Expert Systems in Mineral and Metal Processing A. J. Niemi, S.L. Jamsa-Jounela, 2016-09-01 Within the metal and mining industries the use of expert systems for monitoring

and control is on the increase The content of each paper had to include both expert systems neural networks or fuzzy control The papers were evenly contributed from industry universities and research institutes thus this book provides a valuable insight into the theoretical as well as the practical applications currently in use within the industry **Applications of Adaptive Control** Kumpati S. Narendra,2012-12-02 Control Applications of Adaptive covers the proceedings of the 197 Workshop on Applications of Adaptive Control held in Yale University This book is organized into five parts encompassing 18 chapters that summarize the potential application of adaptive control to many practical problems Part I contains tutorials that bring together important results in two of the most studied approaches to adaptive control namely self tuning regulators and model reference adaptive control MRAC with a particular emphasis on the importance of error models in the stability analysis of MRAC Part II examines the algorithms used for adaptive signal processing while Part III describes the types of power systems problems that could benefit from application of adaptive control and how to apply adaptive control algorithms for controlling large electric generators Part IV highlights adaptive control in aircraft systems This part also considers how adaptive control fell into disfavor in the flight control community illustrating the existence of residual negative bias The desirability of cost elimination of air data sensors in less sophisticated flight control systems is also discussed Part V addresses the application of process control to chemical processes and to electromechanical systems This part also shows the robustness and superior tracking and regulation properties of model reference adaptive control applied to liquid level control Discussion on various classes of model reference adaptive controllers in a common framework from the viewpoint of microcomputer implementation is also included This book will be of value to control system theorists and practitioners
