Rugman, Alain Verbeke, 2017-10-10 At the end of the twentieth century international business functioned in an environment dominated by the triad of economic power formed by the USA Japan and the European Community Multinational corporate strategies had to be formulated within the context of intense global competition between these three economic blocs This book first published in 1990 analyses the interplay between the trade policies adopted by the major powers and the competitive strategies of international corporations With particular reference to trade relations between Canada and the USA the effects of Japanese multinational dominance and the implications of European economic integration this volume throws new light on the interaction between international business and government trade policies *Contemporary Corporate Strategy* John Saeed, 2007-12-21 With the onset of the third millennium increasing numbers of corporations around the world have been undergoing cultural and mindset shift paradigms whilst developing corporate strategies that are increasingly attuned to the highly competitive and dynamic business realities arising from globalising national economies around the world This research book represents an eclectic collection of latest research articles and empirical studies conducted in different parts of the world on corporate strategy including usually neglected countries of study such as Germany Turkey Greece and Spain This research book contains over twenty research papers examining various aspects of corporate strategy in different national and international settings this book is intended to equip readers with the latest knowledge to understand the complexities of corporate strategy both at a theoretical and operational levels Further the book is specifically written with the needs of the students of strategy both at an undergraduate and postgraduate who may want to gain contemporary knowledge of strategy based on empirical research *Acquisitions and Corporate Strategy* David R. King, 2022-04-19 Corporate restructuring acquisitions alliances and divestment is a visible form of corporate strategy For example firm investments in buying and selling assets exceed the gross domestic product of the majority of nations Most research in this area examines acquisitions but informing practice is limited by examining acquisitions in isolation or using a narrow focus For example a lingering problem is that average acquisition performance is consistently around zero suggesting a need to identify practically relevant relationships In addressing this need research on three fundamental questions is covered 1 How do acquisitions relate to other corporate strategy options 2 What helps to predict acquisition performance and 3 What are persistent acquisition research issues The first question is intended to overcome a research limitation that acquisitions are often examined independent of other corporate strategies including internal development alliances and divestment The second question addresses novel relationships associated with the primary focus of acquisition research in examining what drives acquisition performance The third question reflects on the underlying complexity of the phenomenon that makes it a

challenge to identify what drives acquisition performance Overall the intent of presenting ideas on these fundamental questions is to illustrate promising areas for future research This book presents the latest state of knowledge on the topic and will be of interest to researchers academics and advanced students in the fields of strategic management international business and organizational studies *International Business Strategy in Emerging Country Markets* Hans
