Islamic Reform in South Asia Filippo Osella, Caroline Osella, 2013-05-16 The articles in this volume build up ethnographic analysis complementary to the historiography of South Asian Islam which has explored the emergence of reformism in the context of specific political and religious circumstances of nineteenth century British India Taking up diverse popular and scholarly debates as well as everyday religious practices this volume also breaks away from the dominant trend of mainstream ethnographic work which celebrates sufi inspired forms of Islam as tolerant plural authentic and so on pitted against a reformist Islam Urging a more nuanced examination of all forms of reformism and their reception in practice the contributions here powerfully demonstrate the historical and geographical specificities of reform projects In doing so they challenge prevailing perspectives in which substantially different traditions of reform are lumped together into one reified category often carelessly shorthanded as wahhabism and branded as extremist if not altogether demonised as terrorist

Rock the Casbah Robin Wright, 2011-07-19 A decade after the 9 11 attacks this groundbreaking book takes readers deep into rebellions against both autocrats and extremists that are redefining politics culture and security threats across the Islamic world The awakening involves hundreds of millions of people And the political transformations and tectonic changes are only beginning Robin Wright an acclaimed foreign correspondent and television commentator has covered the region for four decades She witnessed the full cycle from extremism's angry birth and globalization to the rise of new movements transforming the last bloc of countries to hold out against democracy Now in Rock the Casbah she chronicles the new order being shaped by youth inspired revolts toppling leaders clerics repudiating al Qaeda playwrights and poets crafting messages of a counter jihad comedians ridiculing militancy hip hop rapping against guns and bombs and women mobilizing for their own rights This new counter jihad has many goals For some it's about reforming the faith For others it's about reforming political systems For most it's about achieving basic rights The common denominator is the rejection of venomous ideologies and suicide bombs plane hijackings

hostage takings and mass violence to achieve those ends Wright captures a stunning moment in history one of the region's four key junctures along with Iran's revolution Israel's creation and the Ottoman Empire's collapse in a century The notion of a clash of civilizations is increasingly being replaced by a commonality of civilizations in the twenty first century But she candidly details both the possibilities and pitfalls ahead The new counter jihad is imaginative and defiant but Muslim societies are also politically inexperienced and economically challenged

A Companion to Muslim Cultures Amyn Sajoo, 2011-11-22 I B Tauris in association with the Institute of Ismaili Studies Culture shapes every aspect of the relationship between God and the believer in Islam as well as among believers and with those beyond the fold Fasts prayers and pilgrimages are attuned to social rhythms old and new no less than the designs of mosques and public gardens the making of religious music and ways of thinking about technology and wellbeing Ancient deserts and modern urban landscapes may echo with the same call for transcendence but in voices that emerge from very different everyday realities Scripture itself as the Prophet Muhammad knew is ever seen through a cultural lens both language and what it communicates are intimately tied to context And the cosmopolitanism that runs through Muslim history from the outset recalls T S Eliot's remark that culture is that which makes life worth living It frames how the deepest religious values are understood and practiced from modesty in adornment and solidarity with the underprivileged to integrity and accountability in political life Muslims have never been content with a passive separation of faith from their daily lives whether public or private What are the implications of this holistic view in a diverse world of Muslims and non Muslims How do core ethical values interface with the particulars of local cultures in all their complexity especially when it comes to matters like the status of women and the scope of individual religious freedom The answers at a time when secular and Muslim identities appear to be locked in conflict are explored in this Companion by some of today's finest scholars

Muslims in the United States Karen Isaksen Leonard, 2003-06-19 As the United States wages war on terrorism the country's attention is riveted on the Muslim world as never before While many cursory press accounts dealing with Muslims in the United States have been published since 9 11 few people are aware of the wealth of scholarly research already available on the American Islamic population In *Muslims in the United States* The State of Research Karen Isaksen Leonard mines this rich vein of research to provide a fascinating overview of the history and contemporary situation of American Muslim communities Leonard describes how Islam never a monolithic religion has inevitably been shaped by its experience on American soil American Muslims are a religious minority and arbiters of Islamic cultural values and jurisprudence must operate within the framework of America's secular social and legal codes while coping with the ethnic differences among Muslim groups that have long divided their communities Arab Muslims tend to dominate mosque functions and teaching

