As the twentieth century opened American intellectuals grew increasingly sympathetic to Pragmatism and empirical methods in the social sciences The Progressive program as a whole in the form of Pragmatism education modern sociology and nationalism seemed to be in agreement on one thing everything was in flux The dogma and absolute truth of the Church were archaisms unsuited to modern American citizenship and at odds with the new public philosophy being forged by such intellectuals as John Dewey William James and the New Republic magazine Catholics saw this new public philosophy as at least partly an attack on them Focusing on the Catholic intellectual critique of modernity during the period immediately before and after the turn of the twentieth century this provocative and original book examines how the Catholic Church attempted to retain its identity in an age of pluralism It shows a Church fundamentally united on major issues quite unlike the present day Catholic Church which has been the site of a low intensity civil war since the close of the Second Vatican Council in 1965 Defenders of the faith opposed James Dewey and other representatives of Pragmatism as it played out in ethics education and nationalism Their goals were to found an economic and political philosophy based on natural law to appropriate what good they could find in Progressivism to the benefit of the Church and to make America a Catholic country The Church Confronts Modernity explores how the decidedly nonpluralistic institution of Christianity responded to an increasingly pluralistic intellectual environment In a culture whose chief value was pluralism they insisted on the uniqueness of the Church and the need for making value judgments based on what they considered a sound philosophy of humanity In neither capitulating to the new creed nor retreating into a self righteous isolation American Catholic intellectuals thus laid the groundwork for a half century of intellectual vitality Classical Approaches to the Study of Religion Jacques

Waardenburg,2017-01-23 Waardenburg s magisterial essay traces the rise and development of the academic study of religion from the mid nineteenth to the mid twentieth century outlining the establishment of the discipline its connections with other fields religion as a subject of research and perspectives on a phenomenological study of religion Futhermore a second part comprises an anthology of texts from 41 scholars whose work was programmatic in the evolution of the academic study of

religion Each chapter presents a particular approach theory and method relevant to the study of religion The pieces selected for this volume were taken from the discipline of religious studies as well as from related fields such as anthropology sociology and psychology to name a few *A Layman's Guide to Protestant Theology* William Hordern,2002-03-28 The events of the twentieth century have led to a rebirth of Protestant theology This book is intended to help the layperson discover what is going on in theology In clear nontechnical language it traces the rise of orthodoxy since the sixteenth century and proceeds to examine schools such as fundamentalism liberalism and neo orthodoxy Because of their great influence and importance the theologies of Karl Barth Reinhold Niebuhr and Paul Tillich are treated separately and this revised and expanded edition contains new chapters on Rudolf Bultmann Dietrich Bonhoeffer and the God is Dead controversy *The Scientific Monthly* James McKeen Cattell,1917
