The Limits Of Social Cohesion Peter L. Berger, 2018-03-05 Normative conflicts center on fundamental disagreements over issues of public morality and the identity of a society In thinking about normative conflicts on a global scale two principal questions arise First are there common characteristics of such conflicts worldwide Second which institutions polarize such conflicts and which can serve to mediate them This pathbreaking book edited by renowned sociologist Peter Berger examines both questions through findings gained from a study of normative conflicts in eleven societies located in different parts of the world and at different levels of economic development On both points the findings have proved surprising Although there are of course normative conflicts peculiar to individual societies two features emerged as common to most of the societies examined one concerns disputes over the place of religion in the state and in public life the other is a clash of values between a cultural elite and the broad masses of the population Often the two features coincide For instance in many countries the elite is the least religious group within the population and therefore resentments against the elite are often mobilized under religious banners On the institutional question the study started out with a bias toward the institutions of so called civil society that is the institutions that stand between the personal life of individuals and the vast mega structures of a modern society The finding is that the same institutions can either polarize or mediate normative conflicts The conclusion suggests one must ask not just what sort of institutions one looks to for social cohesion but what ideas and values inspire these institutions Comprising reports from some of the leading scholars dealing with normative conflict this book is an important contribution to understanding the

cultural fault lines that threaten social cohesion New Conservatives in Russia and East Central Europe Katharina Bluhm, Mihai Varga, 2018-08-14 This book explores the emergence and in Poland Hungary and Russia the coming to power of politicians and political parties rejecting the consensus around market reforms democratization and rule of law that has characterized moves toward an open society from the 1990s It discusses how over the last decade these political actors together with various think tanks intellectual circles and religious actors have increasingly presented themselves as conservatives and outlines how these actors are developing a new local brand of conservatism as a full fledged ideology that counters the perceived liberal overemphasis on individual rights and freedom and differs from the ideology of the established present day conservative parties of Western Europe Overall the book argues that the renaissance of conservatism in these countries represents variations on a new illiberal conservatism that aims to re establish a strong state sovereignty defining and pursuing a national path of development **The Politics of Central Europe** Attila Ágh, 1998-06-10 This book provides a thorough introduction to East Central Europe and its renewed emergence since the momentous changes in the former Soviet bloc By carefully differentiating between Central Europe East Central Europe and the Balkans Attila Ágh shows how the term Eastern Europe was a political misnomer of the Cold War Drawing on theories of democratization to develop a common conceptual and theoretical framework this textbook is the first to place the political and social changes of this complex region in a genuinely comparative perspective Through broad thematic sections the student is shown how to distinguish between processes of democratization and redemocratization transition and transformation and is introduced to the important issues of Europeanization nation building institutionalization parties and political culture Illustrated throughout with chronological charts and the latest data analysis this is an invaluable guide to the emerging political systems and their future prospects at the core of the new Europe Moderates and conservatives in Western Europe, 1982

Reading and Writing for Civic Literacy Donald Lazere, 2015-12-03 This brief edition of a groundbreaking textbook addresses the need for college students to develop critical reading writing and thinking skills for self defense in the contentious arena of American civic rhetoric Designed for first year or more advanced composition and critical thinking courses it is one third shorter than the original edition more affordable for students and easier for teachers to cover in a semester or quarter It incorporates up to date new readings and analysis of controversies like the growing inequality of wealth in America and the debates in the 2008 presidential campaign expressed in opposing viewpoints from the political left and right Exercises help students understand the ideological positions and rhetorical patterns that underlie such opposing views Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media as well as in education itself are foregrounded as topics for rhetorical analysis Religion in an Expanding Europe Timothy A. Byrnes, Peter J. Katzenstein, 2006-03-23 With political controversies raging over issues such as the wearing of headscarves in schools and the mention of Christianity in the European Constitution religious issues are of

growing importance in European politics In this volume Byrnes and Katzenstein analyze the effect that enlargement to countries with different and stronger religious traditions may have on the EU as a whole and in particular on its homogeneity and assumed secular nature Looking through the lens of the transnational religious communities of Catholicism Orthodoxy and Islam they argue that religious factors are stumbling blocks rather than stepping stones toward the further integration of Europe All three religious traditions are advancing notions of European identity and European union that differ substantially from how the European integration process is generally understood by political leaders and scholars This volume makes an important addition to the fields of European politics political sociology and the sociology of religion **1930** Arthur

Haberman, 2018-09-25 The year 1930 can be seen as the dawn of a period of darkness the beginning of a decade that Auden would style low dishonest That year was one of the most reflective moments in modernity After the optimism of the nineteenth century the West had stumbled into war in 1914 It managed to survive a conflagration but it failed in the aftermath to create something valued In 1930 Europe was questioning itself and its own viability Where are we heading a number of public intellectuals asked Who are we and how do we build moral social and political structures Can we continue to believe in the insights and healing quality of our culture Major thinkers Mann Woolf Ortega Freud Brecht Nardal and Huxley as well as a number of artists including Picasso and Magritte and musicians such as Weill sought to grapple with issues that remain central to our lives today the viability of a secular Europe with Enlightenment values coming to terms with a darker view of human nature mass culture and its dangers the rise of the politics of irrationality identity and the other in Western civilization new ways to represent the postwar world the epistemological dilemma in a world of uncertainty and the new Fascism was it a new norm or an aberration Arthur Haberman sees 1930 as a watershed year in the intellectual life of Europe and with this book the first to see the contributions of the public intellectuals of 1930 as a single entity he forces a reconsideration and reinterpretation of the period **The New Right in the New Europe** Seán Hanley, 2007-08-07 This

book considers the emergence of centre right parties in Eastern Europe following the fall of communism focusing primarily on the case of the Czech Republic Although the country with the strongest social democratic traditions in Eastern Europe the Czech Republic also produced the region's strongest and most durable party of the free market right in Vclav Klaus Civic Democratic Party ODS Se n Hanley considers the different varieties of right wing politics that emerged in post communist Europe exploring in particular detail the origins of the Czech neo liberal right tracing its genesis to the reactions of dissidents and technocrats to the collapse of 1960s reform communism He argues that rather than being shaped by distant historical legacies the emergence of centre right parties can best be understood by examining the responses of counter elites outside or marginal to the former communist party state establishment to the collapse of communism and the imperatives of market reform and decommunization This volume goes on to consider the emergence of right wing forces in the disintegrating Civic Forum movement in 1990 the foundation of the ODS the right's period in office under Klaus in 1992-97

and its subsequent divisions and decline It concludes by analyzing the ideology of the Czech Right and its growing euroscepticism

Conservatism, Christian Democracy and the dynamics of transformation Gary Love, Christian Egander Skov, 2025-09-02 Conservatism Christian Democracy and the Dynamics of Transformation compares the centre right political traditions of Britain the Nordic countries France West Germany and Austria and looks for evidence of political cooperation and influence across borders during the period 1945 90

The book explores how a variety of intellectuals, politicians and political parties transformed their politics in response to major economic, social and political challenges and seeks to explain why conservatives and Christian democrats came to feel that they belonged to a wider centre right political family by the end of this period. It also examines why these political traditions found it difficult to cooperate with each other after the Second World War and why they decided to invest more political capital in inter party relations and wider transnational projects from the 1960s. As the book shows, these developments resulted in two new centre right internationals: the European Democrat Union and the International Democrat Union.
