World Bank Research Program World Bank,1983 *Multicountry Investment Analysis* L. B. M. Mennes,Ardy J. Stoutjesdijk,World Bank,1985 **Economic Books** ,1986 **Abstracts of Current Studies** World Bank,1983 **Models for Analyzing Comparative Advantage** David Andrew Kendrick,2012-12-06 Recent economic history suggests that a key element in economic growth and development for many countries has been an aggressive export policy and a complementary import policy Such policies can be very effective provided that resources are used wisely to encourage exports from industries that can be competitive in the international arena Also import protection must be used carefully so that it encourages infant industries instead of providing rents to industries that are not competitive Policy makers may use a variety of methods of analysis in planning trade policy As computing power has grown in recent years increasing attention has been given to economic models as one of the most powerful aids to policy making These models can be used on the one hand to help in selecting export industries to encourage and infant industries to protect and on the other hand to chart the larger effects of trade policy on the entire economy While many models have been developed in recent years there has not been any analysis of the strengths and weaknesses of the various types of models Therefore this monograph provides a review and analysis of the models which can be used to analyze dynamic comparative advantage **Journal of Economic Literature** ,1987
