**Municipal Ownership in the Electric Utility Industry** David Schap, 1986 Praeger special studies Praeger scientific Includes index Bibliography p 117 126      **Municipal Ownership in the Electric Utility Industry** David Schap, 1986 Praeger special studies Praeger scientific Includes index Bibliography p 117 126      Energy Abstracts for Policy Analysis, 1984      The Economics of the Gas Supply Industry Malcolm Abbott, 2016-05-12 In recent years natural gas has become a major source of energy with trade across borders increasing through both pipelines and as Liquefied Natural Gas LNG Owing to this global development this book traces the development of the gas supply industry from localised to national industries and national industries to a major global industry It looks at the basic economics and origins of the industry as well as the role of the government in its development and relation to international markets The book highlights certain economic characteristics such as the industry's vertical and horizontal structure the composition of consumer demand and the role of government in safety planning and investment With the understanding of the industry's long term development the book helps to illustrate the relationship between natural gas producers and importers of LNG This book would be of interest to scholars majoring in resource economics and energy economics as well as to international practitioners in the natural gas market      *Energy, Power and Protest on the Urban Grid* Andrés Luque-Ayala, Jonathan Silver, 2016-04-28 Providing a global overview of experiments around the transformation of cities electricity networks and the social struggles associated with this change this book explores the centrality of electricity infrastructures in the urban configuration of social control segregation integration resource access and poverty alleviation Through multiple accounts from a range of global cities this edited collection establishes an agenda that recognises the uneven and often historical geographies of urban electricity networks prompting attempts to re wire the infrastructure configurations of cities and predicating protest and resistance from residents and social movements alike Through a robust theoretical engagement with established work around the politics of urban infrastructures the book frames the transformation of electricity systems in the context of power and resistance across urban life drawing links between environmental and social forms of sustainability Such an agenda can provide both insight and inspiration in seeking to build fairer and more sustainable urban futures that bring electricity infrastructures to the fore of academic and policy attention      The Wired Northwest Paul W. Hirt, 2012-10-18 The Pacific Northwest holds an abundance of resources for energy production from hydroelectric power to coal nuclear power wind turbines and even solar panels But hydropower is king Dams on the Columbia Snake Fraser Kootenay and dozens of other rivers provided the foundation for an expanding regionally integrated power system in the U S Northwest and British Columbia A broad historical synthesis chronicling the region's first century of electrification Paul Hirt's new study reveals how the region's citizens struggled to build a power system that was technologically efficient financially profitable and socially and environmentally responsible Hirt shows that every energy source comes with its share of costs and benefits Because

Northwest energy development meant river development the electric power industry collided with the salmon fishing industry and the treaty rights of Northwest indigenous peoples from the 1890s to the present Because U S federal agencies like the Army Corps of Engineers and the U S Bureau of Reclamation built many of the large dams in the region a significant portion of the power supply is publicly owned initiating contentious debates over how that power should best serve the citizens of the region Hirt dissects these ongoing battles evaluating the successes and failures of regional efforts to craft an efficient yet socially just power system Focusing on the dynamics of problem solving governance and the tense relationship between profit seeking and the public interest Hirt s narrative takes in a wide range of players not only on the consumer side where electricity transformed mills mines households commercial districts urban transit factories and farms but also power companies operating at the local and regional level and investment companies that financed and in some cases parasitized the operators His study also straddles the international border It is the first book to compare energy development in the U S Northwest and British Columbia Both engaging and balanced in its treatment of all the actors on this expansive stage The Wired Northwest helps us better understand the challenges of the twenty first century as we try to learn from past mistakes and re design an energy grid for a more sustainable future

**The End of a Natural Monopoly** Daniel H. Cole, Peter Grossman, 2003-07-17 This book addresses the fundamental issues underlying the debate over electric power regulation and deregulation After decades of the presumption that the electric power industry was a natural monopoly recent times have seen a trend of deregulation followed by panicked re regulation

Technology as Freedom Ronald C. Tobey, 2023-11-15 Before 1930 the domestic market for electrical appliances was segmented but New Deal policies and programs created a true mass market reshaping the electrical and housing markets and guiding them toward mandated social goals The New Deal identified electrical refrigeration as a key technology to reform domestic labor raise family health and build family assets New Deal incentives led to nearly fifty percent of Title I National Housing Act loans being used to buy electric refrigerators in the 1930s New Deal policies ultimately created the mass commodity culture of home owning families that typified the conservative 1950s This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was

originally published in 1996      *Incentive Regulation and the Regulation of Incentives* Glenn Blackmon, 2012-12-06 The class is theory of price regulation assumed that the regulator knows the firm's costs the key piece of information that enables regulators to pressure firms to choose appropriate behaviors The regulatory problem was reduced to a mere pricing problem the regulator's goal was to align price with marginal cost subject to the constraint that revenues must cover costs Elegant and important insights ensued The most important was that regulation was inevitably a struggle to achieve second best outcomes Ramsey pricing was a splendid example Reality proved harsh to regulatory theory The firm's costs are by no means known to the regulator At best the regulator may know how much is currently spent to provide services but hardly what costs would be if the firm vigorously pursued efficiency Even if the current cost curve were known to the regulator technologies change so swiftly that today's costs are a very poor indicator of tomorrow's and those are the costs that will determine the firm's future decisions With the burgeoning attention to information considerations and game theory in economics the regulator's problem of eliciting host information about cost has received considerable attention In most cases however it has been in context that are both static and stylized such analyses rarely capture many of the essential elements of real world regulatory issues This volume represents a fresh approach It reflects Glenn Blackmon's twin strengths a keen analytic mind and important experience in the regulatory arena      Bibliography of Law and Economics B. Bouckaert, G. de

Geest, 2013-04-18 Law and economics can be considered as the most exciting development in legal scholarship in recent decades This volume is the first all encompassing bibliography in this area It lists approximately 7000 publications covering the whole area of law and economics including old law and economics topics such as antitrust law labor law tax law social security economic regulation etc as well as new law and economics with such topics as tort law contract law family law procedure criminal law etc The volume also includes the literature on the philosophical foundations and the fundamental concepts of the approach Part Two gives a special survey of law and economics publications in Europe written in other languages than English The Bibliography of Law and Economics is an invaluable reference work for students scholars lawyers economists and other people interested in this field      **Empowering the West** Jay L. Brigham, 1998 Westerners were at the forefront of the debate over electric power development even before the construction of large federally owned dams in the 1930s At the heart of this debate was a conflict between public power advocates and the private utility industry over control of the environment a struggle that was played out in the political arena In this book Jay Brigham describes that rivalry in the West in the years before the New Deal Focusing on the conservative city of Los Angeles and its liberal counterpart Seattle as well as on several small towns in the Midwest Brigham shows how fierce battles broke out as private and public systems competed for customers and how despite the differences between these two cities public power ultimately triumphed in each      **A Bibliographic Guide to North American Industry** Dale A.
