Health Effects of Exposure to Low Levels of Ionizing Radiation National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on the Biological Effects of Ionizing Radiation (BEIR V), 1990-02-01 This book reevaluates the health risks of ionizing radiation in light of data that have become available since the 1980 report on this subject was published. The data include new much more reliable dose estimates for the A bomb survivors, the results of an additional 14 years of follow up of the survivors for cancer mortality, recent results of follow up studies of persons irradiated for medical purposes and results of relevant experiments with laboratory animals and cultured cells. It analyzes the data in terms of risk estimates for specific organs in relation to dose and time after exposure and compares radiation effects between Japanese and Western populations. *Directory of Published Proceedings*, 1990. *Current Catalog* National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70. **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1987. Pérez, Roberto Rivera, Melissa N. Martínez, 2017-02-13. A one stop guide for public health students and practitioners learning the applications of classical regression models in epidemiology. This book is written for public health professionals and students interested in applying regression models in the field of epidemiology. The academic material is usually covered in public health courses including i Applied Regression Analysis ii Advanced Epidemiology and iii Statistical Computing. The book is composed of 13 chapters including an introduction chapter that covers basic concepts of statistics and probability. Among the topics covered are linear regression model, polynomial regression model, weighted least squares methods for selecting the best regression equation and generalized linear models and their applications to different epidemiological study designs. An example is provided in each chapter that applies the theoretical aspects presented in that chapter. In addition, exercises are included and the final chapter is devoted to the solutions of these academic exercises with answers in all of the major statistical software packages including STATA, SAS, SPSS and R. It is assumed that readers of this book have a basic course in biostatistics, epidemiology and introductory calculus. The book will be of interest to anyone looking to understand the statistical fundamentals to support quantitative research in public health. In addition, this book is based on the authors' course notes from 20 years teaching regression modeling in public health courses. Provides exercises at the end of each chapter. Contains a solutions chapter with answers in STATA, SAS, SPSS and R. Provides real world public health applications of the

theoretical aspects contained in the chapters Applications of Regression Models in Epidemiology is a reference for graduate students in public health and public health practitioners ERICK SU REZ is a Professor of the Department of Biostatistics and Epidemiology at the University of Puerto Rico School of Public Health He received a Ph D degree in Medical Statistics from the London School of Hygiene and Tropical Medicine He has 29 years of experience teaching biostatistics CYNTHIA M P REZ is a Professor of the Department of Biostatistics and Epidemiology at the University of Puerto Rico School of Public Health She received an M S degree in Statistics and a Ph D degree in Epidemiology from Purdue University She has 22 years of experience teaching epidemiology and biostatistics ROBERTO RIVERA is an Associate Professor at the College of Business at the University of Puerto Rico at Mayaguez He received a Ph D degree in Statistics from the University of California in Santa Barbara He has more than five years of experience teaching statistics courses at the undergraduate and graduate levels MELISSA N MART NEZ is an Account Supervisor at Havas Media International She holds an MPH in Biostatistics from the University of Puerto Rico and an MSBA from the National University in San Diego California For the past seven years she has been performing analyses for the biomedical research and media advertising fields
