reading for students taking courses in International Business Business History Multinationals and Entrepreneurship and of interest to academics and researchers working in these areas *The State of Capitalism* Costas Lapavistas, EReNSEP Writing Collective, 2023-08-29 Thinking beyond pandemic capitalism The health emergency that broke out in 2020 is a landmark event in the development of capitalism confirming the underlying change signalled by the Great Crisis of 2007 9 The pandemic has catapulted the state to the centre of economic activity However a historic impasse is steadily becoming apparent at the core of the world economy Productive accumulation is flaccid as both profitability and labour productivity are weak Financialisation has entered a new phase as shadow banking grew relative to other banks but is entirely dependent on the state The power of the state derives from command over fiat money and can certainly deliver enormous boosts to aggregate demand but that is not enough to tackle the weakness of the productive sector The rise in inflation for the first time in forty years indicates the impasse There is a transparent need for intervention on the supply side directly challenging capitalist property rights There is no evidence however that the ruling blocs in core countries would engage in such policies The pandemic crisis also brought to the fore fresh divisions of core and periphery across the world economy Imperialism has assumed new forms spurred by globally active financial capital and internationalised productive capital A renewed contest for hegemony has emerged as US power declined The economic challenge of China will unfold steadily in the years ahead intensifying political tensions and military rivalries This book is the work of a research collective comprising authors from several parts of the world It analyses these vital issues from the perspective of Marxist political economy and puts forth alternative anticapitalist proposals **Understanding Multinationals from Emerging Markets** Alvaro

Cuervo-Cazurra, Ravi Ramamurti, 2014-06-26 Why have relatively poor and underdeveloped countries been able to spawn so many global firms in the last two decades Are emerging market multinationals EMNCs really different from successful multinationals from developed economies This book tackles these and other fundamental theoretical questions about EMNCs A distinguished group of researchers assesses the unique strategies and behavior of successful EMNCs from the Chinese telecommunications firm Huawei to the Indian conglomerate Tata to the South African beverages firm SABMiller They address a range of topics such as the drivers of internationalization by EMNCs their distinctive process capabilities how they catch up with established rivals on technology how state ownership or business group affiliation affects their behavior and why they sometimes relocate their headquarters to advanced economies This book will appeal to scholars and graduate students in global strategy and international business as well as consultants of multinational companies looking for state of the art analysis of EMNCs **Trading Locomotives** Naofumi Nakamura, 2025-07-08 The proliferation of railroads around the world was integral to the emergence of a global market based economy at the turn of the twentieth century This deeply researched and comprehensive book examines the history of rail in Japan from a global perspective offering new insight into the connections between the world economy and Japan s industrialization Naofumi Nakamura traces the international

locomotive trade and the growth of the Japanese railway industry considering its ties to Japan's domestic economic development and later imperial expansion. He investigates locomotive manufacturing and distribution in the late nineteenth and early twentieth centuries focusing on how this industry came to Japan and then became a major domestic sector. Nakamura argues that rail introduced as an essential tool for nation state building was transformed into a tool for empire after the late 1890s. Japan sought to develop its domestic economy in response to globalization yet had to balance the desire to localize industry with its imperial ventures. This necessitated imports from Western manufacturers until just before the First World War by which time a domestic rail industry formed through government led technology transfer and development found new outlets in Japan's colonies and sphere of influence. Drawing on an extensive array of archival materials Trading Locomotives sheds new light on the transnational nature of the industrial revolution in Japan and the world. Masrani, Carlo J. Morelli, Amiya K. Bagchi, 2022-09-29 This book uses a combination of business history and political economy to chart the development of Indian business organisation from independence in 1947 through to the twenty first century. The Indian economy has undergone a dramatic transformation to become one of the leading global economies of the twenty first century. After ending colonisation and gaining independence in 1947 the economy moved from a reliance on the export of raw materials to an era of state promoted development followed by an era of liberalisation and integration in the world economy by the close of the twentieth century. This book looks at traditional industries such as textiles to industries of the second and third industrial revolution ranging from chemicals and oils to telecommunications. This book highlights how Indian businesses proved capable of importing both new managerial ideas and organisational developments while adapting them to the specific domestic context. The case studies underline the use of human resource management in the post colonial indianisation of foreign owned multinationals and the rise of new business organisation and management training in the development of Indian multinational organisations such as Tata Sons. The chapters in this book were originally published as a special issue of Business History. beliefs of organizational members about their organization's social responsibilities vary according to their function and department as well as their own managerial fields of knowledge. A Stakeholder Approach to Corporate Social Responsibility provides a comprehensive collection of cutting edge theories and research that can lead to a more multifaceted understanding of corporate social responsibility in its various forms, the pressures and conflicts that result from these different understandings and some potential solutions for reconciling them. Settler Economies in World History

