Practical General Practice Alex Khot, Andrew Polmear, 2011-11-18 Practical General Practice is a highly practical manual specifically designed for use during the consultation process. Containing over 1000 conditions, the unique underlying structure of the book allows the GP to see immediately what treatment is recommended and why. All recommendations are highly specific, giving a firm guide to the GP during the consultation process rather than a list of possibilities that the GP might wish to consider. Bullet points for action which give the GP an immediate summary of the issues that must be covered in the consultation. Bullet points of the key evidence which justifies those recommendations. All chapters thoroughly revised to reflect changes in the evidence and in major guidelines since the last edition. NNT values provided when available.

Rhinencephalon, Tabes dorsalis and Elpenor's Syndrome Régis Olry, Duane E. Haines, 2022-02-23 This book is a fascinating collection of various neuroscience terms coined over the last centuries. Each of the 45 chapters in this book dives deep into the etymologies, vernacular subtleties and historical anecdotes relating to these terms. The book illustrates the rich and diverse history of neuroscience which has borrowed and continues to borrow terms and concepts from across cultures, literature and languages. The ever-increasing number of terms that needed to be coined with the mushrooming of the field required neuroscientists to show astonishing imagination and creativity, leading them to draw inspiration from Graeco-Roman mythology, Elpenor's syndrome, literature, Laesthenie de Ferjol's syndrome, theatre, Ondine's curse, Japanese folklore, Kanashibari, and even the Bible, Matthew effect. This book will be of immense interest to scholars and researchers studying neuroscience, history of science, anatomy, psychology and linguistics. It will also appeal to any reader interested in learning more about neuroscience and its history. All the chapters included in this book were originally published in a column that appeared from 1997 to 2020 in the Journal of the History of the Neurosciences.

Understanding Parent Blame Luke Clements, Ana Laura Aiello, 2025-07-24 Blame the parents. It's a common reaction to any failure in children's behaviour or to their safety and yet so many issues from education and economic to social care and mental health arise from the failure of the state to provide adequate support to children and their families. This edited collection brings together academics, practitioners and activists along with contributions from parents and young people who have experienced the trauma of being caught up in the process of blame. It explores the nature and causes of parent blame and interrogates its prevalence, impact and potential pathways for reform.

Children in Family Contexts Lee Combrinck-Graham, 2006-03-16 The noted contributors represent diverse theoretical approaches but all share a focus on the family as the primary context of development and the most important resource for children who are struggling.
