book also examines the origins of the economic crisis of the late 1990s in Indonesia and the actions taken to address the crisis during those difficult years. The authors were directly involved in many of the events recounted in this book, particularly Ginandjar Kartasasmita through his career in the Indonesian government under various ministerial positions. Thus the book provides insights that could only come from those directly involved in the decision making. It also explains the transitions that occurred in Indonesia in the context of academic theories of democratic transition and consolidation, thereby adding to the body of knowledge in this area. The Indonesian story holds lessons therefore for the management of financial crisis and for the urgency of reform and development of economic and political institutions. Cultural Dynamics in a Globalized World

Melani Budianta, Manneke Budiman, Abidin Kusno, Mikihiro Moriyama, 2017-12-14. The book contains essays on current issues in arts and humanities in which peoples and cultures compete as well as collaborate in globalizing the world while maintaining their uniqueness as viewed from cross and interdisciplinary perspectives. The book covers areas such as literature, cultural studies, archaeology, philosophy, history, language studies, information and literacy studies, and area studies. Asia and the Pacific are the particular regions that the conference focuses on as they have become new centers of knowledge production in arts and humanities and in the future seem to be able to grow significantly as a major contributor of culture, science, and arts to the globalized world. The book will help shed light on what arts and humanities scholars in Asia and the Pacific have done in terms of research and knowledge development as well as the new frontiers of research that have been explored and opening up which can connect the two regions with the rest of the globe. **Modern Crises and**

**Traditional Strategies** Roy Ellen, 2007-07-01. The 1990s have seen a growing interest in the role of local ecological knowledge in the context of sustainable development and particularly in providing a set of responses to which populations may resort in times of political, economic, and environmental instability. The period 1996-2003 in island southeast Asia represents a critical test case for understanding how this might work. The key issues explored in this book are the creation, erosion, and transmission of ecological knowledge and hybridization between traditional and scientifically based knowledge amongst populations facing environmental stress, e.g. 1997 El Niño, political conflict, and economic hazards. The book will also evaluate positive examples of how traditional knowledge has enabled local populations to cope with these kinds of insecurity.
