Models Of Scientific Development And The Case Of Nuclear Magnetic Resonance:

Models of Scientific Development and the Case of Nuclear Magnetic Resonance Henk Zandvoort, 2012-12-06 From the nineteen sixties onwards a branch of philosophy of science has come to development called history oriented philosophy of science This development constitutes a reaction on the then prevailing logical empiricist conception of scientific knowledge The latter was increasingly seen as suffering from insurmountable internal problems like e g the problems with the particular observational theoretical distinction on which it drew In addition the logical empiricists general approach was increasingly criticized for two external shortcomings Firstly the examples of scientific knowledge that the logical empiricists were focusing on were considered as too simplistic to be informative on the nature of real life science Secondly it was felt that the attention of these philosophers of science was restricted to the static aspects of scientific knowledge while neglecting its developmental aspects History oriented philosophy of science has taken up the challenge implicit in the latter two criticisms i e to develop accounts of science that would be more adequate for understanding the development of real life science One of the more successful products of this branch of philosophy of science is Lakatos s theory of scientific development sometimes called the methodology of scientific research programmes This theory conceives science as consisting of so called research programmes developing in time and competing with each other over the issue which one generates the best explanations of the phenomena that they address A Model-Theoretic Realist Interpretation of Science E.B. Ruttkamp, 2013-03-14 In this book Emma Ruttkamp demonstrates the power of the full blown employment of the model theoretic paradigm in the philosophy of science Within this paradigm she gives an account of sciences as process and product She expounds the received statement and the non statement views of science and shows how the model theoretic approach resolves the spurious tension between these views In this endeavour she also engages the views of a number of contemporary philosophers of science with affinity to model theory This text can be read by specialists working in philosophy of science or formal semantics by logicians working on the structure of theories and by students in philosophy of science this text offers a thorough introduction to non statement accounts of sciences as well as a discussion of the traditional statement account of science *Magill's Survey of Science: The Michelson-Morley experiment-Planetary magnetospheres* Frank Northen Magill, 1992 **Scrutinizing Science** A. coverage of the United States and Canada from prehistory to the present Includes information abstracted from over 2 000 journals published worldwide **Bibliographic Index** ,1989 **From Commodification to the Common Good** Hans Radder,2019-08-16 The commodification of science often identified with commercialization or the selling of expertise and research results and the capitalization of knowledge in academia and beyond has been investigated as a threat to the autonomy of science and academic culture and criticized for undermining the social responsibility of modern science In From Commodification to the Common Good Hans Radder revisits the commodification of the sciences from a philosophical perspective to focus instead on a potential alternative the notion of public interest science Scientific knowledge he argues constitutes a common good only if it serves those affected by the issues at stake irrespective of commercial gain Scrutinizing the theory and practices of scientific and technological patenting Radder challenges the legitimacy of commercial monopolies and the private appropriation and exploitation of research results His book invites us to reevaluate established laws and to question doctrines and practices that may impede or even prohibit scientific research and social progress so that we might achieve real and significant transformations in service of the common good Scientific Report Scripps Research Institute,2005 **Current Literature on Science of Science** ,1996 *U.S. Government Research & Development Reports* ,1970
