Patrick Roy, 2001-12-12 Abstract In a first step this ERP derives the theoretical necessity to provide voluntary strategic and non financial Information It is argued that companies are an integral part of a common environment and society acting in a framework of interdependent relationships A company is more and more seen as a community of interests of different groups and it can only act in an optimal way if the demands of all groups are taken into account and its behaviour is adjusted accordingly In this context interest groups demands for company Information depend on the possibilities of improvements in decision making or monitoring that arise with its use which in turn is mainly determined by the potential of Information to reduce uncertainty in the areas of interest For external decision makers uncertainty often arises from sources about which conservative company statements provide little insight Due to the traditional finance oriented concept of disclosure this is particularly true for strategic and non financial aspects Related additional Information that is voluntarily provided can considerably reduce uncertainty even more so as part of audited statements Conventional financial reporting and existing disclosure requirements will generally not nearly satisfy those information needs of user groups Any economic action though should only be taken if related benefits are exceeding related costs This priority of economicalness also holds for companies production processing and disclosure of Information Therefore it is necessary to consider as detailed as possible potential opportunities and disadvantages for voluntarily disclosing company Information both on and outside capital markets This is done in a second major part of the present work First voluntary disclosure can potentially affect share prices and thereby the market value of the firm markets not being strong form efficient So by giving company Information a higher market value can directly be induced thereby potentially lowering the cost of capital which for example improves the company's competitive position in the battle for cheap additional financing **Bibliography of Hotel and Restaurant Administration** Margaret J. Oaksford, 1983 *Assigning Economic Value to Natural Resources* National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Commission on Geosciences, Environment, and Resources, 1994-02-01 There has been a lot of discussion among policymakers particularly within the Clinton Administration about how to make U S economic indicators such as GNP more accurately reflect the state of the environment This book explores the major issues and controversies involved in incorporating natural resources and the environment into economic accounts The first section of the volume based largely on a three day workshop of experts in the field explains the possibilities and pitfalls in so called green accounting This is followed by a selection of nine individually authored papers including one by Nobel prize winner Robert Solow that probe scientific aspects of this issues in greater depth *Accounting in the Developing Countries* Ahmed

Riahi-Belkaoui,1994 An elaboration of the major accounting principles and practices that affect the economic well being of developing countries The International Journal of Accounting Education and Research ,1986 Marketing sistemico e modelli del successo di mercato dell'impresa Alberto Marino,2007 Multinational Business Finance David K. Eiteman,Arthur I. Stonehill,1989 The Ninth Edition of this market leader communicates the complexities of international finance clearly and authoritatively The book features a streamlined presentation expanded attention to emerging markets several new chapters and four new decision cases with an emerging markets focus An accompanying new Casebook by Michael Moffett includes in depth decision cases keyed to the coverage in the Eiteman text The authors have a knack for communicating the complexities of international finance to today s students in a manner that is clear and understandable For anyone interested in business Monographic Series Library of Congress, *Library of Congress Catalogs* Library of Congress,1983
