Samson, John I. Pitt, 2013-11-11 In our view the First International Penicillium and Aspergillus Workshop held in Baarn and Amsterdam in May 1985 was a great success The assembly in one place of so many specialists in these two genera produced both interesting viewpoints and lively discussions But more particularly a remarkable cohesion of ideas emerged borne primarily of the realisation that taxonomy has passed from the hands of the solitary morphologist The future of taxonomy lay in collaborative and multidisciplinary studies embracing morphology physiology and newer methodologies Penicillium and Aspergillus Workshop was borne logically The Second International from the first and was held in Baarn on May 8 12 1989 It was attended by 38 scientists from 16 countries At this Workshop we have attempted to move further into new methods especially by bringing together molecular biologists

medical and food mycologists and biochemists as well as more traditional taxonomists We feel that the meeting contributed greatly to dialogue between taxonomists and also fundamental and applied mycologists At the meeting we became aware that the approach to taxonomy of these genera is now becoming more pragmatic with an increasing emphasis on consensus and on stability of names This is a noteworthy development which we as editors welcome So many species in *Penicillium* and *Aspergillus* are economically important in biotechnology foods and medicine and practical stable taxonomy is of vital importance These Proceedings comprise 40 papers divided into 9 chapters

The Concept of Nature in Early Modern English Literature Peter Remien, 2019-02-14 The Concept of Nature in Early Modern English Literature traces a genealogy of ecology in seventeenth century literature and natural philosophy through the development of the protoecological concept of the oeconomy of nature Founded in 1644 by Kenelm Digby this concept was subsequently employed by a number of theologians physicians and natural philosophers to conceptualize nature as an interdependent system Focusing on the middle decades of the seventeenth century Peter Remien examines how Samuel Gott Walter Charleton Robert Boyle Samuel Collins and Thomas Burnet formed the oeconomy of nature Remien also shows how literary authors Ben Jonson George Herbert Andrew Marvell Margaret Cavendish and John Milton use the discourse of oeconomy to explore the contours of humankind's relationship with the natural world This book participates in an intellectual history of the science of ecology while prompting a re evaluation of how we understand the relationship between literature and ecology in the early modern period

The Power of the West in the Economy of Grace Eskil Jonsson, 2013-06-27 The overall problem raised in this book is that the Western culture of modern rationality power and economics departs from a rather narrow secular and ego centric worldview Therefore it does not recognize the identity of traditional cultures and religions nor social economic or ecological justice in relation to the rest of the world Western religion has over history often played a legitimating role for political power and the expansion of institutional structures and has therefore lost much of its prophetic identity to be signs of peace justice and unity The ecumenical and integrative model of stewardship as an economy of grace with a deeper ecological philosophy does however offer new visions for a multicultural and multireligious economy This book is intended for leaders students and scholars interested in interdisciplinary studies of politics religion economics and ecology This will also be of interest to students and researchers in peace studies or conflict management as well as to leaders who are engaged in the building of peace and justice

Schools for Health and Sustainability Venka Simovska, Patricia Mannix McNamara, 2014-10-03 Schools are unique places They play a central role in the formation of young people The importance of how young people are educated and how they are encouraged to live and learn cannot be underestimated This book advocates for the fostering of agency not only amongst school personnel but also amongst younger generations for health and sustainability It provides the reader with a new lens with which to discover health promoting schools and education for sustainable development It invites the reader to look more deeply into both and to accompany the authors on a journey of discovery of the real potential for

each to enhance the practice of schooling **Nature and Literary Studies** Peter Remien, Scott Slovic, 2022-08-04 Nature and Literary Studies supplies a broad and accessible overview of one of the most important and contested keywords in modern literary studies Drawing together the work of leading scholars of a variety of critical approaches historical periods and cultural traditions the book examines nature s philosophical theological and scientific origins in literature as well as how literary representations of this concept evolved in response to colonialism industrialization and new forms of scientific knowledge Surveying nature s diverse applications in twenty first century literary studies and critical theory the volume seeks to reconcile nature s ideological baggage with its fundamental role in fostering appreciation of nonhuman being and agency Including chapters on wilderness pastoral gender studies critical race theory and digital literature the book is a key resource for students and professors seeking to understand nature s role in the environmental humanities

Understanding Contemporary Society Gary Browning, Abigail Halcli, Frank Webster, 2000-02-11 Understanding Contemporary Society Theories of the Present is a comprehensive textbook to guide students through the complexities of social theory today Over 30 chapters written by an international team of contributors demonstrate clearly the practical applications of social theory in making sense of the modern world Students are both introduced to the most significant theories and guided through the major social developments which shape our lives Key features of the book are clearly structured and readable prose bullet pointed summaries and annotated further reading for each topic makes complex issues accessible to undergraduates focuses on relevance and practicality chapter lay out which is ideal for t **Pattern and Process in Macroecology** Kevin Gaston, Tim Blackburn, 2008-04-15 Issues of scale have become increasingly important to ecologists This book addresses the structure of regional large scale ecological assemblages or communities and the influence this has at a local small scale level This macroecological perspective is essential for the broader study of ecology because the structure and function of local communities cannot be properly understood without reference to the region in which they are situated The book reviews and synthesizes the issues of current importance in macroecology providing a balanced summary of the field that will be useful for biologists at advanced undergraduate level and above These general issues are illustrated by frequent reference to specific well studied local and regional assemblages an approach that serves to relate the macroecological perspective which is perhaps often difficult to comprehend to the everyday experience of local sites Macroecology is an expanding and dynamic discipline The broad aim of the book is to promote an understanding of why it is such an important part of the wider program of research into ecology Summarises the current macroecological literature Provides numerous examples of key patterns Explicitly links local and regional scale processes Exploits detailed knowledge of one species assemblage to explore broad issues in the structuring of biodiversity Agroecology V. Ernesto Mendez, Christopher M. Bacon, Roseann Cohen, Stephen R. Gliessman, 2015-11-18 Agroecology A Transdisciplinary Participatory and Action oriented Approach is the first book to focus on agroecology as a transdisciplinary participatory and

