Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1978 El-Hi Textbooks & Serials in Print, 2005 ,2005 *El-Hi Textbooks & Serials in Print, 2003* ,2003 **Introduction to Neurogenic Communication Disorders** Robert H. Brookshire, Malcolm R. McNeil, 2014-09-16 Get the tools you need to evaluate, diagnose and treat patients with neurogenic communication disorders. Introduction to Neurogenic Communication Disorders 8th Edition provides a solid foundation in the neurology of communication as well as the causes, symptoms, diagnosis, assessment and management of commonly encountered neurogenic communication disorders in adults. A concise, evidence-based approach shows how to measure and treat abnormalities such as aphasia, dysarthria, right hemisphere syndrome and traumatic brain injury syndrome. This edition is updated with new coverage of laboratory tests, blast-related injuries to the head and medications for dementia. Created by neurogenic communication disorders educator Robert H. Brookshire and continued by Malcolm R. McNeil, this bestselling text will enhance your skills in the rehabilitation of clients with neurogenic communication disorders. A clear, concise approach makes complex material easy to follow and understand. Clinical vignettes show how to apply principles to practice and illustrate how patients are evaluated and treated. Thought questions at the end of each chapter are based on realistic scenarios and challenge you to assess your understanding, think critically and apply information to clinical situations. Suggested answers are included in the appendix. Clinically relevant sidebars include related facts, information and tips for recall or therapy. More than 200 photographs and images include anatomic illustrations, scans using various brain imaging techniques and examples of assessment tests. Evidence-based practice is reinforced by the use of scientific evidence-based rationales to support the effectiveness of treatment approaches. Student-friendly features enhance learning with chapter outlines, critical thinking exercises, medical protocols, sample paperwork, patient transcripts, commonly used medical abbreviations and a glossary with definitions of key vocabulary. General Concepts summary points highlight the most important material in each chapter. NEW content on closed head injuries as a consequence of blast injury is included in the Traumatic Brain Injury chapter, addressing a pathophysiology often found in Iraq and Afghanistan war veterans. UPDATED content includes new information on medications for treatment of persons with dementia, the latest laboratory tests for neurologic assessment and the most current cognitive rehabilitation approaches. NEW More Thought questions in each chapter help you apply concepts to clinical situations. Additional content on evidence-based practice includes systematic reviews and meta-analyses relating to the efficacy and effectiveness of specific treatment approaches. Additional graphics, clinical photographs and tables depict key information and concepts. **SRA Multiple Skills Series** Richard A. Intrinsic motivations and open-ended development in animals, humans, and robots Gianluca Baldassarre,Tom Stafford, Marco Mirolli,Peter Redgrave,Richard Michael Ryan,Andrew Barto,2015-02-10 The aim of this Research Topic for Frontiers in Psychology under the section of Cognitive Science and Frontiers in Neurorobotics is to present state of the art research whether theoretical empirical or computational investigations on open ended development driven by intrinsic motivations The topic will address questions such as How do motivations drive learning How are complex skills built up from a foundation of simpler competencies What are the neural and computational bases for intrinsically motivated learning What is the contribution of intrinsic motivations to wider cognition Autonomous development and lifelong open ended learning are hallmarks of intelligence Higher mammals and especially humans engage in activities that do not appear to directly serve the goals of survival reproduction or material advantage Rather a large part of their activity is intrinsically motivated behavior driven by curiosity play interest in novel stimuli and surprising events autonomous goal setting and the pleasure of acquiring new competencies This allows the cumulative acquisition of knowledge and skills that can later be used to accomplish fitness enhancing goals Intrinsic motivations continue during adulthood and in humans artistic creativity scientific discovery and subjective well being owe much to them The study of intrinsically motivated behavior has a long history in psychological and ethological research which is now being reinvigorated by perspectives from neuroscience artificial intelligence and computer science For example recent neuroscientific research is discovering how neuromodulators like dopamine and noradrenaline relate not only to extrinsic rewards but also to novel and surprising events how brain areas such as the superior colliculus and the hippocampus are involved in the perception and processing of events novel stimuli and novel associations of stimuli and how violations of predictions and expectations influence learning and motivation Computational approaches are characterizing the space of possible reinforcement learning algorithms and their augmentation by intrinsic reinforcements of

different kinds Research in robotics and machine learning is yielding systems with increasing autonomy and capacity for self improvement artificial systems with motivations that are similar to those of real organisms and support prolonged autonomous learning Computational research on intrinsic motivation is being complemented by and closely interacting with research that aims to build hierarchical architectures capable of acquiring storing and exploiting the knowledge and skills acquired through intrinsically motivated learning Now is an important moment in the study of intrinsically motivated open ended development requiring contributions and integration across a large number of fields within the cognitive sciences This Research Topic aims to contribute to this effort by welcoming papers carried out with ethological psychological neuroscientific and computational approaches as well as research that cuts across disciplines and approaches