Arabic and the Qur'an whereas South Asian Muslims have often focused on the regional and national mobilization of Muslims around religious and political issues. By the end of the 20th century however many Muslim immigrants had become American citizens prompting greater interchange among these groups and bridging some cultural differences. African American Muslims remain the most isolated group, a minority within a minority. Many African American men have converted to Islam while in prison, leading to a special concern among African American Muslims for civil and religious rights within the prison system. Leonard highlights the need to expand our knowledge of African American Muslim movements which are often not regarded as legitimate by immigrant Muslims. Leonard explores the construction of contemporary American Muslim identities examining such factors as gender, sexuality, race, class and generational differences within the many smaller national origin and sectarian Muslim communities including secular Muslims, Sufis and fundamentalists. Muslims in the United States provides a thorough account of the impact of September 11th on the Muslim community. Before the terrorist attacks Muslim leaders had been mostly optimistic, envisioning a growing role for Muslims in U.S. society. Afterward, despite a brave show of unity and support for the nation, Muslim organizations became more open in showing their own conflicts and divisions and more vocal in opposing militant Islamic ideologies. By providing a concise summary of significant historical and contemporary research on Muslims in the United States, this volume will become an essential resource for both the scholar and the general reader interested in understanding the diverse communities that constitute Muslim America.

The Ashgate Research Companion to Anthropology Andrew J. Strathern, 2016-03-03. This companion provides an indispensable overview of contemporary and classical issues in social and cultural anthropology. Although anthropology has expanded greatly over time in terms of the diversity of topics in which its practitioners engage, many of the broad themes and topics at the heart of anthropological thought remain perennially vital, such as understanding order and change, diversity and continuity, and conflict and co-operation in the reproduction of social life. Bringing together leading scholars in the field, the contributors to this volume provide us with thoughtful and fruitful ways of thinking about a number of contemporary and long-standing arenas of work where both established and more recent researchers are engaged. The companion begins by exploring classic topics such as Religion, Rituals, Language and Culture, Violence and Gender. This is followed by a focus on current developments within the discipline including Human Rights, Globalization and Diasporas, and Cosmopolitanism. It provides an interesting and challenging look at the state of current thinking in anthropology, serving as a rich resource for scholars and students alike.

Agents of the Hidden Imam Edmund Hayes, 2022-02-17. In 874 CE the eleventh Imam died and the Imami community splintered. The institutions of the Imamate were maintained by the dead Imam's agents who asserted they were in contact with a hidden twelfth Imam. This was the beginning of Twelver Shi'ism. Edmund Hayes provides an innovative approach to exploring early Shi'ism, moving beyond doctrinal history to provide an analysis of the socio-political processes leading to the canonisation of the Occultation of the twelfth Imam. Hayes shows how these agents cemented their authority

by reproducing the physical signs of the Imamate including protocols of succession letters and the alm taxes Four of these agents were ultimately canonised as envoys but traces of earlier conceptions of authority remain embedded in the earliest reports Hayes dissects the complex and contradictory Occultation narratives to show how amidst the claims of numerous actors the institutional positioning of the envoys allowed them to assert a quasi Imamic authority in the absence of an Imam

Indian Secularism Shabnum Tejani, 2021-01-05 Many of the central issues in modern Indian politics have long been understood in terms of an opposition between ideologies of secularism and communalism Observers have argued that recent Hindu nationalism is the symptom of a crisis of Indian secularism and have blamed this on a resurgence of religion or communalism Shabnum Tejani unpacks prevailing assumptions about the meaning of secularism in contemporary politics focusing on India but with many points of comparison elsewhere in the world She questions the simple dichotomy between secularism and communalism that has been used in scholarly study and political discourse Tracing the social political and intellectual genealogies of the concepts of secularism and communalism from the late nineteenth century until the ratification of the Indian constitution in 1950 she shows how secularism came to be bound up with ideas about nationalism and national identity
