development of this Handbook rests on the further assumption that interreligious education has an important role in elucidating the global demand for human rights justice and peace. Interreligious education reveals that the creeds and holy books of the world's religions teach about spiritual systems that reject violence and the individualistic pursuit of economic and political gain and call their followers to compassion for every human being. It also seeks to lead students to an awareness that the followers of religions across the world need to be and to grow in dialogical relationships of respect and understanding. An essential aim of interreligious education is the promotion of understanding and engagement between people of different religions and therefore it has great potential to contribute to the common good of the global community. Interreligious education has grown from the interfaith movement whose beginning is usually identified with the World Parliament of Religions held in Chicago in 1893. This was the first time in history that leaders of the eastern and western religions had come together for dialogue and to consider working together for global unity.

Facing the Unknown Future Ina ter Avest, Cok Bakker, Julia Ipgrave, Silke Leonhard, Peter Schreiner, 2020. During the 20-year history of the European Network for Religious Education through Contextual Approaches (ENRECA), several books have been published on the subject of Religious Education from sociological, psychological, or anthropological perspectives and always in the contextual settings of national educational frameworks and other specific culturally bound phenomena. Also very often an international comparative perspective was included. The shared goal was not so much to reflect on religion as such and on its changing doctrines, institutions, and prescriptions but to try and understand religion in the specific European contexts of secularization and the plurality of life orientations and to understand how religion becomes manifest in education in a variety of concrete policies and classroom practices reflecting various social issues. This volume marking the 20th anniversary of ENRECA has a specific focus on the contextual dimension of time.
