**The Role of Multinational Companies in the Middle East** Mamarinta P. Mababaya, 2002 This study investigated whether known economic and international business theories available in the literature are meaningful enough to explain the nature existence and role of multinational companies MNCs in the Middle East particularly Saudi Arabia Two sets of questionnaires were distributed in major cities of Saudi Arabia one set for 100 multinational managers and another for 280 multinational customers 234 questionnaires were collected 45 from multinational managers and 189 from customers This represents a total response rate of 62 percent which is adequate for this study The empirical results supported with comprehensive secondary data confirmed virtually all of the research hypotheses The study found that joint ventures are the dominant form of multinational business in Saudi Arabia both in manufacturing and service industries The core roles of MNCs in the Saudi foreign ventures are evident in the cross border value adding activities of marketing trading manufacturing consulting contracting project management insurance hotel operation and banking Likewise MNCs provide licensing franchising financing services and various auxiliary roles in the Kingdom Therefore the multinationality of a firm or a group of firms operating across national boundaries is not necessarily synonymous with international production the main subject of contemporary multinational theories The respondents generally perceived the competitiveness of MNCs operating in Saudi Arabia as a function of a number of economic management marketing technological and other variables They also perceived the contributions of MNCs to the Kingdom's socio economic developments as significant and positive The study also found that understanding Islamic values and ethics is important for MNCs In this regard the researcher looked at some objective indicators of business success and related them to selected measures of MNCs local cultural awareness and responsiveness The results indicate that the business success of multinationals operating in Saudi Arabia is positively related to their local cultural awareness and responsiveness Along this line this study covers some vital elements of Islamic culture which will help MNCs understand further the cultural needs values and sensitivities of the Saudi people and Muslims in general

*Institutional Ownership and Multinational Firms* James J. Kennelly, 2019-05-23 This study represents a rare empirical test of the assertions of critics of multinational corporations MNCs who argue that firm level social and environmental

performance suffers as MNCs grow increasingly mobile and subject to the short term financial demands of institutional investors. Such critics argue that footloose and stateless MNCs have not only divorced themselves from a particular sense of responsibility to their home countries but have also fallen increasingly under the sway of the myopic demands of institutional investors. Using multiple regression analysis the study considered the impact of various levels of multinationality and institutional ownership on the social and environmental performance of US based manufacturing companies. Based on this empirical analysis the radical critique of MNCs was not supported. Rather the level of multinationality of firms was positively associated with social and environmental performance in the home country. This is a far cry from the demonized view of MNCs proffered by the critics. These findings suggest the possibility that MNCs may even have a positive influence on the development of a global economy that is consistent with the values and intent of vision of sustainable development. Ultimately the study suggests that at a minimum more attention should be paid to utilizing talents and competencies of MNCs in support of furthering positive social and environmental agendas.

The Oxford Handbook of International Business Alan M. Rugman, 2003 This handbook synthesises some literature of the last 40 years in 28 chapters. Globalization of Small Economies as a Strategic Behavior in International Business Sergio A. Castello, Terutomo Ozawa, 2014-05-01 This book postulates the proposition that small economies exhibit a higher degree of outward orientation and structural adaptability compared to their larger counterparts within the context of the European Union and two case studies i.e. Catalonia and New Zealand. The number of nations has doubled in the last half of the century to around 200 independent economic units. Moreover the break up of the former Soviet bloc into a large number of small independent nations in Central and Eastern Europe and the continued threat of separatist groups i.e. Canada, Spain and Sri Lanka have sparked economists' interest to focus on the size of nations once again. This book offers a more comprehensive measurement of smallness than the conventional one for the analysis of the globalization strategies and flexibility of countries to overcome smallness. Small independent economic units when economically successful tend to be more export focused in manufacturing, likely to specialize in differentiated manufactures, more actively involved with direct overseas businesses, more sensitive in strategically managing exchange rates, likely to be in a better position to achieve price stability, more actively involved in international trade through varying degrees of economic integration, likely to have a higher degree of flexibility, more actively involved to forge a complementary government-firm relationship and likely to have a higher degree of corporatism

**The Political Economy of Globalization** Satya Dev Gupta, 2012-12-06 Globalization is transforming the world at an accelerated pace Integration of the world continues widening and intensifying international linkages in economic political and social relations Liberalization of trade and finance lubricated by revolutionary changes in information technology has resulted in significant economic growth at the global level On the other hand the process of globalization is changing the nature of production relations threatening the traditional roles of the nation state and carrying with it far reaching implications for sustainable growth development and the environment Although both developed and developing countries are actively participating in this saga of globalization nearly ninety countries as the United Nations Human Development Report 1996 indicates are worse off economically than they were ten years ago leading to global polarization between haves and have nots

