Multilingual Practices in Language History Päivi Pahta, Janne Skaffari, Laura Wright, 2017-12-18 Texts of the past were often not monolingual but were produced by and for people with bi or multilingual repertoires the communicative practices witnessed in them therefore reflect ongoing and earlier language contact situations However textbooks and earlier research tend to display a monolingual bias This collected volume on multilingual practices in historical materials including code switching highlights the importance of a multilingual approach The authors explore multilingualism in hitherto neglected genres periods and areas introduce new methods of locating and analysing multiple languages in various sources and review terminology theories and tools The studies also revisit some of the issues already introduced in previous research such as Latin interacting with European vernaculars and the complex relationship between code switching and lexical borrowing Collectively the contributors show that multilingual practices share many of the same features regardless of time and place and that one way or the other all historical texts are multilingual This book takes the next step in historical multilingualism studies by establishing the relevance of the multilingual approach to understanding language history

Multilingual Healthcare Christiane Hohenstein, Magdalène Lévy-Tödter, 2020-03-28 This volume is the first to address multilingual healthcare communication around the globe and focuses on institutional social and linguistic challenges and resources of the healthcare industry It comprises studies from Canada Australia South Africa Greenland Italy Germany Switzerland and

Belgium and aims to introduce new paths of communicative and methodological agendas casting a critical view on current linguistic practices in healthcare nursing and medical interactions With increased personal mobility in a global society the need for multilingual staff is on the rise in medical institutions and healthcare organisations and communicative competencies and practices involving different languages pose challenges for medical doctors healthcare staff and patients alike Many studies have highlighted the crucial role played by interpreters and interpreting staff but the diversity of language situations in different countries requires very different approaches and solutions Additionally it may not be possible to develop a single agenda of language services for different medical areas with different needs for counselling with various forms of treatment that require explanation and the patient s informed consent and with varying approaches to the relationship between medical professionals and patients How to best organise medical digital language services in countries as different as South Africa Greenland Germany Belgium and Australia calls for a diversity of possible solutions The current volume makes a variety of such solutions and practices available for medical staff and healthcare institutions faced with international patients and working with international medical staff It makes the challenges palpable on an international scale in a way that comparisons may be drawn between different solutions as well as their socio cultural and institutional implications This volume is intended for policy makers medical and healthcare practitioners institutions interpreters teachers and students in professional multilingual healthcare
