Modern Health Textbook Critical Study:

Contemporary Health Studies Louise Warwick-Booth, Ruth Cross, Diane Lowcock, 2021-04-20 Contemporary Health Studies provides an accessible introduction to current issues and key debates in understanding and promoting health. Its up-to-date global focus places a strong emphasis on the social, political, and environmental dimensions of health. Part One sets the scene by looking closely at the definition of health and outlining the aims and purpose of health studies. Part Two explores the different disciplines that underpin health studies, such as sociology, psychology, anthropology, and health psychology, incorporating new theoretical frameworks to help readers understand health. Part Three applies this knowledge to address the determinants of health, including chapters on individual factors, the role of public health, the latest policy influences on health, and the growing importance of the global context. Each chapter contains contemporary statistics and evidence alongside carefully developed learning features designed to highlight the fundamentals of each topic, to apply these in depth case studies from global antibiotic resistance to the challenge and promise of digital data, and to pose questions for reflection and debate. Contemporary Health Studies is an essential guide for undergraduate health students, written by three authors who have a wealth of teaching experience in this subject area. Their book will inspire readers to consider the human experience of health within contemporary global society as it is mediated by individual, societal, and global contexts.

Health Policy Iain Crinson, 2008-12-12 This textbook provides a critical assessment of developments in health and healthcare policy within the UK and Europe. Each chapter integrates conceptual themes drawn from the fields of sociology and political science to offer a unique combination of theory, historical detail, and wider social commentary. The book is divided into four sections. Section One establishes a theoretical basis for the analysis of contemporary health policy. Section Two examines the key constituents of health care systems, which includes a comparative analysis of EU member states. Section Three focuses on contemporary health care policy and provision in the UK. Section Four assesses the increasingly limited ability of national governments to reduce threats to the health of their populations. Written in an accessible style, the student-friendly approach highlights key concepts and includes introductions, summaries, and examples of further reading. Each chapter also includes case studies and activities which encourage the reader to think about the planning, implementation, and assessment of specific healthcare policies. This is a timely and authoritative textbook that covers a key topic of the curriculum while also contributing to topical debates. The book will be essential reading for healthcare and social science students taking modules in health policy and will also be of interest to policy makers and practitioners in the field of healthcare.
