The Concept of Group Rights in International Law Corsin Bisaz, 2012-08-28 Through a collective biography of four scholars Erich Kaufmann Hans Kelsen Hersch Lauterpacht and Hans J Morgenthau this book investigates how Jewish identity and intellectual ties to Judaic civilization in the German speaking and legal context influenced international law By using biblical constitutive metaphors it argues that Jewish German lawyers inherited inter alia a particular Jewish legal approach that framed their understanding of the law as a means to reach God The overarching argument is that because of their Jewish heritage Jewish scholars inherited the endorsement of earthly particularism for the sake of universalism and the other way around for the sake of universalism humanity s differences need to be solved through the law      **Modern Law of Self-Determination** Christian Tomuschat, 2023-08-21 Modern Law of Self Determination examines the significance of the right to self determination in the new world order For decades self determination was seen as a right of colonial peoples Now the decolonization process has come to an end its scope and meaning need to be re examined Increasingly the ethnic groups within established nation States claim some separate political status In extreme cases of persecution of an ethnic group by a ruling majority secession may provide the only viable remedy to resolve the conflict However international law cannot promote a general Balkanization of the globe The legitimate interests of all ethnic groups should be accommodated within the framework of existing States Self determination which today is predominantly understood as implying a right to independent statehood may have to be re interpreted as conferring no more than a right to autonomy or federal statehood Such a conception is in line with a modern tendency that highlights the necessary internal dimension of self determination Modern Law of Self Determination is based on papers delivered at a conference in Bonn in August 1992 which have been updated and reviewed by the authors in light of the discussions following their presentation      The Proposed Nordic Saami Convention Nigel Bankes, Timo Koivurova, 2013-01-31 In 2005 an expert group representing the governments of Norway Sweden and Finland and the Saami parliaments of these countries agreed upon a draft text of a Nordic Saami Convention Key parts of the text deal with the recognition of Saami land and resource rights More recently the three governments have embarked on negotiations to move from this draft text to a final convention that may be adopted and ratified by all three countries Negotiations commenced in the Spring of 2011 and should be completed within five years This collection of essays explores the national and international dimensions of indigenous property rights and the draft Convention which recognises the Saami as one people divided by international boundaries Part one of the book seeks to provide a global and theoretical context for these developments in the Nordic countries with a series of essays dealing with the moral and legal reasons for recognising indigenous property interests and different conceptualisations of the relationship between indigenous peoples and settler societies including recognition reconciliation and pluralism Part two of the book examines some international legal issues associated with the Convention including the background to the Convention Part three turns to examine aspects

of the recognition of Saami property interests in each of the three Nordic states while Part four provides some comparative experiences examining the recognition of indigenous property rights in a number of jurisdictions including Canada Australia and a number of South American states An additional essay considers gender issues in relation to indigenous property rights

**International Law and Nomadic People** Marco Moretti,2012-06-27 Nomadic people have over the years been subject to prejudice and negative thinking by sedentarised societies as well as by political and legislative systems It was finally only in the 1970s that international lawyers began to reassess the status of these peoples to recognise their rights and above all to protect them In his thesis Marco Moretti defines the relationship between nomadic people and law makers between the 16th and 19th centuries This is followed by establishing the evolution of the human rights movement recognising peoples who are not state entities and therefore giving place for the existence of nomadic people worldwide **Irish Yearbook of**

Sathirathai,1987-06-23 *The Human Right to Water* Inga Winkler,2014-08-14 The United Nations General Assembly and the Human Rights Council recognised the human right to water in 2010 This formal recognition has put the issue high on the international agenda but by itself leaves many questions unanswered This book addresses this gap and clarifies the legal status and meaning of the right to water through a detailed analysis of its legal foundations legal nature normative content and corresponding State obligations The human right to water has wide ranging implications for the distribution of water Examining these implications requires putting the right to water into the broader context of different water uses and analysing the linkages and competition with other human rights that depend on water for their realisation Water allocation is a highly political issue reflecting societal power relations with current priorities often benefitting the well off and powerful

Human rights in contrast require prioritising the most basic needs of all people The human right to water has the potential to address these underlying structural causes of the lack of access to water rooted in inequalities and poverty by empowering people to hold the State accountable to live up to its human rights obligations and to demand that their basic needs are met with priority

**Secession** Marcelo G. Kohen, 2006-03-30 The end of the Cold War brought about new secessionist aspirations and the strengthening and re awakening of existing or dormant separatist claims everywhere The creation of a new independent entity through the separation of part of the territory and population of an existing State raises serious difficulties as to the role of international law This book offers a comprehensive study of secession from an international law perspective focusing on practice and applicable rules of international law It

includes theoretical analyses and a scrutiny of practice throughout the world by eighteen distinguished authors from Western and Eastern Europe North and Sub Saharan Africa North and Latin America and Asia Core questions are addressed from different perspectives and in some cases with divergent views The reader is also exposed to a far reaching picture of State practice including some cases which are rarely mentioned and often neglected in scholarly analysis of secession

**The JAG Journal**, 1947 Self-Determination, Terrorism and the International Humanitarian Law of Armed Conflict Elizabeth Chadwick, 2023-08-28 A preliminary definition of

international terrorism was agreed by the world community in 1937. Since then a World War and the Cold War have made any such modern consensus impossible. In particular the UN principles of equal rights and self determination of Peoples have caused political and juridical confusion in that liberation fighters who utilize terror methods as one tactic in an overall political strategy to achieve self determination are frequently termed terrorists and are prosecuted as such. In order to regulate wars of self determination under international law and to control the means and methods of warfare utilized in them international humanitarian law IHL was extended in 1977 to include armed conflicts for the right to self determination as enshrined in the Declaration on Principles of International Law concerning Friendly Relations and Co operation among States in accordance with the Charter of the United Nations. Thus acts of terrorism perpetrated during armed struggles for self determination are separable from random acts of international violence and when perpetrated by states or insurgent forces during wars of self determination may be prosecuted under IHL as war crimes. However although states are obliged to seek out and prosecute the perpetrators of illicit acts of warfare they rarely do so. Dr Chadwick argues that should IHL be fully utilized during wars of self determination if only for purposes of guidance the separability of illicit acts of war would enable the international community to reach consensus more easily in regard to a definition of terrorism in general and a coordination of efforts to deter its occurrence.
