REVISION QUESTION

REGISTERED LAND/UNREGISTERED LAND

Q. For ten years David owned the registered freehold title to Bridge Farm. In addition to fields, Bridge Farm includes a stable block, April Cottage, and a stretch of upland grazing land known as Lakey Hill.

In 2010 when David sold Bridge Farm to Tony he decided to retain Lakey Hill so that he could use it to graze his prize-winning flock of sheep. After the sale David continued driving his quad bike from the main road through one of the fields on Bridge Farm to reach Lakey Hill. Tony acknowledged that David had such a right of way.

In 2015 Tony rented the stable block to Shula for seven years at an annual rent of £1,500. In 2018 Tony agreed in writing that his daughter Helen, who lived in April Cottage, had the right to buy April Cottage anytime during the next five years for the sum of £200,000.

Last month Tony sold Bridge Farm to Phil before moving to become a sheep farmer in Australia. After the sale, Phil told David to stop driving to Lakey Hill across Bridge Farm; and he informed Shula that she must leave the stable block immediately. They both refused. David was furious because he has no other way of getting to his sheep on Lakey Hill. Helen says she now wants to exercise her right to buy April Cottage. Phil was also surprised to hear from Jennifer, Tony's sister, who claims to have rights over Bridge Farm because she paid towards its purchase price.

Advise Phil.

Explain briefly how your advice would differ if all the transactions relating to Bridge Farm were governed solely by the rules of unregistered land.

Handbook of Research on the Regulation of the Modern Global Migration and Economic Crisis Alaverdov, Emilia, Bari, Muhammad Waseem, 2023-02-17 Migration is not a new phenomenon it has a centuries long history since the world's population has been characterized by the desire to relocate not only from one country to another but from one continent to another as well. However, there is a significant difference between the migrations of the past and the current one. Today's migration is complicated by the strong emotional reaction and hostile attitude from society. The study of migration processes needs interdisciplinary approaches. The *Handbook of Research on the Regulation of the Modern Global Migration and Economic Crisis* presents emerging research and case studies on global migration in the modern world. Through interdisciplinary approaches, it further showcases the current challenges and approaches in regulation. Covering topics such as forced migration, human trafficking, and national identity, this major reference work is an excellent resource for migration specialists, government officials, politicians, sociologists, economists, students, and educators of higher education, researchers, and academicians.

Law and Sport in Contemporary Society Steven Greenfield, Guy Osborn, 2013-05-13 As the commercialization of sport grows, the need for proper regulation increases. In legal terms, sport is part of the entertainment and media industries, which are subject to rapid change. This work brings together experts in many fields to analyze these changes and to discuss the implications of issues such as the BSkyB Manchester United case, civil and criminal actions on the playing field, the Bosman ruling, drugs in sport, the legality of boxing, and the validity of decisions made by governing bodies. This collection should appeal to students of both sports history and sports sociology.

EU Criminal Law and Policy Joanna Beata Banach-Gutierrez, Christopher Harding, 2016-07-28 The EU now possesses a clear legal basis for taking action on criminal law matters and steering the policy and practice of Member States in relation to crime and criminal law. However, for what is now an important area of law, there remains a striking absence or uncertainty regarding its theoretical basis, its legitimacy, and its conceptual vocabulary. This book offers a review of the significance of EU criminal law and crime policy as a rapidly emerging phenomenon in European law and governance. Bringing together an international set of contributors, the book questions the nature, role, and objectives of such criminal law, its relationship with other areas of EU policy and law, and the established rules of criminal law and criminal justice at the Member State level. Taking up such subjects as the application of criminal law across national boundaries and in the broader European context, effective enforcement, and the working out of a new European policy, the book helps to structure an increasingly significant subject in law which is still finding its direction. The book will be of great use and interest to researchers and students of EU law, criminal justice, and criminology.

Liabilities and Modern Artificial Intelligence Estelle Wallingford, 2025-09-09 This book addresses how private law liability should be assigned in contexts where modern forms of AI are deployed. AI as a technology holds the potential to radically improve global society, yet the pace of its advancement far outstrips the pace at which legal systems are responding.

This book explores legal approaches to AI how AI should be legally characterised and proposes an overarching theoretical liability framework termed the Tri Phase AI Liability Model This framework is flexible in nature and considers the type of AI the context in which it is deployed who has the most control over the AI system and the capacity of a deployed AI In response this book brings greatly needed clarity to the evolving landscape of AI governance aiding in resolving existing and emerging private law challenges This book is a timely response to the urgent need to resolve private law liabilities and will appeal to legal professionals policy makers and scholars looking to understand or contribute to the current and future governance of AI within private law

Regulation Karen Yeung, Martin Lodge, 2019 As the power and sophistication of big data and predictive analytics has continued to expand so too has policy and public concern about the use of algorithms in contemporary life This is hardly surprising given our increasing reliance on algorithms in daily life touching policy sectors from healthcare transport finance consumer retail manufacturing education and employment through to public service provision and the operation of the criminal justice system This has prompted concerns about the need and importance of holding algorithmic power to account yet it is far from clear that existing legal and other oversight mechanisms are up to the task This collection of essays edited by two leading regulatory governance scholars offers a critical exploration of algorithmic regulation understood both as a means for co ordinating and regulating social action and decision making as well as the need for institutional mechanisms through which the power of algorithms and algorithmic systems might themselves be regulated It offers a unique perspective that is likely to become a significant reference point for the ever growing debates about the power of algorithms in daily life in the worlds of research policy and practice The range of contributors are drawn from a broad range of disciplinary perspectives including law public administration applied philosophy data science and artificial intelligence Taken together they highlight the rise of algorithmic power the potential benefits and risks associated with this power the way in which Sheila Jasanoff's long standing claim that technology is politics has been thrown into sharp relief by the speed and scale at which algorithmic systems are proliferating and the urgent need for wider public debate and engagement of their underlying values and value trade offs the way in which they affect individual and collective decision making and action and effective and legitimate mechanisms by and through which algorithmic power is held to account
