Multifunctional landscapes – volume II: monitoring, diversity and management

J. Brandt and H. Vejre (eds.), *Multifunctional Landscapes – Volume II: Monitoring, Diversity and Management*. WIT Press, Southampton, UK, 2003. 312 pp., illus., figs., maps; 23 cm. Hardback; ISBN: 1-85312-934-8, US\$158.00.

A prevailing theme for all of landscape ecology and conservation is how to best manage landscapes for long-term sustainable use. Part of the *Advances in Ecological Sciences* (Volume 15) series, this volume focuses on three components of multifunctional landscapes, namely monitoring, diversity, and management. Each of these three components comprises a large 'chapter' that is independently edited and contains a series of case studies within it. Better described as sections, the three main chapters are 'Monitoring multifunctional landscapes,' 'Biodiversity vs. landscape diversity in multifunctional landscapes,' and 'Complexity of landscape management.'

The case studies presented in *Multifunctional Landscapes II* are based on the 'Multifunctional Landscapes: Interdisciplinary Approaches to Landscape Research and Management' conference held at the University of Roskilde, Denmark in 2000. In this second of three volumes (and a special issue of *Landscape and Urban Planning* 57: 3–4), the case studies focus on three particular workshops at the conference which sought to address the importance of monitoring, the trade-offs between biodiversity and landscape management, and the complexity of managing for multifunctionality. It quickly becomes apparent that one primary reason for the workshop and the edited volumes was to bring together the numerous views and research on the concept of multifunctionality in order to begin moving toward a unified view. Thus, while each of the three sections contains case studies, they also have a 'Recommendations for future research' summary that ties together the case studies into a short summary and series of next steps. Because the concepts of multifunctionality cross disciplinary boundaries, the case

studies reflect a wide variety of perspectives. For example, one of the last case studies delves into ecological economics for landscape management. Similarly, another case study considers the importance of soil diversity. Given the breadth of disciplines covered in the papers, it is also useful to see the wide variety of approaches the researchers have used, from social surveys to GIS.

The first main section of the volume centers around the issue of monitoring on a multifunctional landscape. The four case studies in this section describe monitoring at different scales, using different criteria for monitoring, and monitoring differing types of data. Although the case studies are diverse, they do a nice job of driving home the point of just how important monitoring is for any landscape analysis. Of the three main sections, this is by far the strongest and most relevant for the general landscape practitioner, precisely because monitoring is the key to understanding long-term patterns and processes and developing sustainable management plans.

In the second major section of the volume, the case studies focus on a key issue of conservation and landscape ecology – the potential trade-off between biodiversity and landscape diversity. While not as strong as the monitoring case studies, the four chapters comprising this section do a reasonable job of trying to discuss the methods as well as the pros and cons of how to manage for biodiversity while at the same time managing for landscape diversity or multifunctionality. Ultimately, however, the question of whether or not we can do a good job of managing for both biodiversity and the human enterprise on the same landscape remains to be seen.

For the final section of the book, the case studies all center on how complex it is to manage for multifunctionality. While I do not think there would be any landscape ecologist around to argue that it would be simple to manage for multifunctionality, the seven case studies and summary here do not do much other than confirm this
