Corporations and International Lawmaking Stephen Tully, 2007-11-30 The classical model of international lawmaking posits governments as exclusively authoritative actors. However, commercially oriented entities have long been protagonists within the prevailing international legal order, concluding contracts and resolving disputes with governments. Is the international legal personality of corporations undergoing further qualitative transformations? Corporations influence the State practice constitutive of custom and create, refashion, or challenge normative rules. The corporate willingness to fill legal lacunae where governments do not exercise their full regulatory responsibility is also observable through resort to alternative legal mechanisms. Corporations moreover contribute directly to treaty negotiations and occupy crucial roles during subsequent implementation. Indeed, an analysis of the access conditions and participatory modalities for non-State actors could support a right to participate under common international procedural law. Their substantive contributions are also evident when corporations participate in enforcing international law against governments through national courts, diplomatic protection, including the WTO and arbitration, including NAFTA. However, the practice of intergovernmental organizations reveals several challenges, including managing corporate interaction with developing country governments and other non-State actors. Acknowledging corporate contributions also has important implications for national regulatory autonomy, the ability of governments to mediate contested policy issues, the democratic legitimacy of the contemporary lawmaking process, and an understanding of consent as the underlying basis for international law.

Multinational Corporations and International Law: Accountability and Compliance Issues in the Petroleum Industry Emeka Duruigbo, 2021-10-01 The author proposes that international law can be strengthened by incorporating and integrating multinational corporations more fully into the international legal system. The establishment of international norms of corporate responsibility and accountability under accepted international law could thereby lead to mutual benefits. Multinational corporations would enjoy *de jure* protections enhancing their global business activities, and countries where these corporations have considerable social, economic, and environmental effect on their communities will have recourse to hold corporations accountable for harmful actions. Published under the Transnational Publishers imprint.

The Challenge Of The New International Economic Order Edwin P Reubens, 2019-07-11 This volume deals with the recent proposals in the United Nations and elsewhere for reconstructing the existing economic relations between less developed and more developed countries The contributors to the book undertake to clarify the NIEO proposals asking specifically to what extent they are really new fully international realistically economic and are the constituents of workable order The confrontation of NIEO demands and real world constraints is a leading feature of the book and each of the chapters deals with one or more elements of the NIEO proposals against the background of relevant conditions in both the countries and the international institutions and practices that interrelate them The authors arrive at a considerable degree of consensus mostly agreeing that the NIEO is not really a new order but endorsing specific NIEO proposals that will achieve gradual progress for LDCs in absolute terms
