## **Multi Universe Cosmos The First Complete Story Of The Origin Of The Universe:**

The Multi-Universe Cosmos A.K. Velan, 2012-12-06 In light of the barrage of popular books on physics and cosmology one may question the need for another Here two books especially come to mind Steven Weinberg's *The First Three Minutes* written 12 years ago and the recent best seller *A Brief History of Time* by Stephen Hawking The two books are complementary Weinberg Nobel prize winner physicist wrote from the standpoint of an elementary particle physicist with emphasis on the contents of the universe whereas Hawking wrote more as a general relativist with emphasis on gravity and the geometry of the universe Neither one however presented the complete story Weinberg did not venture back beyond the time when temperature was higher than 10 K and perhaps as high as 10<sup>32</sup> K He gave no explanation for the origin of particles and the singularity or source of the overwhelming radiation energy in our universe of one billion photons for each proton Hawking presents a universe that has no boundaries was not created and will not be destroyed The object of this book is to describe my new theory on the creation of our universe in a multi universe cosmos The new cosmological model eliminates the troublesome singularity big bang theory and explains for the first time the origin of matter and the overwhelming electromagnetic radiation contained in the universe My new theory also predicted the existence of high energy gamma rays which were recently detected in powerful bursts

What Caused the Big Bang? Rem B. Edwards, 2021-07-26 This book critically explores answers to the big question What produced our universe around fifteen billion years ago in a Big Bang It critiques contemporary atheistic cosmologies including Steady State Oscillationism Big Fizz Big Divide and Big Accident that affirm the eternity and self sufficiency of the universe without God This study defends and revises Process Theology and arguments for God's existence from the universe's life supporting order and contingent existence

ELEMENTS OF HISTORY AND PHILOSOPHY OF SCIENCE Ephraim-Stephen Essien and Iniobong Umotong (Eds.), 2013-10-10 This book introduces students to the history and philosophy of the natural sciences The book examines major topics in the history and philosophy of science including among others the meaning nature goal and method of science the meaning nature and goal of philosophy of science the problems of induction and causation and the inductive reasoning as the primary logic of science The book also examines positivism logical positivism and the analytic philosophical tradition falsificationism of Karl Popper within the context of his grand philosophy of critical rationalism methodology of scientific research programme of Imre Lakatos scientific revolution of Thomas Kuhn methodological anarchism of Paul Feyerabend the history of the Western sciences and the philosophical issues associated with them The origin theories of the universe and by implication of man are also analysed here in perspective Issues on the environment its sustainability and renewability are sufficiently adumbrated in this book
