Briggs, 1956 *Agrobiodiversity - a training manual for farmer groups in East Africa* Food and Agriculture Organization of the United Nations, 2018-06-26 Farmers play a crucial role in the preservation and sustainable use of agrobiodiversity In fact the diversity of species that support our current agricultural production systems has been carefully managed and shaped by farming communities over the course of the history of humankind Farmers act as custodian of the Earth s agrobiodiversity resources and play a big part in preserving traditional plant and animal varieties and the knowledge associated with these FAO has long been working on promoting approaches to agriculture that enable both the sustainable use of biodiversity resources for food and agriculture and their conservation and on supporting farmers to make informed decisions on their farm management and production practices This training manual fits in this broader commitment to support a shift towards a paradigm of agricultural production that can sustain food and nutrition security while at the same time cause the least harm to natural ecosystems The manual is intended as an introduction to agricultural biodiversity and to its relevance to different aspects of agricultural production and management for smallholder farmers in Kenya It includes eight different training modules each covering a specific aspect related to agrobiodiversity The modules are standalone and can be used independently one from the other depending on the user s or project s aim The materials were originally prepared within the FAO Netherlands Partnership Programme FNPP and have been updated revised and published under the second phase of the European Union funded project Capacity building related to multilateral environmental agreements MEAs in Africa Caribbean and Pacific ACP countries Mason's World Encyclopedia of Livestock Breeds and Breeding, 2 Volume Pack Valerie Porter, Lawrence Alderson, Stephen J.G.