action oriented process Using a combined theoretical and practical approach this collection of work from pioneers in the subject along with the latest generation of acknowledged leaders **Current Catalog** National Library of Medicine (U.S.),1979 First multi year cumulation covers six years 1965 70 *Rationality and the Environment* Bo Elling,2012-05-04

Environmental assessment and management involve the production of scientific knowledge and its use in decision making processes The result is that within these essentially rational political assessment frameworks experts are creating and applying scientific knowledge for decision and management purposes that actually have strong ethical and aesthetic dimensions Yet these rational political frameworks lack the tools to provide guidance on ethical and aesthetic issues that affect the wider public This revolutionary work argues that ethical and aesthetic dimensions can only be brought into environmental politics and policies by citizens actively taking a stand on the specific matters in question The author draws on Habermas trisection of rationality as cognitive instrumental moral practical and aesthetic expressive to suggest that truly effective environmental policy needs to activate all three approaches and not favour only the rational To achieve this objective the author argues that public participation in environmental policy and assessment is necessary to counteract the dictatorship of technical and economic instrumentality in environmental policy the failure to take ethical and aesthetic rationalities into account and more importantly how such policy is applied on the ground to shape our natural and material world Environmental History of India Mr. Rohit Manglik,2024-02-06 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels **Benthic Foraminifera of the Gulf of Mexico** C. Wylie Poag,2015-03-15 In 1981 Woods Hole researcher C Wylie Poag published the book Ecological Atlas of the Benthic Foraminifera of the Gulf of Mexico In this new volume Poag has revised and updated the atlas incorporating three decades of extensive data collections from the open Gulf and from an additional seventeen estuarine systems to cover species of benthic foraminifera from more than eight thousand sample stations Benthic Foraminifera of the Gulf of Mexico features 68 plates of scanning electron photomicrographs 64 color figures and a large color foldout map indicating species distribution of forams This book is designed to aid students and teachers of geology biology oceanography and ecology as well as micropaleontologists in government and industry laboratories and other researchers and consultants who have an interest in benthic ecology or paleoecology UGC NET Geography (Paper-II) Study Notes (Vol.-1) , **The Routledge Handbook of Financial Geography** Janelle Knox-Hayes,Dariusz Wójcik,2020-12-14 This handbook is a comprehensive and up to date work of reference that offers a survey of the state of financial geography With Brexit a global recession triggered by the COVID 19 pandemic as well as new financial technology threatening and promising to revolutionize finance the map of the financial world is in a state of transformation with major implications for development With these developments in the background this

handbook builds on this unprecedented momentum and responds to these epochal challenges offering a comprehensive guide to financial geography. Financial geography is concerned with the study of money and finance in space and time and their impacts on economy, society and nature. The book consists of 29 chapters organized in six sections: theoretical perspectives on financial geography, financial assets and markets, investors, intermediation, regulation and governance, and finance development and the environment. Each chapter provides a balanced overview of current knowledge, identifying issues and discussing relevant debates. Written in an analytical and engaging style by authors based on six continents from a wide range of disciplines, the work also offers reflections on where the research agenda is likely to advance in the future. The book's key audience will primarily be students and researchers in geography, urban studies, global studies and planning, more or less familiar with financial geography who seek access to a state-of-the-art survey of this area. It will also be useful for students and researchers in other disciplines such as finance and economics, history, sociology, anthropology, politics, business studies, environmental studies and other social sciences who seek convenient access to financial geography as a new and relatively unfamiliar area. Finally, it will be a valuable resource for practitioners in the public and private sector, including business consultants and policy makers who look for alternative approaches to understanding money and finance.

Ecocultural Ethics Rayson K. Alex, S. Susan Deborah, Reena Cheruvalath, Gyan Prakash, 2017-10-18. The book offers twelve cases of ethics relating to ecology and culture. The twelve cases presented in the twelve essays are written by eminent scholars from India, USA, Canada and Egypt. Employing various ecocritical frameworks, the writers have tried to understand, analyse literary, cinematic and other cultural texts and contexts. The volume argues that the principles of ethics are as dynamic as culture and nature. Any ecological perspectives, issues, conditions cannot be separated from their cultural contexts and thus need a culture-specific scrutiny to understand the ethics of ecoculture.
