Asymmetry in Grammar Anne-Marie Di Sciullo, 2003 Asymmetry in Grammar Syntax and Semantics brings to fore the centrality of asymmetry in DP VP and CP. A finer grained articulation of the DP is proposed and further functional projections for restrictive relatives as well as a refined analysis of case identification and presumptive pronouns. The papers on VP discuss further asymmetries among arguments and between arguments and adjuncts. Double object constructions specificational copula sentences secondary predicates and the scope properties of adjuncts are discussed in this perspective. The papers on CP propose a further articulation of the phrasal projection justifications for Remnant IP movement and an analysis of variation in clause structure asymmetries. The papers in semantics support the hypothesis that interpretation is a function of configurational asymmetry. The type token information difference is further argued to correspond to the partition between the upper and lower level of the phrase. It is also proposed that Point of View Roles are not primitives of the pragmatic component but are head dependent categories. Configurationality is further argued to be required to distinguish contrastive from non contrastive Topic. Compositionality is proposed to explain cross linguistic variations in the selectional behavior of typologically different languages. The papers in syntax include contributions from Antonia Androutsopoulou and Manuel Espinosa Echevarría. Dana Isaac Edit Jakab Cedric Boeckx Julie Anne Legate Maria Cristina Cuervo Jacqueline Guéron Niina Zhang Thomas Ernst Manuela Ambar Jean Yves Pollock Anna Maria Di Sciullo Ilena Paul and Stanca Somesfalean. The papers on semantics include contributions of Greg Carlson Peggy Speas and Carol Tenny Chungmin Lee and James Pustejovsky.

Word R. M. W. Dixon, Alexandra Y. Aikhenvald, 2003-01-02 In some languages words tend to be rather short but in others they may be dauntingly long. In this book a distinguished international group of scholars discuss the concept word and its applicability in a range of typologically diverse languages. An introductory chapter sets the parameters of

variation for word The nine chapters that follow then study the character of word in individual languages including Amazonian Australian Aboriginal Eskimo Native North American West African Balkan and Caucasian languages and Indo Pakistani Sign Language These languages exhibit a huge range of phonological and grammatical characteristics the close study of which enables the contributors to refine our understanding of what can constitute a word An epilogue explores the status and cross linguistic properties of word The book will be an invaluable resource for scholars of linguistic typology and of morphology and phonology

Kassandra and the Censors Karen Van Dyck, 2018-05-31 In this pioneering study of contemporary Greek poetry Karen Van Dyck investigates modernist and postmodernist poetics at the edge of Europe She traces the influential role of Greek women writers back to the sexual politics of censorship under the dictatorship 1967-1974 Reading the effects of censorship in cartoons the dictator's

speeches the poetry of the Nobel Laureate George Seferis and the younger generation of poets she shows how women poets use strategies which although initiated in response to the regime's press law prove useful in articulating a feminist critique. In poetry collections by Rhea Galanaki, Jenny Mastoraki and Maria Laina among others she analyzes how the censor's tactics for stabilizing signification are redeployed to disrupt fixed meanings and gender roles. As much a literary analysis of culture as a cultural analysis of literature her book explores how censorship, consumerism and feminism influence contemporary Greek women's poetry as well as how the resistance to clarity in this poetry trains readers to rethink these cultural practices. Only with greater attention to the cultural and formal specificity of writing, Van Dyck argues, is it possible to theorize the lessons of censorship and women's writing.

Women's Influence on Classical Civilization Fiona McHardy, Eireann Marshall, 2004. This book explores how women in antiquity influenced cultural spheres normally thought of as male.

Impious Dogs, Haughty Foxes and Exquisite Fish Tristan Schmidt, Johannes Pahlitzsch, 2019-06-04. From a transcultural perspective, contributions from Assyriology, Byzantine Studies, Classical Archaeology, Egyptology, German Medieval Studies and Jewish History look into the processes and mechanisms behind the transfer by people of certain values to animals and the functions these animal signs have within written, pictorial and performative forms of expression.
