Catalog United States Armed Forces Institute, 1971 **The Oxford Handbook of Modern Diplomacy** Andrew F. Cooper, Jorge Heine, Ramesh Thakur, 2013-03-28 At a time when diplomatic practices and the demands imposed on diplomats are changing quite radically and many foreign ministries feel they are being left behind there is a need to understand the various forces that are affecting the profession Diplomacy remains a salient activity in today's world in which the basic authoritative actor is still the state At the same time in some respects the practice of diplomacy is undergoing significant even radical changes to the context tools actors and domain of the trade These changes spring from the changing nature of the state the changing nature of the world order and the interplay between them One way of describing this is to say that we are seeing increased interaction between two forms of diplomacy club diplomacy and network diplomacy The former is based on a small number of players a highly hierarchical structure based largely on written communication and on low transparency the latter is based on a much larger number of players particularly of civil society a flatter structure a more significant oral component and greater transparency The Oxford Handbook of Modern Diplomacy is an authoritative reference tool for those studying and practicing modern diplomacy It provides an up to date compendium of the latest developments in the field Written by practitioners and scholars the Handbook describes the elements of constancy and continuity and the changes that are affecting diplomacy The Handbook goes further and gives insight to where the profession is headed in the future Co edited by three distinguished academics and former practitioners the Handbook provides

comprehensive analysis and description of the state of diplomacy in the 21st Century and is an essential resource for diplomats practitioners and academics

(In)visible European Government Maarten Hillebrandt, Päivi Leino-Sandberg, Ida Koivisto, 2023-12-22 This book questions the theoretical premises and practical applications of transparency showing both the promises and perils of transparency in a methodologically innovative way and in a cross section of policy instruments It scrutinizes transparency from three perspectives methodologically theoretically and empirically both in the specific context of the EU but also in the wider context of modern society in which transparency is embraced as an almost unquestionable virtue This book examines the ways in which transparency practices can make institutions visible and stands out for its methodological self reflection to fully understand the irresistible call for transparency in our governing institutions we must reflect on our own relationship with it This book will be of key interest to scholars and students of transparency studies democratic legitimacy global governance governance law EU studies and law and public policy more widely

What Is History? Michael Oakeshott, 2011-10-25 This highly readable new collection of thirty pieces by Michael Oakeshott almost all of which are previously unpublished covers every decade of his intellectual career and adds significantly to his contributions to the philosophy of historical understanding and political philosophy as well as to the philosophy of education and aesthetics The essays were intended mostly for lectures or seminars and are consequently in an informal style that will be accessible to new readers as well as to those already well acquainted with Oakeshott's works Early pieces include a long essay On the Relations of Philosophy Poetry and Reality and Oakeshott's comments on The Cambridge School of Political Science through which he himself had passed as an undergraduate The collection also reproduces a substantial wartime essay On Peace with Germany There are two new essays on the philosophy of education and the essay which gives the work its title What is History is just one of over half a dozen discussions of the nature of historical knowledge Oakeshott's later sceptical hermeneutic thought is also well represented by pieces such as What is Political Theory and The Emergence of the History of Thought Reviews of books by English and European contemporaries such as Butterfield Hayek Voegelin and Arendt also help to place him in context more clearly than before The book will be indispensable for all Oakeshott's readers no matter which area of his thought concerns them most

The EU's Government of Industries Bernard Jullien, Andy Smith, 2014-08-13 To what extent is business activity governed at a European scale Since the advent of the recent economic crisis the EU's choices about the euro debt ratios and interest rates have caught the headlines and highlighted the importance of EU

decision making arenas However these macro economic events actually tell us only part of the story about the extent to which business activity is now governed at a European scale Based upon original research on four manufactured or processed goods industries cars wine pharmaceuticals and aquaculture and driven by theory that is constructivist institutionalist and sociological this book sets out to analyse just what Europe governs by whom and why In doing so it reveals three recurrent features of the European government of industries its omnipresence its incompleteness and its depoliticization The authors show that the many gaps in the EU's mode of governing industries stem from struggles over economic doctrine as well as the continued unwillingness of many actors to accord the EU a legitimacy to act politically in the name of industrial government This book will be of key interest to scholars and students of European Studies and Political Economy as well as those studying Political Science Economics Sociology and Business Studies **Global**

of government in modern Europe On one hand is the morality of individuality according to which the role of government is to frame and enforce rules of law that enable individuals to invent and pursue in peace their own diverse projects On the other is the morality of collectivism by which government is interpreted as the manager of a unified enterprise whose function is to provide for the community regarded as an organic whole that pursues a single project to which all other activities are subordinate
