Multimedia And Communications Technology:

Multimedia and Communications Technology Steve Heath, 2017 Multimedia and Communications Technology is a practical explanation of the technologies that bring together existing products such as the PC telephone and television. It is precisely this revolution that the book addresses offering an up to date technical overview of developments in PC technology video and audio compression telecommunications and many other disciplines. Written as a series of tutorials the book starts with the fundamental techniques of digital audio and video moving on to compression techniques such as JPEG and MPEG. The delivery systems for multimedia are then covered starting with the CD and on to telephones local and wide area networks and ATM and ADSL. The final chapters describe how these technologies are brought together in some key applications video conferencing digital video broadcasting video on demand interactive television. Steve Heath is responsible for European Strategy and Technology Development at Motorola. He has had many years experience in computer design and has presented papers on multimedia technology at international conferences. He is a well known technical writer and has written fourteen other books for Focal Press Newnes and Butterworth Heinemann. Provided by publisher Multimedia Communication Technology Jens Ohm, 2012-12-06 Excellent textbook of multimedia signal processing also dealing with the optimization of multimedia communication systems. It covers the theoretical background of one and multidimensional signal processing statistical analysis and modeling coding and information theory as well as estimation and classification theory. Numerous practical examples are given for algorithms and design of multimedia signal compression and transmission systems for systems performing content analysis and indexing of multimedia signals. Principles behind multimedia coding and indexing standards e.g. MPEG 1 2 4 7 are explained in detail including the most recent developments like the new Advanced Video Coding standard and Motion Compensated Interframe Wavelet Coding. Numerous figures and examples illustrate the concepts. As the book is based on a graduate level university course most chapters are supplemented by exercises. The book is also a self contained introduction both for researchers and developers of multimedia communication systems in industries.