,2013-01-08 Settler colonialism was a major aspect of the imperial age that began in the sixteenth century and has encompassed the whole world unto the present. Modern settler societies have together constituted one of the major routes to economic development from their foundation in resource abundance and labour scarcity. This book is a major and wide ranging comparative historical enquiry into the experiences of the settler world. The roles of indigenous dispossession, large scale immigrant labour, land abundance, trade capital and the settler institutions are central to this economic formation and its history. The chapters examine those economies that emerged as genuine colonial hybrids out of their differing neo-European backgrounds with distinctive post independence structures and an institutional persistence into the present as independent states. Contributors include Stanley Engerman, Susan Carter, Henry Willebald, Luis Bertola, Claude L. Tzelschwab, Frank Tough, Kathleen Dimmer, Tony Ward, Drew Keeling, Carl Mosk, David Meredith, Martin Shanahan, John K. Wilson, Bernard Attard, Grietjie Verhoef, Tim Rooth, Francine McKenzie, Jorge Alvarez, Jim McAloon as well as the editors. **Singapore - Two**

Hundred Years of the Lion City, Anthony Webster, Nicholas White, 2019-10-29 Two hundred years after Singapore's foundation by Stamford Raffles in 1819, this book reflects on the historical development of the city, putting forward much new research and new thinking. It discusses Singapore's emergence as a regional economic hub, explores its strategic importance and considers its place in the development of the British Empire. Subjects covered include the city's initial role as a strategic centre to limit the resurgence of Dutch power in Southeast Asia after the Napoleonic Wars, the impact of the Japanese occupation and the reasons for Singapore's exit from the Malaysian Federation in 1965. The book concludes by examining how Singapore's history is commemorated at present, reinforcing the image of the city as prosperous, peaceful and forward looking, and draws out the lessons which history can provide concerning the city's likely future development. *Liability of*

Corporate Groups and Networks, Christian A. Witting, 2018-01-11 Discusses the nature of corporate groups and networks and provides arguments for rules extending liability beyond insolvent entities. *Paris to New York*, Véronique

Pouillard, 2021-05-04 An innovative history of the fashion industry focusing on the connections between Paris and New York, art and finance and design and manufacturing. Fashion is one of the most dynamic industries in the world with an annual retail value of 3 trillion and globally recognized icons like Coco Chanel, Christian Dior and Yves Saint Laurent. How did this industry generate such economic and symbolic capital? Focusing on the roles of entrepreneurs, designers and institutions in fashion's two most important twentieth century centers, Paris to New York tells the history of the industry as a negotiation

between art and commerce In the late nineteenth century Paris based firms set the tone for a global fashion culture nurtured by artistic visionaries In the burgeoning New York industry however the focus was on mass production American buyers trend scouts and designers crossed the Atlantic to attend couture openings where they were inspired by and often accused of counterfeiting designs made in Paris For their part Paris couturiers traveled to New York to understand what American consumers wanted and to make deals with local manufacturers for whom they designed exclusive garments and accessories The cooperation and competition between the two continents transformed the fashion industry in the early and mid twentieth century producing a hybrid of art and commodity Vronique Pouillard shows how the Paris New York connection gave way in the 1960s to a network of widely distributed design and manufacturing centers Since then fashion has diversified Tastes are no longer set by elites alone but come from the street and from countercultures and the business of fashion has transformed into a global enterprise

Formulating development Lola Wilhelm, 2025-09-02 In the 1970s Nestl became a lightning rod for criticism against the food industry s negative impacts on humans and their environment especially in the Global South But what has so far eluded historical scrutiny is that the picture was more nuanced This book tells the exclusive story of how the Swiss food giant and more broadly corporate capitalism have shaped the aid industry since the late nineteenth century It follows Nestl s bid for a share of the humanitarian market brokered by the Red Cross in wartime Europe of its clinical trials in Swiss and Senegalese maternities and of its agricultural modernisation schemes in Mexico India and the Ivory Coast Based on extensive research in the firm s own historical archives and the records of national and international aid agencies the volume interrogates the legacies of this long history for international development today
