Multidrug Resistance In Emerging And Reemerging Diseases:

Multi-Drug Resistance in Emerging and Re-Emerging Diseases R. C. Mahajan, Amu Therwath, 2001-12 The recent appearance of multi drug resistant phenotypes has complicated the efforts to completely eradicate diseases such as tuberculosis and malaria thus underscoring the need for new and innovative scientific approach to the problem Multi Drug Resistance in Emerging and Re Emerging Diseases highlights the state of the art in microbial parasite control and containment and discusses ways and means of avoiding development of drug resistance It explores strategies to combat the nightmare of microbial aggression and resistance and to overcome multiple drug resistance when it emerges in microbial organisms or in cancer cells exposed to chemotherapy Written by a panel of experts the book gives you the benefits of both field and clinical experience as well as an in depth know how of the pathology of these drug resistant diseases Topics include malaria tuberculosis cholera leprosy diarrhoeal diseases nosocomial diseases plague and drug resistance and cancer Multi Drug Resistance in Emerging and Re Emerging Diseases provides a foundation for new initiatives and more collaborative efforts in the fight against resistance to antibiotics by micro organisms Emerging and Re-Emerging Infectious Diseases , An Issue of Infectious Disease Clinics of North America Alimuddin Zumla, David S.C. Hui, 2019-11-02 In consultation with Consulting Editor Dr Helen Boucher Drs Zumla and Hui have assembled an excellent clinical overview of the current priorities in treating emerging and re emerging infections A number of landmark events have occurred in the area of epidemic infections The frequency and diversity of serious and drug antibiotic resistant infections are increasing New and re emerging infectious disease outbreaks continue to cause much human suffering and loss of life worldwide Current priority infectious diseases concerns that threaten global health security are covered in this issue Cholera Typhoid and antibiotic resistant strains multi drug resistant Tuberculosis Invasive Meningococcal disease Invasive Pneumococcal disease antibiotic resistant bacterial viral and protozoal infections diphtheria pandemic influenza MERS SARS Measles viral haemorrhagic fevers wild type Polio virus Zika antibiotic resistant sexually transmitted diseases drug resistant Malaria ARV resistant HIV and fungal infections This issue s clinical review articles written by authoritative and renowned experts in the area would have broad appeal from general internists to respiratory specialists It should also prove interesting to infectious diseases specialists health practitioners in the tropics pulmonologists internal medicine fellows family physicians and health care policy makers in the west and developing countries Medical students postgraduates and research fellows both undergraduates and postgraduates will also find this issue useful and to be a updated reference in the field of respiratory medicine tropical medicine and infectious diseases **Biosensors for Emerging and Re-emerging Infectious Diseases** Jayashankar Das, Sushma Dave, S. Radhakrishnan, Padmaja Mohanty, 2022-08-24 Biosensors for Emerging and Re Emerging Infectious Diseases provides a review of how cornerstone optical electronic nanomaterial and data processing technologies can address detection issues occurring in a pandemic event This book gives insights into the fundamental physical chemical

and biological mechanisms needed for such a type of detection The content covers potential biomarkers which can be used for the infectious disease diagnostic helping readers find the appropriate approach for the diagnosis of infectious diseases It presents a novel approach to transferring the sensing platform from lab to application in clinics and to point of care detection The book then moves on to discuss the function and efficiency of the biosensing platform in early diagnosis of infectious diseases compared to the standard methods The required time the technician skills and the steps which must be performed are other key factors of the biosensing platform which are well explained Covers applications of biosensors in diagnostics and detection of infection and in the application of new materials in biosensor development Presents nano biosensor based point of care technologies Introduces readers to the fundamentals of biosensors for infectious diseases