The report further indicates that the gap between the per capita incomes of the industrialized world and the developing countries far from narrowing has more than tripled during the last thirty years Further a majority of the countries benefitting from this globalization drive have seen a rise in inequality and poverty This failure of market driven globalization to reward the benefits equitably led the United Nations to proclaim 1996 as the International Year for the Eradication of Poverty IYEP and the decade of 1997 2006 as the international decade for the eradication of poverty and to promote people centered sustainable development Multinational Enterprises from the Netherlands Rajneesh Narula,Roger van Hoesel,2002-09-11 Despite the long history of international economic activity and the dominant role of Dutch MNEs in the world economy there has been relatively little academic research in the area This book explores issues such as What historical precedents underlie the character of Dutch MNE activity How and why the technological specialisation of the Dutch economy and its firms has evolved to its current state The changing FDI activity of Dutch MNEs The strategic aspects of Dutch MNE activity in terms of location and R D The implications for Dutch MNEs of globalisation and economic integration Comprehensive in its coverage this book will be of great interest to students and researchers in international business Multinational Enterprise and Public Policy A. E. Safarian,1993-01-01 This book should be recommended to all students of international economic policy and international business It contains a clear and comprehensive conceptualisation of public policy on MNE allowing the classification and evaluation of country policies The author supplies a vast amount of institutional policy details and economic data which are interesting in their own right Thorsten Posselt Kyklos **The Nature of the Transnational Firm** Christos Pitelis,Roger Sugden,2005-06-23 The Nature of the Transnational Firm brings together the major approaches to the transnational firm in one volume Leading thinkers present overviews of a vibrant theoretical literature and assess the current state of analysis Thoroughly revised and updated to take account the explosive growth of foreign direct investment in the 1990s this volume will be welcomed by students and researchers of international business international economics and business economics Contributors include John Cantwell John H Dunning Edward M Graham Jean Francois Hennart Neil Kay Historical Studies in International Corporate Business Alice Teichova,Maurice Lévy-Leboyer,Helga Nussbaum,2002-07-18 This 1989 book is the sequel to Multinational Enterprise in Historical Perspective 1986 in which the same editorial team continues the historical exploration of a vital but often misconstrued commercial phenomenon The contributory essays each written by an authority in the field raise further questions on the idea of the firm on periodisation and on research and development and examine the international financial operations of worldwide corporate business With the aid of trans industrial and transnational comparisons the range of policies pursued by business and government is fully discussed Above all this discussion is extended to include the production of mass consumer goods and the areas of China Japan and Latin America All the contributions are based on original historical research undertaken in national and private bank and business archives in Europe the USA and Japan In their critical assessments and interpretations the authors are also able to combine

economic theory with history      **The Globalization of Corporate Governance** Alan Dignam, Michael Galanis, 2016-03-09  
 The process of economic globalization as product and capital markets have become increasingly integrated since WWII has placed huge and it is argued by some irresistible pressures on the world's insider stakeholder oriented corporate governance systems. Insider corporate governance systems in countries such as Germany so the argument goes should converge or be transformed by global product and capital market pressures to the superior shareholder oriented outsider corporate governance model prevalent in the UK and the US. What these pressures from globalization are how they manifest themselves whether they are likely to cause such a convergence transformation and whether these pressures will continue lie at the heart of the exploration in this volume. *The Globalization of Corporate Governance* provides a detailed analysis of the evolution of the key corporate governance systems in the UK the US and Germany from the perspective of the development of economic globalization. As such it is a valuable resource for those interested in how economic and legal reforms interact to produce change within corporate governance systems      *New Challenges for International Business Research* John H. Dunning, 2010-01-01 In this final collection of his essays John Dunning looks back on more than 40 years of research in International Business IB whilst at the same time considering possibilities for the future      *Foreign Direct Investment* Leena Ajit Kaushal, 2019-04-29 This research based book offers insight to the changing perspectives regarding FDI from traditional theory to new theory from local to global link and from opportunity to responsibility. Readers will understand the various factors determinants and theories that underpin the presence of firms in the global economy. The author illustrates by way of case studies specific implications of FDI policy and practice on issues like ecology and environment technology transfer labor market and relevance of further liberalization policies in FDI in the context of Indian economy. The coverage for such an important theme is too vast to cover in a single volume therefore this volume restricts its analysis to a select few themes in hopes that this endeavor will trigger an ongoing debate on myriad aspects and concerns of FDI on countries like India.

Wilson, 2010-02-25 Business is one of the major power centres in modern society. The state seeks to check and channel that power so as to serve broader public policy objectives. However, if the way in which business is governed is ineffective or overburdensome, it may become more difficult to achieve desired goals such as economic growth or higher levels of employment. In a period of international economic crisis, the study of how business and government relate to each other in different countries is of more central importance than ever. These relationships have been studied from a number of different disciplinary perspectives: business studies, economics, economic history, law, and political science, and all of these are represented in this handbook. The first part of the book provides an introduction to the ways in which five different disciplines have approached the study of business and government. The second section on the firm and the state looks at how these entities interact in different settings, emphasising such phenomena as the global firm and varieties of capitalism. The third section examines how business interacts with government in different parts of the world, including the United States, the EU, China, Japan, and South America. The fourth section reviews changing patterns of market governance through a unifying theme of the role of regulation. Business-government relations can play out in divergent ways in different policy areas, and the fifth section examines the contrasts between different key arenas such as competition policy, trade policy, training policy, and environmental policy. The volume provides an authoritative overview with chapters by leading authorities on the current state of knowledge of business-government relations, but also points to ways in which this work might be developed in the future, e.g. through a political theory of the firm.

**British Multinational Banking, 1830-1990** Geoffrey Jones, 1993. Analyses the emergence, growth, and performance from the 1830s to the present.

**Structural Change in the World Economy (Routledge Revivals)** Allan Webster, John H. Dunning, 2013-09-13. The chapters in this edited collection, first published in 1990, examine the key aspects of change in the global economy at the end of the twentieth century and the role of national government policies in this. Drawing on material from a wide range of disciplines, including international trade, technology, and economic history, the authors discuss the implications of these changes for the world's leading capitalist economies. With an analysis of the prospects for the future, this relevant title will be of particular value to students of business studies and economics, and those researching the global economy over the past thirty years.
