Models Of Spatial Inequality:

Models of Spatial Inequality Robert Paynter, 1982 *The Sociology of Spatial Inequality* Linda M. Lobao, Gregory Hooks, Ann R. Tickamyer, 2012-02-01 2007 CHOICE Outstanding Academic Title Sociologists have too often discounted the role of space in inequality This book showcases a recent generation of inquiry that attends to poverty prosperity and power across a range of territories and their populations within the United States addressing spatial inequality as a thematically distinct body of work that spans sociological research traditions The contributors various perspectives offer an agenda for future action to bridge sociology s diverse and often narrowly focused spatial and inequality traditions **Urbanization and Growth** Michael Spence, Patricia Clarke Annez, Robert M. Buckley, 2008-11-26 Why is productivity higher in cities Does urbanization cause growth or does growth cause urbanization Do countries achieve rapid growth or high incomes without urbanization How can policy makers reap the benefits of urbanization without paying too high a cost Does supporting urbanization imply neglecting rural areas Why do so few governments welcome urbanization What should governments do to improve housing conditions in cities as they urbanize Are innovations in housing finance a blessing or a curse for developing countries How will governments finance the trillions of dollars of infrastructure spending needed for cities in developing countries First in a series of thematic volumes this book was prepared for the Commission on Growth and Development to evaluate the state of knowledge of the relationship between urbanization and economic growth It does not pretend to provide all the answers but it does identify insights and policy levers to help countries make urbanization work as part of a national growth strategy It examines a variety of topics the relevance and policy implications of recent advances in urban economics for developing countries the role of economic geography in global economic trends and trade patterns the impacts of urbanization on spatial inequality within countries and alternative approaches to financing the substantial infrastructure investments required in developing country cities Written by prominent academics in their fields Urbanization and Growth seeks to create a better understanding of the role of urbanization in growth and to inform policy makers tackling the formidable challenges it poses *Inequalities in Geographical Space* Clementine Cottineau, Julie Vallee, 2022-12-28 Inequalities are central to the public debate and social science research They are inextricably linked to geographical space shaping human mobility and migration patterns creating diverse living environments and changing individuals perceptions of the society they live in and the inequalities that endure within it Geographical space contributes to the emergence and perpetuation of inequalities between individuals according to their socioeconomic position gender ethno racial origin or even their age Inequalities in Geographical Space examines inequalities in education in the workplace in public and private spaces and those related to migration Written by geographers sociologists and economists this book draws on a variety of theoretical and methodological approaches and compares different spatial and temporal scales It highlights the importance of geographical space as a vehicle for the expression creation and reproduction of social racial economic and gender

through data mining analysis and mapping comprehensively supplements the Space Economy literature on the region It covers the disparities exacerbated by an overlay of apartheid planning ideology and top down regional development based on selective encouragement of manufacturing investments in growth points or poles and how implementation of past policies intended to cure these disparities have yielded mixed results This book further offers the Gauteng City Region as a microcosm of the national economy in the form of evident significant placed based variations in the intensity and character of economic structure that on the one hand enjoys massive agglomeration economies while on the other has high levels of poverty and large numbers of people living below the Minimum Living Level This book should appeal to urban studies specialists economists and development studies researchers in the Global South

Machine Learning and the City Silvio Carta,2022-06-07 Machine Learning and the City Explore the applications of machine learning and artificial intelligence to the built environment Machine Learning and the City Applications in Architecture and Urban Design delivers a robust exploration of machine learning ML and artificial intelligence AI in the context of the built environment Relevant contributions from leading scholars in their respective fields describe the ideas and techniques that underpin ML and AI how to begin using ML and AI in urban design and the likely impact of ML and AI on the future of city design and planning Each section couples theoretical and technical chapters authoritative references and concrete examples and projects that illustrate the efficacy and power of machine learning in urban design The book also includes An introduction to the probabilistic logic that underpins machine learning Comprehensive explorations of the applications of machine learning and artificial intelligence to urban environments Practical discussions of the consequences of applied machine learning and the future of urban design Perfect for designers approaching machine learning and AI for the first time Machine Learning and the City Applications in Architecture and Urban Design will also earn a place in the libraries of urban planners and engineers involved in urban design

