Muppet Babies Working World Assistant Professor School of Architecture Ellen Weiss, 1989-12 The Muppet Babies illustrate different types of occupations found from the local neighborhood to the farm to the ocean **Muppet Babies Working World** Ellen Weiss, 1989 The Muppet Babies illustrate different types of occupations found from the local neighborhood to the farm to the ocean The Wider Worlds of Jim Henson Jennifer C. Garlen, Anissa M. Graham, 2012-11-30 Jim Henson was the creative force behind a huge catalog of television series films specials and other productions even excepting the Muppets This collection of essays delves into the rest of Henson's body of work including projects developed during his lifetime and those that represent his legacy Covered here are Fraggle Rock The Dark Crystal Labyrinth The Jim Henson Hour Dinosaurs Farscape and more Henson's influence on both audiences and later productions remains palpable on screens large and small as this collection attests **Service Worlds** John Bryson, Peter Daniels, Barney Warf, 2013-04-15 Offers a new take on service industries in the context of changes in technology organisation and production and consumption It thus highlights and examines the significance of the increased blurring of the distinction between service and manufacturing functions in the production and consumption process Provides a student friendly account of the diversity of theoretical perspectives for understanding the new economic geography of advanced capitalist economies including the cultural approach which is widely used to interpret the form and structure of new economies Theoretical insights will be informed through a series of detailed firm and employee case studies Drawing upon the authors research in Europe North America and the Asia Pacific it will provide a geographical account of the development of service and manufacturing industries employment occupations and organisations and their changing role in the production system Building Imaginary Worlds Mark J.P. Wolf, 2014-03-14 Mark J P Wolf's study of imaginary worlds theorizes world building within and across media including literature comics film radio television board games video games the Internet and more Building Imaginary Worlds departs from prior approaches to imaginary worlds that focused mainly on narrative medium or genre and instead considers imaginary worlds as dynamic entities in and of themselves Wolf argues that imaginary worlds which are often transnarrative transmedial and transauthorial in nature are compelling objects of inquiry for Media Studies Chapters touch on a theoretical analysis of how world building extends beyond storytelling the engagement of the audience and the way worlds are conceptualized and experienced a history of imaginary worlds that follows their development over three millennia from the fictional islands of Homer's Odyssey to the present internarrative theory examining how narratives set in the same world can interact and relate to one another an examination of transmedial growth and adaptation and what happens when worlds make the jump between media an analysis of the transauthorial nature of imaginary worlds the resulting concentric circles of authorship and related topics of canonicity participatory worlds and subcreation's relationship with divine Creation Building Imaginary Worlds also provides the scholar of imaginary worlds with a glossary of terms and a

detailed timeline that spans three millennia and more than 1 400 imaginary worlds listing their names creators and the works in which they first appeared

The Crafty Animator Caroline Ruddell,Paul Ward,2019-04-03 This collection is a study of the value of craft as it can be understood within the study and practice of animation The book reconsiders the position of craft which is often understood as inferior to art with a particular focus on questions of labour in animation production and gendered practices The notion of craft has been widely investigated in a number of areas including art design and textiles but despite the fact that a wide range of animators use craft based techniques the value of craft has not been interrogated in this context until now Seeking to address such a gap in the literature this collection considers the concept of craft through a range of varying case studies Chapters include studies on experimental animation computer animation trauma and memory children s animation and silhouette animation among others The Crafty Animator also goes some way to exploring the relationship craft has with the digital in the context of animation production Through these varied discussions this book problematizes simplistic notions about the value of certain methods and techniques working to create a dialogue between craft and animation
