Modern Methods Of Inducing Abortion:

Induced Abortion and Spontaneous Early Pregnancy Loss Igor Lakhno, 2020-04-22 This book is focused on the protection of female reproductive health Artificial pregnancy termination is known to be associated with an increased risk of infertility spontaneous pregnancy loss and other gestational pathologies Since family planning is a system for the prevention of unwanted pregnancy the current situation of the spread of induced abortion in different parts of the world is analyzed Early pregnancy loss is a wide ranging problem in medicine and habitual abortion is a real tragedy for women in their childbearing years The different pathogenetic scenarios of spontaneous pregnancy termination are described and the possible interventions for prevention contributing to beneficial outcomes are discussed Abortion and Contraception in Modern Greece, 1830-1967 Violetta Hionidou, 2020-05-15 The book examines the history of abortion and contraception in Modern Greece from the time of its creation in the 1830s to 1967 soon after the Pill became available It situates the history of abortion and contraception within the historiography of the fertility decline and the question of whether the decline was due to adjustment to changing social conditions or innovation of contraceptive methods The study reveals that all methods had been in use for other purposes before they were employed as contraceptives For example Greek women were employing emmenagogues well before fertility was controlled they did so in order to put themselves right and to enhance their fertility When they needed to control their fertility they employed abortifacients some of which were also emmenagogues while others had been used as expellants in earlier times Curettage was also employed since the late nineteenth century as a cure for sterility once couples desired to control their fertility curettage was employed to procure abortion Thus couples did not need to innovate but rather had to repurpose old methods and materials to new birth control methods Furthermore the role of physicians was found to have been central in advising and encouraging the use of birth control for health reasons thus facilitating and speeding fertility decline in Greece All this occurred against the backdrop of a state and a church that were at times neutral and at other times disapproving of fertility control Induced Abortion and Contraceptive Method Choice Among Urban Japanese Marrieds Samuel Coleman, 1980 **Stanford Law Review: Volume 63, Issue 3 - March 2011** Stanford Law Review, 2011-03-31 This March 2011 issue of the Stanford Law Review contains studies of law economics and social policy by recognized scholars on such diverse topics as preglimony derivatives markets in a fiscal crisis corporate reform in Brazil land use and zoning under contract theory and a student Note on college endowments at elite schools during a time of economic downturn Contents for the March 2011 issue are Regulatory Dualism as a Development Strategy Corporate Reform in Brazil the U S and the E U by Ronald J Gilson Henry Hansmann and Mariana Pargendler The Derivatives Market s Payment Priorities as Financial Crisis Accelerator by Mark J Roe The Contract Transformation in Land Use Regulation by Daniel P Selmi Preglimony by Shari Motro Note Scarcity Amidst Wealth The Law Finance and Culture of Elite University Endowments in Financial Crisis In the ebook editions the footnotes graphs and tables of contents including

The Global Gag Rule and Women's Reproductive Health Yana van der Meulen Rodgers, 2018-10-26 Foreign assistance by the United States is tangled with domestic politics and perhaps this is most clear in relation to funding for health and family planning The long arm of U.S. domestic politics has reached the intimate lives of women all over the world because it has threatened major cuts in funding to healthcare organizations in developing countries if they perform or promote abortions This global gag rule so called because to even mention abortion endangers funding has been a hallmark of Republican administrations since it was first enacted by President Ronald Reagan When Donald Trump reinstated and expanded the policy there was popular uproar and a firestorm of debate Proponents of the policy emphasize the importance of reducing the number of abortions globally and claim that the gag rule will be effective in achieving this goal In this innovative book Yana van der Meulen Rodgers argues that the gag rule has failed to achieve its goal of reducing abortions Rather the restrictive legislation is associated with higher abortion rates and because the reduction in funding is indiscriminate there are negative repercussions across a range of health outcomes for women children and men While the rhetoric in media discourse has been extreme Rodgers provides systematic analysis of how the global gag rule affects women's reproductive health across developing regions grounded in a conceptual framework that models the complex factors that influence women's decision making about fertility She also traces the background to American policy the evolution of international family planning programs the links between contraceptive access and fertility rates and the relationship between restrictive abortion laws and abortion rates And because Rodgers provides a rounded perspective on factors influencing women's decisions on reproduction and abortion she offers a constructive and cost effective approach for U.S. family planning assistance that targets integrated reproductive health services

response selective data **Fertility Control in a Risk Society** Zakir Husain, Mousumi Dutta, 2016-11-04 This book analyses the reasons for relying on behavioural contraception methods among urban elites in India and examines their efficacy in controlling fertility. It also traces variations in contraception choice over the reproductive cycle of women. Although researchers and policy makers generally equate reliance on behavioural contraceptive methods with low levels of education and awareness and lack of desire to control fertility, this perception has been questioned in recent years. The authors' analysis of the first three rounds of the National Family Health Survey (NFHS) data in India reveals that behavioural contraceptive methods are popular in eastern India. Moreover, it is urban educated women who rely on behavioural methods and are apparently able to regulate fertility quite effectively with such methods. NFHS data, however, has some limitations and this motivates the authors to explore birth control methods through primary surveys of currently married graduate women in Kolkata. The use of behavioural contraception methods is a little researched area globally and this is the first book focusing on the topic in India.

The Human Drama of Abortion Aníbal Faúndes, José Barzelatto, 2006 Abortion 101: an accessible account of abortion practices and ethical issues around the globe for students, activists and policymakers. Deeply touched by the tragedies of botched abortions that they witnessed as medical students and young physicians in Chile in the 1940s and later around the world, the authors have attempted in their professional lives and now in this book to establish a framework for dialogue to replace the polarization that exists today. Doctors Faúndes and Barzelatto use their decades of international work to document the personal experiences of different classes of women in different countries and those countries' policies and practices. No other book provides such a comprehensive and reasoned examination of the entire topic of abortion from the medical to the religious and ethical and from the psychological to the legal in plain language understandable by non-specialists. The central thesis is that there are too many induced abortions in the world today that most are preventable and should be prevented. A middle ground that both pro-life and pro-choice advocates can accept. The first part of the book reviews why women have abortions as well as the magnitude and consequences. The second part examines values. The third part discusses effective interventions. The final part states conclusions about what can be done to reach a necessary social consensus. The Portuguese edition of this book was issued at the very end of 2004. The Spanish edition, launched in mid 2005, is already in a second printing. The authors are making presentations at special events sponsored by universities, professional associations and feminist networks in Argentina, Chile, Mexico, Peru, Uruguay, Colombia, the Dominican Republic and the United States.
