e book covers a wide range of subjects arranged by six

sections The standard picture Normativist perspectives In defence of soft normativism Exploring normative models Descriptivist perspectives Evolutionary and ecological accounts Empirical reports With a total of some 24 articles from 55 authors this comprehensive treatment includes theoretical analyses meta theoretical critiques commentaries and a range of empirical reports The contents of the Research Topic should appeal to psychologists linguists philosophers and cognitive scientists with research interests in a wide range of domains from language through reasoning judgment and decision making and moral judgment to epistemology and theory of mind philosophical logic and meta ethics *Contemporary Critiques of Political Economy* Ananta Kumar Giri,2024-01-23 This book analyzes contemporary critiques of political economy and highlights the challenges to rethinking contemporary discourses and practices It carries out a multipronged critical and transformative dialogue involving political economy moral economy moral sociology moral anthropology and spiritual ecology The authors discuss diverse themes such as the relationship between consciousness and society the dialogue between Karl Marx and Carl Gustav Jung a critical sociology of morality and property relations moral and political economy of the Indigenous peoples and a critique of modern civilization economic evaluation as well as alternative traditions of thinking in Marx Thoreau Gandhi J C Kumarappa Rammanohar Lohia B R Ambedkar and Jayaprakash Narain A unique transdisciplinary text the book brings together authors and approaches from both the Global North and South It will be indispensable to students research scholars and teachers of humanities and social sciences in such fields as economics sociology philosophy cultural studies and development studies *Les débuts de la critique dramatique en Angleterre jusqu'à la mort de Shakespeare* Harold Symmes,1903

French Prose in 2000 ,2021-10-18 French Prose in 2000 stems in some important measure from work presented in September 1998 at the International Colloquium on French and Francophone Literature in the 1990's held at Dalhousie University A good number of papers given at that time and since revisited in the light of exchanges join here certain others specifically written for the purposes of this book Together they constitute a wide ranging and modally varied interrogation of the current state of French and francophone prose writing its multifaceted manners its richly divergent fascinations its many theoretical or philosophical groundings The book thus ceaselessly moves its attention from fictional biography to the roman noir from the writing of Glissant and Chamoiseau to that of the tonnants voyageurs from the powerful discourse of women such as Chawaf or Cond Ernaux or Germain Sallenave or Kristeva to that of writers as diverse in their modes as Le Cl zio and Quignard Duras and Renaud Camus All chapters focus however in near exclusive measure on the prose production of the last ten or twelve years

Critique of the New Consensus Macroeconomics and Implications for India Dilip M. Nachane,2018-11-02 The thought provoking book presents alternative viewpoints to mainstream macroeconomic theory questions conventional policy wisdom and suggests a systematic re orientation of current macroeconomic and financial regulatory policies in India The New Consensus Macroeconomics NCM which established itself in the 1980s as mainstream macroeconomics essentially represents an uneasy truce between two dominant schools of economic thought viz New Classical and Neo Keynesian economics The NCM sets the tone for much of the macroeconomic especially monetary policy followed by the advanced economies in the period of the Great Moderation 1990 2005 The recent

global crisis has posed a major challenge to the NCM as empirical models based on the NCM failed to anticipate the occurrence of the crisis and later its extent and severity The above considerations constitute the underpinnings of this book which addresses the theoretical controversies within a general context and their policy implications for India The authors analysis leads to a somewhat critical assessment of the financial sector policies followed in India since the initiation of reforms in 1991 This makes the book a valuable resource not only for researchers working in this area but also for policy makers
