✓ Exclusively available on IvyPanda

Sociology is a multidimensional phenomenon that influences the interpretation of dynamic interactions among people. Research establishes three key sources of the scientific study of society; industrialization, Christianity, and Auguste Comte's theoretical frameworks (Tweedell, 2010). Industrialization is a profound steering factor to sociological practice's emergence and necessity. The intensification of commerce activities attributed to the marginalization of personnel locally and internationally. As a result, individuals faced homelessness and family fragmentations due to the stratification of groups along the wealth possession gradient. Sociology determines the fabrics of intra and inter-personal relationships and the trickle-down effect of proficient growth and development.

Sociology emanates from the institutionalization of cultural constructs. One of the common behavioral responses among people involves seeking references during decision-making. Transcendentally, scholars associate the essence of social learning with the three foundational perspectives (Tweedell, 2010). These quotients on sociological overviews entail structural-functional, interactionist, and conflict. The structural-functional facet argues that society is a well-oiled machine independently operating globally based on the incorporated policies. The conflict dimension focuses on social order as an outcome of struggle and power balance among individuals. The interactionist theorem indicates that conduct among counterparts reflects appeals and perceptions of good and bad endeavors. The significance of dynamically exploring the scientific measure of society enshrines deriving insights on change initiatives.

In conclusion, sociology plays a crucial role as a mediating factor to Christianity and psychological studies. Despite the distinctive perspectives, the professional field contributes to Christianity, justifying the interplay between the two elements. While Christianity renders the biblical meaning of life and interactions, sociology focuses on the nature of relationship-building and the effect of unity. However, certain Christian faiths influence sociological themes, such as believing in God. A sociologist establishes that the key illuminating component of order engulfs the ability of personnel to exchange value on customs, norms and settle on a standard foundation. Sociology addresses

**Marx and Wittgenstein** Gavin Kitching, Nigel Pleasants, 2013-01-11 At first sight Karl Marx and Ludwig Wittgenstein may well seem to be as different from each other as it is possible for the ideas of two major intellectuals to be. Despite this standard conception, however, a small number of scholars have long suggested that there are deeper philosophical commonalities between Marx and Wittgenstein. They have argued that once grasped, these commonalities can radically change and enrich understanding both of Marxism and of Wittgensteinian philosophy. This book develops and extends this unorthodox view, emphasising the mutual enrichment that comes from bringing Marx's and Wittgenstein's ideas into dialogue with one another. Essential reading for all scholars and philosophers interested in the Marxist philosophy and the philosophy of Wittgenstein, this book will also be of vital interest to those studying and researching in the fields of social philosophy, political philosophy, philosophy of social science and political economy.

**The Cultural Politics of Lifestyle Sports** Belinda Wheaton, 2013-07-23 This important new study examines the changing place and meaning of lifestyle sports: parkour, surfing, skateboarding, kite surfing, and others, and asks whether they continue to pose a challenge to the dominant meanings and experience of sport and physical culture. Drawing on a series of in-depth empirical case studies, the book offers a re-evaluation of theoretical frameworks with which lifestyle sports have been understood and focuses on aspects of their cultural politics that have received little attention, particularly the racialization of lifestyle sporting spaces. Centrally, it re-assesses the political potential of lifestyle sports, considering if lifestyle sports cultures present alternative identities and spaces that challenge the dominant ideologies of sport and the broader politics of identity in the 21st century. It explores a range of key contemporary themes in lifestyle sport, including identity and the politics of difference, commercialization and globalization, sportscapes, media discourse and lived reality, risk and responsibility, governance and regulation, the racialization of lifestyle sports spaces, lifestyle sports outside of the Global North, the use of lifestyle sport to engage non-privileged youth. Casting new light on the significance of sport and sporting subcultures within contemporary society, this book is essential reading for students or researchers working in the sociology of sport, leisure studies or cultural studies.

Classical Attempt at Theoretical Synthesis Jeffrey Alexander, 2014-04-24 The limits of one-dimensional theory are

strikingly revealed in the schools that the founders of the major sociological traditions established In this volume Max Weber is presented as the theorist who laid out new starting points and the author considers his work as a response in part to the idealist tradition which in Volume 2 he maintains that Durkheim represents As Weber was less able to avoid ambiguity the author examines the weaknesses and efforts at paradigm revision

**Native-Speakerism** Stephanie Ann Houghton,Jérémie Bouchard,2020-11-13 This book explores native speakerism in modern language teaching and examines the ways in which it has been both resilient and critiqued It provides a range of conceptual tools to situate ideological discourses and processes within educational contexts In turn it discusses the interdiscursive nature of ideologies and the complex ways in which ideologies influence objective and material realities including hiring practices and more broadly speaking unequal distributions of power and resources In closing it considers why the diffusion and consumption of ideological discourses seem to persist despite ongoing critical engagement by researchers and practitioners and proposes alternative paradigms aimed at overcoming the problems posed by the native speaker model in foreign language education

