**Modern Architecture in Europe** Dennis J. De Witt, Elizabeth R. De Witt, 1987 *Modern Architecture in Europe* Dennis J. De Witt, Elizabeth R. De Witt, 1987 **The Monumental Era** Franco Borsi, 1987 **A Field Guide to Landmarks of Modern Architecture in Europe** Miriam F. Stimpson, 1985 *Modern Architecture in Europe* Dennis J. De Witt, 1987-10-01 Shows and describes more than five hundred notable examples of architecture in Great Britain Scandinavia and Western Europe *The Architecture of Europe* Doreen Yarwood, 1991-05 The richness and diversity of European architecture over the past two centuries captured in a comprehensive survey with almost 200 illustrations of building types in 23 countries **Shaping the Great City** Eve Blau, Monika Platzer, 1999 The explosion of architectural ideas during the last decades of the Hapsburg Empire and in the first adventurous years of the new republics of Central Europe that followed it is the subject of this stimulating and wide ranging study *Modern Architecture in Europe*, 1929 **The Ambiguous Legacy of Socialist Modernist Architecture in Central and Eastern Europe** Mariusz Sokołowicz, Aleksandra Nowakowska, Błażej Ciarkowski, 2023-04-28 This book examines the unique socialist modernist architecture built in the twentieth century in Central and Eastern Europe as a source of heritage and of existing and potential value for the present and future generations Due to the historical context in which it was created such architecture remains ambiguous On the one hand the wider public associates it with the legacy of the unpleasant period of the real socialist economic regime Yet on the other hand it is also a manifestation of social modernization and the promotion of a significant proportion of the population This book focuses particularly on concrete heritage a legacy of modernist architecture in Central and Eastern Europe and it was this material that enabled their rebuilding after World War II and modernization during the following decades The authors search for the value of modernist architecture and using case studies from Poland Bulgaria Northern Macedonia Lithuania and Slovenia verify to what extent this heritage is embedded in the local socio economic milieu and becomes a basis for creating new values They argue that the challenge is to change the ways we think about heritage from looking at it from the point of view of a single monument to thinking in terms of a place with its own character and identity that builds its relation to history and its embeddedness in the local space Furthermore they propose that the preservation of existing concrete structures and adapting them to modern needs is of great importance for sustainability With increasing awareness of the issue of preserving post war architectural heritage and the strategies of dissonant heritage management this multidisciplinary study will be of interest to architecture historians conservators heritage economists urban planners and architects **The Origins of Modern Architecture in Europe** Robert Jawitz, 2022 *The New Architecture of Europe* George Everard Kidder Smith, 1961 With photographs descriptions and evaluations of 225 of Europe's most famous post war buildings *Modern Architecture of Quito* Christian Parreno, 2024-08-22 Situated at the crossroads of the foreign and the vernacular Quito the capital of Ecuador with its world famous yet understudied built environment stands as a testament to

architectural in betweenness This book interweaves history and theory to explore how near and far influences have shaped its unique character Case studies present diverse and unexpected episodes in the architectural history of this city spanning the intricacies of its topography the design of modernist houses and the appropriation of the motel typology Together they show how fluxes of different origins have created an architecture marked by diversity and interrelation To theoretically frame these investigations this anthology readdresses the notions of the global and the local examining their tension and unavoidable coexistence while introducing the in between as a phenomenon with many variations and embodiments increasingly referenced in architectural thinking This book not only furthers the evolution of these concepts but also demonstrates their value as tools for analyzing the architectures of Latin America and the Global South more broadly With contributions from both international experts and a new generation of Ecuadorian scholars *Modern Architecture of Quito* is an indispensable resource for students and researchers investigating the development of architectural modernism in Latin America

*Modern European Buildings* Francis Rowland Yerbury, 1928      **History of Modern Architecture** Leonardo Benevolo, 1977 A serious and original study of the beginnings and development of modernism in which the pictorial aspects are designed to aid in the communication of the author's closely reasoned formulations Let it be said at once that the format of this work is richly handsome it is a two volume boxed set comprising 844 pages and well over 1 000 high quality illustrations and it reflects throughout its publisher's conviction that good design is an essential not superficial part of bookmaking Beyond that it should be emphasized that this work is not another facile cultural tour of modern architecture It is a serious and original study of the beginnings and development of modernism in which the pictorial aspects are designed to aid in the communication of the author's closely reasoned formulations rather than to gloss over a lack of substantive content The book is a translation of the third Italian edition published in 1966 Benevolo who is on the faculty of architecture in Venice has earned an international reputation as a historian of architecture and town planning and his publications embrace the span of time from the Renaissance to the foreseeable future One such publication *The Origins of Modern Town Planning* The MIT Press 1967 may be read as a prelude to the present work as well as an independent contribution Perhaps more than any other architectural historian in our time Benevolo has made a determined effort to place developments in design and planning in their proper social and political settings Indeed the author argues that the development of the modern movement in architecture was determined not by aesthetic formalisms but largely by the social changes that have occurred since about 1760 After the middle of the eighteenth century without the continuity of formal activity being in any way broken indeed while architectural language seems to be acquiring a particular coherence the relations between architect and society began to change radically New material and spiritual needs new ideas and modes of procedure arise both within and beyond the traditional limits and finally they run together to form a new architectural synthesis that is completely different from the old one In this way it is possible to explain the birth of modern architecture which otherwise would seem completely

