Modern Concepts Of Acute And Chronic Hepatitis:

Modern Concepts of Acute and Chronic Hepatitis G. Gitnick, 2012-12-06 The literature of medicine continues to expand at a remarkable pace The number of papers and monographs published has increased dramatically in the past five years Nowhere has this increase been as dramatic as in the field of acute and chronic hepatitis Why then should there be still another book Despite the sheer volume of words published it is still difficult to find in anyone volume a compilation of all of the most significant work Most mono graphs have considered either chronic or acute hepatitis not both Few works have addressed both the clinician and the basic scientist This book addresses both of these audiences and considers both of these diseases It was designed to provide an authoritative but concise assessment of our changing concepts of acute and chronic hepatitis It covers what is currently known and based on the most convincing research believed about these diseases To fulfill this ambitious goal only authors with international reputations in their fields of expertise were invited to contribute In the evolution of our current thoughts on the pathogenesis and manage ment of acute and chronic hepatitis our ideas have changed several times This book presents the facts as they are known today and in areas where all the facts are not established presents the well founded opinions of those considered to be authorities The authors present established and usually confirmed data and do not deal extensively with areas of speculation or unconfirmed material

Modern Concepts of Acute and Chronic Hepatitis G. Gitnick, 1989-01-31 *Modern Concepts in Gastroenterology* Eldon Shaffer, Alan B.R. Thomson, 2013-11-09 Once again the gastroenterologists of northwestern Canada have come out with a series of essays advancing important modern concepts As indefatigable as ever they bring together the latest in clinical pathophysiological considerations for the clinician The topics run the gamut from the lovely liver to HIV infection from the pathophysiology of bile flow to comments on antigens in colorectal cancer It is always easy to publish a first volume for enthusiasm is high and everyone is anxious to win a place Bringing out a second volume the carrying forward of a good idea is so much harder In many ways this second volume in the series marks the coming of age of Canadian gastroenterology as 11 of the 21 contributors currently reside in Canada Still the contributions from the United Kingdom and the United States make this an Anglo American festival Reading the chapters will make you appreciate the care with which the contributors have garnered recent references to give up to date practical information for us all I enjoyed all that I read My congratulations to Drs Shaffer and Thomson for a job well done Howard M Spiro M D New Haven Connecticut ix Preface This book is based on papers presented at the third symposium on Recent Advances in Gastroenterology held by the Canadian Association of Gastroenterology The proposed audience for this volume is the internist and the general surgeon as well as those in the specialties of gastroenterology and hepatology