*Modern Reconstruction of Classical Thought: Talcott Parsons* Jeffrey Alexander,2014-04-03 In this volume the author maintains that sociology must learn to combine the insights of both Durkheim and Marx and that it can only do so on the presuppositional ground that Weber set forth Alexander maintains that the idealist and materialist traditions must be transformed into analytic dimensions of multidimensional and synthetic theory This volume focusses on the writing of Talcott Parsons the only modern thinker who can be considered a true peer of the classical founders and examines his own profoundly ambivalent attempt to carry out this analytic transformation

*Illuminating*

*Social Life* Peter Kivisto, 2012-11-02 The sixth edition of Peter Kivisto's popular anthology *Illuminating Social Life* continues to demonstrate to students how social theories can help them make sense of the swirling events and perplexing phenomena that they encounter in their daily lives. A perfect complement for sociological theory courses, this updated edition includes 13 original essays by leading scholars in the field that help students better understand and appreciate the relevance of social theory. Once again, Peter Kivisto's collection illuminates the connection between sociological theory and the realities that students are faced with every day, from the Internet, alcohol use and body building to shopping malls, the working world and fast food restaurants. Contributor to the SAGE Teaching Innovations and Professional Development Award. **Education**

*Landscapes in the 21st Century* Iris Guske, 2009-03-26 With contributions from scholars and practitioners in the fields of education, literacy, literature, media, communication and cultural studies from all five continents, the present volume focuses on themes of pressing importance in today's globalized community. By giving voice to educators committed to excellence in teaching from primary school to university, the book introduces the reader to a plurality of approaches to and applications of up-to-date theories in the fields of cognition, language acquisition, intercultural communication and technology-based distance education, to name but a few. Though situated in a concrete educational context, be it a Chinese EFL classroom in transition, an online MBA course offered in post-Communist Romania or a U.S. university utilizing community elders as a pedagogical tool, each paper was selected on the universal value of its findings, which professionals facing the challenges of 21st-century pedagogy will find readily applicable in classrooms worldwide. Since teaching paradigms are strongly culture-bound and influenced by national policies as much as international politics, this book represents a maximum of diversity by including philosophical texts, hands-on research results and articles in the critical discourse tradition, which reflect a number of contentious issues ranging from the pros and cons of dual language classrooms to potentially racist literature curricula and the intersection of politics and pedagogy in a post-September 11 world. **Punishment in Europe** Vincenzo Ruggiero, Mick Ryan, 2013-08-30 This collection from a range of leading international scholars looks at penal practice in a variety of different European countries. Noting particularities as well as similarities such as the overuse of imprisonment and the use of harsher sanctions against the poor, this book questions how we justify and deliver punishment in Europe. **Alienation and the Carnivalization of Society** Jerome Braun, Lauren Langman, 2012-04-23 This book examines alienation from both a sociological and psychoanalytic perspective, revisiting classic treatments of the topic, Marx, Simmel, Weber and exploring its relevance to understanding post-modern consumer society. It examines the escapist potentials for good and for ill in modern society, those fostered by commercial interests and those maintained by individuals and groups as their form of resisting alienation. **The Role of Trust in Mental Health** Gerard Leavey, 2024-12-23 This book offers a comprehensive examination of trust and its relationship with mental illness and wellbeing. Engaging with a broad range of mental health research, theory and practice through various transdisciplinary theoretical models of trust, this book highlights the social and

family contexts surrounding the making and breaking of trust and mental health. It examines various sociological, conceptual, and theoretical frameworks of risk and trust while also engaging with evolutionary perspectives on the human need for cooperation and trust. The author describes how in a world of constant connectivity the drawing of boundaries assigns some people as strangers using stigma as a form of power. The book concludes by considering the future of mental health and where trust building may be possible. Each chapter is interspersed with observations and insights from the author's personal research covering many populations, communities, and issues over several decades. Drawing on a wide range of interdisciplinary literature, the book will be of interest to mental health practitioners, researchers, and scholars interested in the psychosocial aspects of mental illness and stigma.

Crisis and Reform in Eastern Europe Ferenc Fehér, Andrew Arato, Communism in Eastern Europe is in crisis. Its dimensions are social and economic; its manifestation is political. This volume, a collection of essays by leading authorities, describes the symptoms of the crisis, diagnoses the causes of the malady, and offers alternative scenarios for therapy. A unique dimension of this collection is its avoidance of one-dimensional explanations. The contributors approach the subject from very different angles and start from very distinct sociopolitical premises. The volume includes original accounts of unexplored aspects of East European communism as well as classic interpretations of the economic crisis and social stagnation that characterize the area. Contributions not only examine the sociopolitical behavior of the ruling apparatus but also analyze its strategies, political culture, and the opposition. Both the professional and the general reader seeking more information about Eastern Europe will find this volume an extensive in-depth portrait of the current situation in what many observers predict may develop into the major area of tension in post-World War II Europe. Ferenc Fehér, a collaborator and friend of George Lukács, was a leading member of the Budapest School. Forced into exile in 1977, he was taught in Australia and is now in New York at the New School for Social Research. He has published widely in several languages on the philosophy of art, political theory, and history.
