Modern China, 1840-1972 Andrew Nathan, 2020-06-01 Graduate students have traditionally learned a good part of what they know about sources and research aids on modern China through hearsay and serendipity in unsystematic and unreliable bits and pieces The field has now developed to the point where this need not and ought not to be so It is now possible for beginning researchers to start with some shared basic knowledge of research aids and documentary resources This research guide is meant to provide that knowledge The user of this guide is envisaged as an American graduate student in history or the social sciences who is already familiar with the major English language secondary literature on modern China and is about to begin original research either for a seminar paper or for a dissertation China Bibliography Harriet T. Zurndorfer, 2021-12-06 This volume serves as a guide to all facets of China study from advice on choosing an appropriate literary dictionary to finding the most recent yearbooks that offer statistical data about the contemporary economy China Bibliography does not restrict itself to one particular discipline but considers the development of Chinese civilization as a whole from its imperial beginnings to the present and therefore demonstrates how one would find information about Chinese history literature religion linguistics collectanea as well as present day PRC economic and political policies Because this book also explains how bibliographical data on China has accumulated over the last 300 years including within China itself it also may help the reader understand the significance of a particular type of reference work State and Economy in Republican China William C. for Chinese women's history. It is an attempt to explore overt and covert information on Chinese women in a vast quantity of textual and nontextual conventional and unconventional source materials. Chinese History Endymion Porter Wilkinson, 2000. Endymion Wilkinson's bestselling manual of Chinese history has long been an indispensable guide to all those interested in the civilization and history of China. In this latest edition, now in a bigger format, its scope has been dramatically enlarged by the addition of one million words of new text. Twelve years in the making, the new manual introduces students to different types of transmitted, excavated, and artifactual sources from prehistory to the twentieth century. It also examines the context in which the sources were produced, preserved, and received; the problems of research and interpretation associated with them; and the best, most up-to-date secondary works. Because the writing of history has always played a central role in Chinese politics and culture, special attention is devoted to the strengths and weaknesses of Chinese historiography.

Considered an extremely important turning point in modern Chinese history, the Civil War is also of great international significance. This resource, the first of its kind written in English, details the microscopic and macroscopic views of the Chinese Civil War: people, events, places, and institutions.

Career Patterns in the Ch'ing Dynasty Raymond Chu, William Saywell, 2020-08-06. The office of governor general (tsung-tu) was the highest provincial post throughout the Ch'ing dynasty. As such, it was a vital link in the control of a vast empire by a very small and alien ruling elite. This is primarily a biographical and statistical analysis of the incumbents of that office. By analyzing the biographical data of those who held the position of governor general, much may be learned about the nature of the office itself. However, the main objective of the study is to provide information on career patterns—that is, the variety of different posts held from the first

official appointment to that of governor general of an important cross section of successful Chinese bureaucrats By plotting and analyzing the different patterns their official careers took we should be able to determine what kind of men reached the top of China's provincial and national administration during the final centuries of China's imperial history the qualifications that were required the factors which prompted rapid promotion or sudden disgrace We should also be able to determine the extent to which these and other factors varied markedly among Manchu Mongol Chinese Bannerman and Han incumbents and whether changes throughout the dynasty can be detected in policies concerning the office or in the career patterns of its personnel If such detection is possible this study may lend support to the view that late imperial China was not static but a society undergoing significant changes xi
