**Citizenship, Nation-building and Identity in the EU** Cherry James, 2018-12-17 With Brexit looming a major issue facing UK Higher Education is whether the UK will be able to stay in the Erasmus Programme This book sits at the intersection of three main interrelated themes EU citizenship the current state of the university in Europe and student mobility as they play out in the context of an EU funded programme established not least to promote European identity European consciousness and European citizenship Exploring through interviews with students from many countries this book weaves together the themes of citizenship creation as a device for building a nation and a polity the university as a public space in the era of the marketization of higher education and communicative interaction as the mechanism by which citizenship is created Ultimately it asks if the building bricks of national citizenship can be transposed to the transnational scale and assist in creating the transnational EU citizenship It finds surprisingly that far from encouraging and facilitating the communicative interaction on which the development of EU citizenship was postulated central features of the Erasmus Programme inadvertently work against this outcome This book will be of key interest to scholars and students of EU law and European and EU studies Citizenship Studies sociology and more broadly to higher education in general

**Shallow Equality and Symbolic Jurisprudence in Multilingual Legal Orders** Janny H.C. Leung, 2019-01-28 What challenges face jurisdictions that attempt to conduct law in two or more languages How does choosing a legal language affect the way in which justice is delivered Answers to these questions are vital for the 75 officially bilingual and multilingual states of the world as well as for other states contemplating a move towards multilingualism Arguably such questions have

implications for all countries in a world characterized by the pressures of globalization economic integration population mobility decolonization and linguistic re colonization For lawyers addressing such challenges is made essential by the increased frequency and scale of transnational legal dealings and proceedings as well as by the lengthening reach of international law But it is not only policy makers legislators and other legal practitioners who must think about such questions The relationship between societal multilingualism and law also raises questions for the burgeoning field of language and law which posits among other tenets the centrality of language in legal processes In this book Janny H C Leung examines key aspects of legal multilingualism Drawing extensively on case studies she describes the implications of the legal practical and ideological dilemmas encountered in a given country when it becomes bilingual or multilingual discussing such issues as how legal certainty and the linguistic ideology of authenticity may be challenged in a multilingual jurisdiction how courts balance the language preferences of different courtroom participants and what historical socio political and economic factors may influence the decision to cement a given language as a jurisdiction s official language Throughout Leung elaborates a theory of symbolic jurisprudence to explore common dilemmas found across countries despite their varied political and cultural settings and argues that linguistic equality as proclaimed and practiced today is a shallow kind of equality Although officially multilingual jurisdictions appear to be more inclusive than their monolingual counterparts they run the risk of disguising substantive inequalities and displacing real efforts for more progressive social change This is the first book to offer overarching discussion of how such issues relate to each other and the first systematic study of legal multilingualism as a global phenomenon
