Contemporary Perspectives on Natural Law Ana Marta González, 2016-05-13 Resorting to natural law is one way of conveying the philosophical conviction that moral norms are not merely conventional rules Accordingly the notion of natural law has a clear metaphysical dimension since it involves the recognition that human beings do not conceive themselves as sheer products of society and history And yet if natural law is to be considered the fundamental law of practical reason it must show also some intrinsic relationship to history and positive law The essays in this book examine this tension between the metaphysical and the practical and how the philosophical elaboration of natural law presents this notion as a limiting concept between metaphysics and ethics between the mutable and the immutable between is and ought and in connection with the latter even the tension between politics and eschatology as a double horizon of ethics This book contributed to by scholars from Europe and America is a major contribution to the renewed interest in natural law It provides the reader with a comprehensive overview of natural law both from a historical and a systematic point of view It ranges from the mediaeval synthesis of Aquinas through the early modern elaborations of natural law up to current discussions on the very possibility and practical relevance of natural law theory for the contemporary mind

Contemporary Perspectives on Jane Jacobs Dirk Schubert, 2016-05-13 Jane Jacobs s famous book The Death and Life of Great American Cities 1961 has challenged the discipline of urban planning and led to a paradigm shift Controversial in the 1960s most of her ideas became generally accepted within a decade or so after publication not only in North America but worldwide as the articles in this volume demonstrate Based on cross disciplinary and transnational approaches this book offers new insights into her complex and often contrarian way of thinking as well as analyses of her impact on urban planning theory and the consequences for planning practice Now more than 50 years after the initial publication in a period of rapid globalisation and deregulated approaches in planning new challenges arise The contributions in this book argue that it is not possible simply to follow Jane Jacobs s ideas to the letter but instead it is necessary to contextualize them to look for relevant lessons for cities and planners and critically to re evaluate why and how some of her ideas might be updated Bringing together an international team of scholars and writers this volume develops conclusions based on new research as to how her work can be re interpreted under different circumstances and utilized in the current debate about the proclaimed millennium of the city the 21st century

Clatterbaugh,2018-10-08 What is social reality for men in modern society What maintains or explains this social reality What condition might we imagine that would be better for men How might we achieve this better condition These are the questions Kenneth Clatterbaugh brings to seven different visions of men in modern society considered in this newly updated edition In clear and insightful language Clatterbaugh surveys not just conservative liberal and radical views of masculinity but also the alternatives offered by the men s rights movement spiritual growth advocates and black and gay rights activists Each of these is explored both as a theoretical perspective and as a social movement and each offers distinctive responses to the questions posed The first edition of this book was the first to survey the range of responses to feminism that men have made as well as the first to put political theory at the center of men s awareness of their own masculinity This new edition adds chapters on recent highly publicized movements such as the Promise Keepers Million Man March and the evolution of gay men s rights Clatterbaugh treats all views with fairness and timeliness as he develops and defends a vision of men and masculinity consistent with feminist ideals and a just society *Contemporary Perspectives on Revelation and Qu'ranic Hermeneutics*

Akbar Ali Akbar,2019-11-27 A number of innovative hermeneutical approaches emerged in Muslim exegetical discourse in the second half of the 20th century Among these developments is a trend of systematic reform theology that emphasises a humanistic approach whereby revelation is understood to be dependent not only upon its initiator God but also upon its recipient Prophet Muhammad who takes an active role in the process Ali Akbar examines the works of four noted scholars of Islam Fazlur Rahman Pakistan Abdolkarim Soroush Iran Muhammad Mujtahed Shabestari Iran and Nasr Hamid Abu Zayd Egypt His study shows that the consequences of taking a humanistic approach to understanding revelation are not confined to the realm of speculation about God human relations but also to interpreting Qur A nic socio political precepts And the four scholars emerge as a distinctive group of Muslim thinkers who open up a new horizon in contemporary Islamic discourse

Contemporary Perspectives on Architectural Organicism Gary Hua fan He,Skender Luarasi,2023-06-07 This project

is born out of similar questions and discussions on the topic of organicism emergent from two critical strands regarding the discourse of organic self generation one dealing with the problem of stopping in the design processes in history and the other with the organic legacy of style in the nineteenth century as a preeminent form of aesthetic ideology The epistemologies of self generation outlined by enlightenment and critical philosophy provided the model for the discursive formations of modern urban planning and architecture The form of the organism was thought to calibrate modernism s infinite extension The architectural organicism of today does not take on the language of the biological sciences as they did in the nineteenth and twentieth centuries but rather the image of complex systems be they computational informational geo ecological or even ontological aesthetic networks What is retained from the modernity of yesterday is the ideology of endless self generation Revisiting such a topic feels relevant now in a time when the idea of endless generation is rendered more suspect than ever amid an ever increasing speed and complexity of artificial intelligence AI networks The essays collected in this book offer a variety of critiques of the modernist idea of endless growth in the fields of architecture literature philosophy and the history of science They range in scope from theoretical and speculative to analytic and critical and from studies of the history of modernity to reflections of our contemporary world Far from advocating a return to the romantic forms of nineteenth century naturphilosophie this project focuses on probing organicism for new forms of critique and emergent subjectivities in a contemporary post pandemic constellation of neo naturalism in design climate change complex systems and information networks This book will be of interest to a broad range of researchers and professionals in architecture and art history historians of science visual artists and scholars in the humanities more generally
