Jawad, 2025-05-11 Fish imagery and symbolism in Mesopotamian art can be examined from various perspectives It may be studied in a historical context exploring the stylistic evolution through different periods as a social history analysing how societal conditions shaped the development of artistic forms or through its symbolic meaning focusing on its religious ritualistic or cultural significance Representations of fish along with other Near Eastern fauna are found on a wide range of artifacts including pottery stone vessels cylinder seals and reliefs spanning various eras This book will present new insights to scholars by providing a unique combination of ichthyological and archaeological analysis which has not been previously undertaken Additionally it will illuminate how the people of ancient Mesopotamia visualized and imagined aquatic life over time Ultimately this work will be a valuable contribution to the field of Ancient Mesopotamian studies and its literature **Southern Iraq's Marshes** Laith

A. Jawad, 2021-05-06 The Mesopotamian marshes are important for economic social and biodiversity values and have been home to indigenous human communities for millennia They are regarded as a legendary site This multi authored book contains chapters written by world renowned experts in their field Both basic and applied information are made available making the book a must have for a wide spectrum of users For example an understanding of the natural and the social aspects of the marshes as described here is an obvious prerequisite for a pest management plan in this area Scholars interested in wetlands can use this book as a guide to compare different wetlands areas in Asia The bibliography section contains valuable references to the marsh areas and research in the field This book serves as an up to date comprehensive source of information on different aspects of the southern marshes of Iraq and is aimed at academic scholars environmentalists and decision makers

Sparidae Michalis A. Pavlidis, Constantinos C. Mylonas, 2011-02-15 The Sparidae commonly known as breams and porgies is a family of fishes of the order Perciformes and includes about 115 species of mainly marine coastal fish of high economic value exploited and farmed for human consumption as well as for recreational purposes This landmark publication brings together a huge wealth of information on the biology and culture of gilthead sea bream and other Sparidae species Commencing with an overview of the current status of aquaculture of Sparidae the book

continues with comprehensive coverage of the family's phylogeny evolution and taxonomy stress and welfare issues and reproduction and broodstock management Further chapters include coverage of early development and metabolism production systems nutrition quality and health management A final cutting edge chapter looks at genomic proteomic research in Sparidae and its application to genetic improvement With contributions from Europe the Middle East Asia Australasia and North America carefully drawn together and edited by Professor M Pavlidis and Dr C C Mylonas themselves well known for their work in this area Sparidae is an essential purchase for anyone working with this important family of fishes Fish biologists fish farmers aquaculture researchers and fisheries managers will all find much of great use and interest within this book's covers All universities and research establishments where biological sciences aquaculture and fisheries science are studied and taught should have copies of this excellent book on their shelves

[Dangerous Fishes of New Zealand](#) Laith A. Jawad, 2024-10-22 Among the aims of the present book is to educate locals about the danger of this group of fishes as part of a public education and awareness program that should be initiated in the coastal areas It is therefore important to identify and assess the hazards posed by various fishes in each region and bring the results to public attention In addition at locations where hazards involving dangerous fish have been identified procedures should be developed for treating any injuries sustained This book will be a reference book to both Academic and students in different disciplines of knowledge to use in their research on fishes of New Zealand and the Pacific The scholars interested in fish fauna of New Zealand will use this book as a guide to compare the dangerous fish fauna of New Zealand with those of the other parts of The Pacific regions
