**Multiple Intelligences** M.C. Hall,1999      **Becoming a Multiple Intelligences School** Thomas R. Hoerr,2000-02-15

In this invaluable book Tom Hoerr relates a decade s worth of MI experiences at St Louis New City School We learn about the staff s initial exposure to MI theory the many activities some more successful than others that were undertaken by faculty and staff in teaching curriculum adult development and assessment the challenges that the leader faces in attempting to bring about significant and lasting change Especially compelling are the continuing efforts to develop the personal intelligences during a period when issues of diversity multiculturalism and standards loom so large Hoerr underscores the centrality of collegiality the problems posed by transient students and faculty the complementary role played by public exhibitions and standardized test scores the role of friends in determining the activities and intelligences favored by children the delicate line between support and challenge that the leader must walk the tension between excellence and perfection I value the concrete examples as well as the ties to important conceptual work such as that undertaken by Roland Barth on collegiality Peter Salovey on emotional intelligence and Peter Senge on the learning organization Achieving excellence has always been a process Hoerr makes it abundantly clear that the effort to use MI ideas effectively must remain on the agenda Still I can testify that over a 10 year period clear palpable impressive progress can be made We can improve schools significantly but only if we take the long view and do not settle for patchwork fixes Note This product listing is for the Adobe Acrobat PDF version of the book      Mathematics and Science for Students with Special Needs Eisenhower National Clearinghouse for Mathematics and Science Education,2003      **A Charter School Principal's Story** Barbara Smith,2017-12-05 What happens when a Canadian principal guided by the teachings of Fullan and Hargreaves takes on the role of school leader in an inner city charter school in the United States This inside story of a principal in the DC charter school system reveals much about the desire for educators and students to experience more than a life of multiple choice testing that tends to be so commonplace in these schools While such a case adds to the mound of research that supports the change takes time findings it nevertheless demonstrates the reality on a day to day basis of what s worth fighting for in schools Student and teacher engagement and empowerment matter and to get to such ends a school must fiercely focus on targets well beyond test scores This book speaks about how a budget reveals school values and by shifting resources to support staff and student development a school coping with regular turnover can be filled with more confident and capable community members A school crawling with leaders emerged as more student teacher and non instructional staff were supported in new roles aimed at building an inspired culture with the talent and capacity to move others to action The old ways of doing school do not address the needs of the 21st century learner and while many forces with limited views of education were at play this story does provide an example of what promising things can and should happen to increase engagement and learning in more charter schools across America Dr Barbara Smith s narrative of her times in public charter
