Munias Mannikins:

Munias and Mannikins Robin Restall, 2010-08-30 This book covers 43 species of munias and mannikins. Munias are widespread throughout the Old World's tropical regions. In their natural habitat they are birds of the savanna but they have adapted to a number of different habitats including areas inhabited by humans. They range in size from the Java sparrow which is about the size of a common starling to the diminutive Madagascar mannikin. Their striking plumage makes them popular as cagebirds and they breed readily in captivity. The author has recently described one new species and ten new subspecies to science.

The Birds of Africa: Volume VIII Roger Safford, Frank Hawkins, 2020-09-17 Universally recognised as by far the most authoritative work ever published on the subject, *The Birds of Africa* is a superb multi-contributor reference work with encyclopaedic species texts, stunning paintings of all species and numerous subspecies, informative line drawings, detailed range maps and extensive bibliographies. Each volume contains an Introduction that brings the reader up to date with the latest developments in African ornithology, including the evolution and biogeography of African birds. Diagnoses of the families and genera, often with superspecies maps, are followed by the comprehensive species accounts themselves. These include descriptions of range and status, field characters, voice, general habits, food and breeding habits. Full bibliographies, acoustic references and indexes complete this scholarly work of reference. This eighth and final volume covers the Malagasy region which comprises Madagascar and the various islands and archipelagos of the Indian Ocean, including the Seychelles, the Comoros, Mauritius and Réunion. Every resident and migrant species is covered in full detail, comparable to other volumes in the series, and with a colour map for each species. Vagrants are treated in less detail. All species are illustrated on a beautiful series of 64 colour plates with original artwork from John Gale and Brian Small. This is a major work of reference on the birds of the region and will remain the standard text for many years to come.

The Selborne Magazine, 1900 **The Selborne Magazine and "Nature Notes," the Organ of the Selborne Society ...**, 1900 **Nature Notes**, 1897 **The Selborne Magazine and "Nature Notes,"** 1901 **Finches and Sparrows** Peter Clement, 2010-08-30 This is a guide to true finches and sparrows, illustrating all the species, many races and most sex and age variations with almost 950 portraits. The maps accompanying the illustrations show breeding and wintering ranges for all species. Although the guide is not primarily intended for cagebird enthusiasts, it will also be useful for those wishing to know more about the species encountered in captivity.