Simulation for Policy Inquiry Anand Desai,2012-06-12 Public policy and management problems have been described as poorly defined messy squishy unstructured intractable and wicked In a word they are complex This book illustrates the development and use of simulation models designed to capture some of the complexity inherent in the formulation management and implementation of policies aimed at addressing such problems Simulation models have long existed at the fringes of policy inquiry but are not yet considered an essential component of the policy analyst s toolkit However this situation is likely to change because with improvements in computational power and software simulation is now easier to include in the standard repertoire of research tools available for discovery and decision support This volume provides both a conceptual rationale for using simulations to inform public policy and a practical introduction to how such models might be constructed and employed The focus of these papers is on the uses of simulation to gain understanding and inform policy decisions and action Techniques represented in this volume include Monte Carlo simulation system dynamics and agent based modeling

Mortality in an International Perspective Jon Anson,Marc Luy,2014-03-24 This volume

presents a state of the art coverage of the measurement and evolution of mortality over time It describes in great detail the changes in the cause patterns of mortality the changes in mortality patterns at different ages and specific analyses of mortality in particular countries Derived from a meeting of the European Working Group on Health Morbidity and Mortality held at the Vienna Institute of Demography September 2011 it presents a cross section of the work and concerns of mortality researchers across Europe ranging from London and Madrid in the west to Moscow in the east with a few additions from further afield Although most of the papers focus on a particular population the range of the papers is broad taken together they present an inter disciplinary cross section of this multi faceted field Coverage includes estimating life expectancy in small areas with an application to recent changes in US counties socioeconomic determinants of mortality in Europe using the latest available data and short term forecasts predicting mortality from profiles of biological risk and performance measures of functioning infant mortality measurement and rate of progress on international commitment using evidence from Argentina avoidable factors contributing to maternal deaths in Turkey changes in mortality at older ages the case of Spain 1975 2006 variable scales of avoidable mortality within the Russian population long term mortality decline in East Asia and much more Perspectives in Mortality Research will serve as a valuable resource for professionals and students in sociology demography public health and personal finance

Spatial Econometrics Giuseppe Arbia,2006-06-08 In recent years the so called new economic geography and the issue of regional economic convergence have increasingly drawn the interest of economists to the empirical analysis of regional and spatial data However even if the methodology for econometric treatment of spatial data is well developed there does not exist a textbook theoretically grounded well motivated and easily accessible to economists who are not specialists Spatial

econometric techniques receive little or no attention in the major econometric textbooks Very occasionally the standard econometric textbooks devote a few paragraphs to the subject but most of them simply ignore the subject On the other hand spatial econometric books such as Anselin 1988 or Anselin Florax and Rey 2004 provide comprehensive and haustive treatments of the topic but are not always easily accessible for people whose main degree is not in quantitative economics or statistics This book aims at bridging the gap between economic theory and spatial stat tical methods It starts by strongly motivating the reader towards the problem with examples based on real data then provides a rigorous treatment founded on s chastic fields theory of the basic spatial linear model and finally discusses the simpler cases of violation of the classical regression assumptions that occur when dealing with spatial data

