Multinational Firms and International Relocation Peter J. Buckley, Jean Louis Mucchielli, 1997 Recoge 1 Introduction 2 European industrial relocations in low wage countries policy and theory debates 3 Multinational firm strategies and the impact of their location decisions 4 Low wage countries and trade with the European Union 5 International relocation strategies of Italian firms 6 US direct investment abroad and US exports in the manufacturing sector some empirical results based on cross sectional analysis *Multinational Firms* John Dunning, Jean-Louis Mucchielli, 2001-12-13 This volume presents the work of specialists on multinational strategy addressing the main questions of globalization competitiveness the impact of regionalism agglomeration strategic location choice and relocation and public aid *Multinational Firms' Location and the New Economic Geography* Jean Louis Mucchielli, Thierry Mayer, 2004-01-01 The choice of location for the production plants of multinational firms is an important issue not least because this decision is accompanied by so many fears brought into public debate This book analyses how foreign direct investors choose their locations whilst exploring the forces which shape international economic geography Although these two issues are to some extent inter related researchers have only recently acknowledged the similarity of economic geography and international business approaches to the empirical assessment of likely causes of the degree of spatial concentration observed in many modern industries Giving insight into the direction that future research should take this book contains state of the art papers on both theoretical and empirical levels This original collection makes a particularly important contribution to our understanding of the existence and impact of home market effects Introducing a welcome synthesis between two related and yet rarely integrated areas of study using case studies of firms in Europe US MNEs and the Mexican automobile industry this book will be welcomed by both academic and practising economists Regional scientists and *The Multinational Firm* Glenn Morgan, Peer Hull Kristensen, Richard Whitley, 2003 In contrast to the traditional view of multinational firms as cohesive rational actors maximizing the use of resources across national boundaries the contributors to this volume argue that they are complex social arenas where competing groups draw on resources from their own socially embedded locations in developing new transnational social relationships As firms seek to manage across national and institutional boundaries they stretch their existing capacities and routines and develop new sets of transnational social relationships through different groups competing and cooperating These processes occur at a number of levels which are explored in different empirical settings Firstly at the level of governance multinational firms may develop conflicts between investors from different national contexts e g between the arms length orientation of Anglo Saxon institutional investors and the more committed orientation of investors in certain European and Asian contexts The tension between opening the firm up for foreign investors in order to have access to more and cheaper capital and the consequent effects on management strategy is explored in a number of chapters Secondly at the level of coordinating activities across different sites multinationals may encourage competition between plants in different

countries as well as seeking to transfer best practices The result may be pressure on managers and employees in certain plants to give up traditional practices and employment rights Thirdly multinational firms operate in environments where other forms of coordinating international business activity may also occur e g cartels or the creation of international regulatory activity They therefore compete for the regulatory space in complex political environments that will enable them to prosper

Growth and Organizational Change in the Multinational Firm John M. Stopford,1980 *International Relocation* Wendy Coyle,Sue Shortland,1992 Failed overseas assignments can damage both businesses and employees Preparing employees for an assignment abroad is of increasing significance as companies globalize This book provides examples of current practice in international relocations and discusses the effects of relocation stress