incomprehensible This second volume is concerned with the modern movement proper from 1914 to 1966 The author emphasizes the unity of the movement rejecting the usual treatment that allots to the individual architects separate and unconnected biographical accounts Benevolo remarks at one point When one talks about modern architecture one must bear in mind the fact that it implies not only a new range of forms but also a new way of thinking whose consequences have not yet all been calculated His main concern is to provide a more exact calculation of those consequences *Regionalism and Modernity* Leen Meganck,Linda Van Santvoort,Jan De Maeyer,Jan de Meyer,2013 The complex and shifting relation between regionalism and modernity With its search for purity honesty modesty and fitness of purpose the late 19th and early 20th century concept of architectural regionalism is seminal to the modern movement In later historiography however regionalism in Europe was neglected and even labeled backward The origins of this drastic change of perception can be traced to the 1930s when regionalism as a positive form gradually turned into a closed form of regionalism a folding back on one's own region as a defence mechanism in an economically and politically turbulent decade **On European Architecture** Theo van Doesburg,1990 *Modernism and the Professional Architecture Journal* Torsten Schmiedeknecht,Andrew Peckham,2018-06-27 The production of this book stems from two of the editors longstanding research interests the representation of architecture in print media and the complex identity of the second phase of modernism in architecture given the role it played in postwar reconstruction in Europe While the history of postwar reconstruction has been increasingly well covered for most European countries research investigating postwar architectural magazines and journals across Europe their role in the discourse and production of the built environment and particularly their inter relationship and differing conceptions of postwar architecture is relatively undeveloped *Modernism and the Professional Architecture Journal* sounds out this territory in a new collection of essays concerning the second phase of the reception and assimilation of modernism in architecture as it was represented in professional architecture journals during the period of postwar reconstruction 1945-1968 Professional architecture journals are often seen as conduits of established facts and knowledge The role mainstream publications play however in establishing movements trends or debates tends to be undervalued In the context of the complex undertaking of postwar reconstruction the shortage of resources political uncertainty and the biographical complexities of individual architects the chapters on key European architecture journals collected here reveal how modernist architecture and its discourse was perceived and disseminated in different European countries

*Colonialism and Modern Architecture in Germany* Itohan Osayimwese,2017-07-19 Over the course of the nineteenth century drastic social and political changes technological innovations and exposure to non Western cultures affected Germany's built environment in profound ways The economic challenges of Germany's colonial project forced architects designing for the colonies to abandon a centuries long highly ornamental architectural style in favor of structural technologies and building materials that catered to the local contexts of its remote colonies such as prefabricated systems As

German architects gathered information about the regions under their influence in Africa Asia and the Pacific during expeditions at international exhibitions and from colonial entrepreneurs and officials they published their findings in books and articles and organized lectures and exhibits that stimulated progressive architectural thinking and shaped the emerging modern language of architecture within Germany itself Offering in depth interpretations across the fields of architectural history and postcolonial studies Itohan Osayimwese considers the effects of colonialism travel and globalization on the development of modern architecture in Germany from the 1850s until the 1930s Since architectural developments in nineteenth century Germany are typically understood as crucial to the evolution of architecture worldwide in the twentieth century this book globalizes the history of modern architecture at its founding moment **Southern Vietnamese**

**Modernist Architecture** Mel Schenck,2020-04-21 Southern Vietnamese Modernist Architecture features beautiful architectural photography that illustrates the outstanding accomplishment of the people of southern Vietnam in developing a mid century modernist architecture that is extraordinary in the world Especially for Americans Vietnam has been a war instead of a country The world didn t notice that the Vietnamese were simultaneously constructing modern apartment buildings houses large public buildings and public housing as they developed a new nation And the world didn t anticipate that this architecture would be so overtly modernist rather than an adaption of traditional Vietnamese designs to the continuation of colonial architecture In the mid twentieth century southern Vietnamese architects developed a version of modernist architecture that accommodated the tropical climate and reflected the identity of a newly independent culture It demonstrates the innate sense of design of Vietnamese and it represented the outlook of the people of southern Vietnam as they looked towards the future even in the face of war The vast quantity and quality of Vietnamese modernist buildings constructed throughout southern Vietnam made Vietnam an unrecognized center of modernism in the world Most importantly the southern Vietnamese as a culture embraced modernism and it became the vernacular architecture of the culture for dwellings This architecture features an interplay between masses and voids that provides a much more vibrant version of modernist architecture This style fills the gaps between the functionalism of the International Style and the quest for identity and spirit that has been lacking in modernism worldwide American architect Mel Schenck is a long term immigrant to Vietnam and has been studying this architecture since he was surprised by the extent and quality of modernist architecture in Saigon when he first lived there in 1971 72 He and photographer Alexandre Garel accumulated a database of 400 buildings and 4 000 photographs in southern Vietnam to serve a comprehensive analysis of the history and characteristics of this distinctive architecture Architectural historians aficionados of modernist architecture and anyone interested in Vietnamese culture will find that this book is a positive story about Vietnamese aspirations for independence and the value of modernist architecture in living in the world today Race and Modern Architecture Irene Cheng,Charles L. Davis II,Mabel O. Wilson,2020-05-26 Although race a concept of human difference that establishes hierarchies of power

and domination has played a critical role in the development of modern architectural discourse and practice since the Enlightenment its influence on the discipline remains largely underexplored This volume offers a welcome and long awaited intervention for the field by shining a spotlight on constructions of race and their impact on architecture and theory in Europe and North America and across various global contexts since the eighteenth century Challenging us to write race back into architectural history contributors confront how racial thinking has intimately shaped some of the key concepts of modern architecture and culture over time including freedom revolution character national and indigenous style progress hybridity climate representation and radicalism By analyzing how architecture has intersected with histories of slavery colonialism and inequality from eighteenth century neoclassical governmental buildings to present day housing projects for immigrants *Race and Modern Architecture* challenges complicates and revises the standard association of modern architecture with a universal project of emancipation and progress