Proceedings of the ... Northeastern Recreation Research Symposium ,2003 *Contouring Human Development* Mukunda Mishra,Soumendu Chatterjee,2020-05-11 This book acquaints readers with a range of techniques to help them effectively identify record map analyze and report on patterns in various dimensions of human development HD with spatial scales down to the village level It is impossible to capture HD at the local and global scale with only a single index because differences in HD at the

international scale are caused by general factors whereas local scale differences are influenced by specific factors This book offers a variety of methods for scientifically mapping HD at any spatial scale It covers how to rationally select variables how to test the models how to validate the results and how to analyze them For this purpose it employs a case study on an Indian district The socio economic factors regulating the patterns of HD are now more complex than they were only a few decades ago making it essential to incorporate newer models in order to successfully replicate the real world situation Accordingly the book offers essential methodological tools techniques for mapping HD It sheds new light on a handful of statistical multivariate analysis and machine learning algorithms that are rarely used in the social sciences when dealing with HD yet have sound mathematical and statistical bases These techniques can be successfully used for predictive analysis in the earth natural sciences decision sciences and management disciplines and are equally effective in terms of capturing predicting and projecting the composite HD landscape This book will especially benefit two groups of readers firstly HD practitioners who want to find out why some areas are doing better than others by exploring the complex interactions of spatially linked variables with different HD parameters And secondly practitioners in other branches of the social sciences who are not concerned with HD but are looking for hands on training with techniques they can apply in their respective field of spatial investigations

Proceedings of the 2003 Northeastern Recreation Research Symposium ,2004 Urban-Rural Transformation Geography Yansui Liu,2021-10-25 This book attempts to introduce the theory of system science and engineering technology into the geographic research of urban rural transformation reveals the level structure function of urban rural transformation and promotes the scientific research on urban rural transformation Focusing on the systematic diagnosis of new type urbanization urban rural land use industrial structure transformation and public facilities allocation this book explores the long term mechanism innovative model and scientific way of urban rural land optimal allocation and spatial reconstruction and develops urban rural transformation geography In terms of the contents the book constructs the theory and method system of urban rural transformation geography analyzes the process pattern mechanism and response of urban rural transformation reveals the evolution characteristics types and regional differences of urban rural regional system and finally puts forward the optimal decision making of urban rural transformation This book not only provides references for graduate and researchers in geography regional development urban and rural planning resource science environmental science human earth system science sustainability science and other related fields but also guides the decision making of planners and government officials

Bayesian Modeling of Spatio-Temporal Data with R Sujit Sahu,2022-02-23 Applied sciences both physical and social such as atmospheric biological climate demographic economic ecological environmental oceanic and political routinely gather large volumes of spatial and spatio temporal data in order to make wide ranging inference and prediction Ideally such inferential tasks should be approached through modelling which aids in estimation of uncertainties in all conclusions drawn from such data Unified Bayesian modelling implemented through user

friendly software packages provides a crucial key to unlocking the full power of these methods for solving challenging practical problems Key features of the book Accessible detailed discussion of a majority of all aspects of Bayesian methods and computations with worked examples numerical illustrations and exercises A spatial statistics jargon buster chapter that enables the reader to build up a vocabulary without getting clouded in modeling and technicalities Computation and modeling illustrations are provided with the help of the dedicated R package `bmstdr` allowing the reader to use well known packages and platforms such as `rstan` `INLA` `spBayes` `spTimer` `spTDyn` `CARBayes` `CARBayesST` etc Included are R code notes detailing the algorithms used to produce all the tables and figures with data and code available via an online supplement Two dedicated chapters discuss practical examples of spatio temporal modeling of point referenced and areal unit data Throughout the emphasis has been on validating models by splitting data into test and training sets following on the philosophy of machine learning and data science This book is designed to make spatio temporal modeling and analysis accessible and understandable to a wide audience of students and researchers from mathematicians and statisticians to practitioners in the applied sciences It presents most of the modeling with the help of R commands written in a purposefully developed R package to facilitate spatio temporal modeling It does not compromise on rigour as it presents the underlying theories of Bayesian inference and computation in standalone chapters which would be appeal those interested in the theoretical details By avoiding hard core mathematics and calculus this book aims to be a bridge that removes the statistical knowledge gap from among the applied scientists General Technical Report NE ,1980

This is likewise one of the factors by obtaining the soft documents of this **Models Of Spatial Inequality** by online. You might not require more period to spend to go to the book launch as without difficulty as search for them.
