The verb and the particles, 1926** Hendrik Poutsma,1914 **Descriptive Adequacy of Early Modern English Grammars** Ute Dons,2012-04-17 The book deals with the development of descriptive models of English grammar writing during the Early Modern English period For the first time morphology and syntax as presented in Early Modern English grammars are systematically investigated as a whole The statements of the contemporary grammarians are compared to hypotheses made in modern descriptions of Early Modern English and where necessary checked against the Early Modern English part of the Helsinki Corpus Thus a comprehensive overview of the characteristic features of Early Modern English is complemented by conclusions about the descriptive adequacy of Early Modern English grammars It becomes evident that comments by contemporary authors occasionally reflect the corpus data more adequately than the statements found in modern secondary literature This book is useful for advanced university students as well as for scholars of English and grammarians in general Introduction to Old English Peter S. Preface to Gregory's Pastoral Care **English Historical Syntax and Morphology** Teresa Fanego, Javier Pérez-Guerra, María José López-Couso, 2002-07-18 This volume offers a selection of papers from the Eleventh International Conference on English Historical Linguistics held at the University of Santiago de Compostela. From the rich programme over 130 papers were given during the conference; the present twelve papers were carefully selected to reflect the state of current research in the fields of English historical syntax and morphology. Some of the issues discussed are the emergence of viewpoint adverbials in English and German changes in noun phrase structure from 1650 to the present, the development of the progressive in Scots, the passivization of composite predicates, the loss of V2 and its effects on the information structure of English, the acquisition of modal syntax and semantics by the English verb WANT or the use of temporal adverbs as attributive adjectives in the Early Modern period. Many of the articles tackle questions of change through the use of methodological tools like computerized corpora. The theoretical frameworks adopted include among others grammaticalization theory, Dik's model of functional grammar, construction grammar and Government Binding Theory. **An Introduction to Early Modern English** Terttu Nevalainen, 2006 Terttu Nevalainen helps students to place the language of the period 1500-1700 in its historical context whilst showing its regional and social variations. He focuses on the structure of the general dialect and its spelling, vocabulary, grammar and pronunciation as well as its dialectal origins. The present book is an adaptation of a manual prepared by the same author in India where English is studied with extraordinary keenness in an attempt to find the best means of teaching it. It is best to assume that the average student does not know very much to start with and that every student must be well versed in the principles of modern English before he can be qualified to begin the much more difficult task of tracing these to their sources. From the preface. Cleft and Pseudo-Cleft Constructions in English Peter C. Collins, 2015-07-03 First published in 1991, this book examines the communicative properties of cleft and pseudo cleft constructions in contemporary English. The book argues that these properties cannot be ignored in any attempt to provide an adequate grammatical description of the constructions.

Furthermore they provide a source of explanations for the patterns of stylistic variation displayed by clefts and pseudo clefts The book reports findings from a corpus based study of clefts and pseudo clefts in modern British English
