An Idea of the Drama Bert Cardullo, 2011 This is a collection of ten long essays arranged around the primordial subject of realism and non realism or anti realism in the drama as this subject manifests itself in modern Europe and contemporary America from Ibsen to Shaw to the symbolists expressionists surrealists dadaists futurists and absurdists This book treats not only the issue of realism versus anti realism in theater from a practical as well

as a theoretical point of view It also treats at least two subjects related to this issue the superficial or bourgeois realism that has long crippled the theater versus the critical and sometimes poetic realism that liberates it and the avant garde the rearguard and the middle to advanced artistic ground in between claimed by Bertolt Brecht and Harold Pinter Special attention is paid moreover to the first thoroughgoing American avant garde dramatist Gertrude Stein In sum this book treats the subject of realism and non realism from the point of view of the theater s ability to create not only the illusion of reality onstage but also the reality of illusion Publisher s description back cover

Theatre and Evolution from Ibsen to Beckett Kirsten E. Shepherd-Barr, 2015-03-03 Evolutionary theory made its stage debut as early as the 1840s reflecting a scientific advancement that was fast changing the world Tracing this development in dozens of mainstream European and American plays as well as in circus vaudeville pantomime and missing link performances Theatre and Evolution from Ibsen to Beckett reveals the deep transformative entanglement among science art and culture in modern times The stage proved to be no mere handmaiden to evolutionary science though often resisting and altering the ideas at its core Many dramatists cast suspicion on the arguments of evolutionary theory and rejected its claims even as they entertained its thrilling possibilities Engaging directly with the relation of science and culture this book considers the influence of not only Darwin but also Lamarck Chambers Spencer Wallace Haeckel de Vries and other evolutionists on 150 years of theater It shares significant new insights into the work of Ibsen Shaw Wilder and Beckett and writes female playwrights such as Susan Glaspell and Elizabeth Baker into the theatrical record unpacking their dramatic explorations of biological determinism gender essentialism the maternal instinct and the cult of motherhood It is likely that more people encountered evolution at the theater than through any other art form in the late nineteenth and early twentieth centuries Considering the liveliness and immediacy of the theater and its reliance on a diverse community of spectators and the power that entails this book is a key text for grasping the extent of the public s adaptation to the new theory and the legacy of its representation on the perceived legitimacy or illegitimacy of scientific work
